1989 This book is designed as an introduction to the field of special education for all those students and professionals teachers social workers psychologists medical officers nurses speech therapists and others who encounter children with special needs The authors first discuss current legislation in its historical context and draw attention to the major issues and controversies They go on to analyse a variety of learning difficulties Physical and sensory disabilities emotional and behavioural problems may all give rise to special educational needs The book then considers how children s special needs may be met in terms of curriculum resources and provisions It concludes with some prognostications and a critical review of current practice Teachers in Control Martin Powell,Jonathan Solity,2018-06-04 In an increasingly centralized education system how can teachers recover the freedom to make their own decisions Originally published in 1990 the teaching profession had seldom been under greater pressure Teachers in Control aimed to help teachers to understand the forces that shaped their personal and professional development and their relationships with children at the time It identifies the pressures that teachers faced from both the school and the educational system as a whole and then examines the internal psychological influences that lead people into teaching and direct their future careers The authors argue that an understanding of these influences can give teachers more control of decisions that affect their practice in the classroom and will still be very relevant today **Special Educational Needs in Schools** Sally Beveridge,1999 This book provides a concise but comprehensive overview of key issues about children with special needs in schools This second edition looks at the numerous changes in SEN policy and practice that have taken place over the last five years *Routledge Library Editions: Special Educational Needs* Various,2021-07-29 This set of 62 volumes originally published between 1951 and 1999 amalgamates a wide breadth of literature on Special Educational Needs with a particular focus on inclusivity class management and curriculum theory This collection of books from some of the leading scholars in the field provides a comprehensive overview of the subject how it has evolved over time and will be of particular interest to students of Education and those undertaking teaching qualifications **Classroom Management** Shirley Bull,Phillip Feldman,Jonathan Solity,2013-07-23 How to manage a class is probably the major worry of all teachers in training and young teachers new to the job This book shows how psychological principles strategies and tools can be applied to improve classroom practice
