Speculum Britanniae Regional Study Antiquarianism And Science In Britain To 17:

The Geography of Empire in English Literature, 1580-1745 Bruce McLeod, 1999-09-28 Between 1580 and 1745 a period that saw Edmund Spenser's journey to an unconquered Ireland and the Jacobite Rebellion the first British Empire was established The intervening years saw the cultural and material forces of colonialism pursue a fitful often fanciful endeavour to secure space for this expansion With the defeat of the Highland clans what England in 1580 could only dream about had materialised a coherent socio spatial system known as an empire Taking the Atlantic world as its context this ambitious 1999 book argues that England's culture during the seventeenth and early eighteenth centuries was saturated with a geographic imagination fed by the experiences and experiments of colonialism Using theories of space and its production to ground his readings Bruce McLeod skilfully explores how works by Edmund Spenser John Milton Aphra Behn Mary Rowlandson Daniel Defoe and Jonathan Swift imagine interrogate and narrate the adventure and geography of empire *Reading the Roman Republic in Early Modern England* Freyja Cox Jensen, 2012-08-03 Placing the reading of history in its cultural and educational context and examining the processes by which ideas about ancient Rome circulated this study provides the first assessment of the significance of Roman history broadly conceived in early modern England **Enlightenment, Modernity and Science** Paul A. Elliot, 2010-10-30 Scientific culture was one of the defining characteristics of the English Enlightenment The latest discoveries were debated in homes institutions and towns around the country But how did the dissemination of scientific knowledge vary with geographical location What were the differing influences in town and country and from region to region Enlightenment Modernity and Science provides the first full length study of the geographies of Georgian scientific culture in England The author takes the reader on a tour of the principal arenas in which scientific ideas were disseminated including home town and countryside to show how cultures of science and knowledge varied across the Georgian landscape Taking in key figures such as Erasmus Darwin Abraham Bennett and Joseph Priestley along the way it is a work that sheds important light on the complex geographies of Georgian English scientific culture *British Travellers and the Encounter with Britain, 1450-1700* John Cramsie, 2015 Encounters with a multicultural Britain in the Tudor and Stuart periods written with an eye to debates about immigration and ethnicity in today's Britain This book recovers the encounter with a multicultural Britain by British travellers in the Tudor and Stuart periods When William Camden writing in the sixteenth century set out to write the history of Britannia he deliberately took to the roads to discover it first hand and those diverse cultures guided and informed his journeys Here John Cramsie offers original perspectives on Camden's multicultural Britain through the study of British travellers and their narratives We meet characters such as the Tudor traveller John Leland who intended to tell the peoples of England and Wales about themselves chronicle how they came to settle the towns villages valleys and mountaintops they called home record the marks they left in the landscape and celebrate the noble histories and cultures they created Dozens eventually hundreds of Britons shared the same passion to meet their island neighbours and

relate their experiences The individuals studied in this book include actual as well as armchair travellers and those who blurred the boundaries between them Their letters diaries journals and histories range from the epic poignant and matter of fact to the exotic preposterous and hateful the sources include actual and imaginative narratives and those which combined both elements Travellers painted Britain with in Leland s words native colours that were rich vibrant and above all complex Their remarkable journeys are the story of how Britons over two centuries met interacted and attempted or not to understand one another Written with an eye to debates about immigration and ethnicity in today s Britain the book emphasizes the long history of making and remaking the island s cultural mosaic The encounter with Britain s native colours has been a burden of history and opportunity formillennia not simply for our own times JOHN CRAMSIE is Associate Professor Department of History Union College NY

Memory and the English Reformation Alexandra Walsham, Bronwyn Wallace, Ceri Law, Brian Cummings, 2020-11-12 The dramatic religious revolutions of the sixteenth and seventeenth centuries involved a battle over social memory On one side the Reformation repudiated key aspects of medieval commemorative culture on the other traditional religion claimed that Protestantism was a religion without memory This volume shows how religious memory was sometimes attacked and extinguished while at other times rehabilitated in a modified guise It investigates how new modes of memorialisation were embodied in texts material objects images physical buildings rituals and bodily gestures Attentive to the roles played by denial amnesia and fabrication it also considers the retrospective processes by which the English Reformation became identified as an historic event Examining dissident as well as official versions of this story this richly illustrated interdisciplinary collection traces how memory of the religious revolution evolved in the two centuries following the Henrician schism and how the Reformation embedded itself in the early modern cultural imagination

Geography, Science and National Identity Charles W. J. Withers, 2001-10-04 Charles Withers book brings together work on the history of geography and the history of science with extensive archival analysis to explore how geographical knowledge has been used to shape an understanding of the nation Using Scotland as an exemplar the author places geographical knowledge in its wider intellectual context to afford insights into perspectives of empire national identity and the geographies of science In so doing he advances a new area of geographical enquiry the historical geography of geographical knowledge and demonstrates how and why different forms of geographical knowledge have been used in the past to constitute national identity and where those forms were constructed and received The book will make an important contribution to the study of nationhood and empire and will therefore interest historians as well as students of historical geography and historians of science It is theoretically engaging empirically rich and beautifully illustrated

In Defiance of Time Angus Vine, 2010-06-17 In *Defiance of Time* contends that the antiquarian project integral to early modern literary and intellectual culture depended on the antiquaries capacity to restore in their imagination at least the fragments of the past It offers original readings of important authors such as Leland Stow Spenser Camden Drayton and Selden

Ireland's

First Settlers Peter Woodman, 2015-12-31 Ireland's First Settlers tells the story of the archaeology and history of the first continuous phase of Ireland's human settlement. It combines centuries of search and speculation about human antiquity in Ireland with a review of what is known today about the Irish Mesolithic. This is in part provided in the context of the author's 50 years of personal experience searching to make sense of what initially appeared to be little more than a collection of beach-rolled and battered flint tools. The story is embedded in how the island of Ireland, its position, distinct landscape and ecology impacted on when and how Ireland was colonized. It also explores how these first settlers evolved their technologies and lifeways to suit the narrow range of abundant resources that were available. The volume concludes with discussions on how the landscape should be searched for the often ephemeral traces of these early settlers and how sites should be excavated. It asks what we really know about the thoughts and life of the people themselves and what happened to them as farming began to be introduced.

Landscape, Literature and English Religious Culture, 1660-1800 R.

Mayhew, 2004-03-15 Landscape Literature and English Religious Culture 1660-1800 offers a powerful revisionist account of the intellectual significance of landscape descriptions during the long Eighteenth century. Landscape has long been a major arena for debate about the nature of Eighteenth century English culture; this book surveys those debates and offers a provocative new account. Mayhew shows that describing landscape was a religiously contested practice and that different theological positions led differing authors to different descriptive approaches. Landscape description then shows English intellectual life still in the grips of a Christian and classical mentality in the long Eighteenth century.

The Advancement of Learning in Stuart Scotland, 1679-89 HUGH. OUSTON, 2024-08-06 A study of Scottish thinkers and writers in their political and cultural context. The advancement of learning was the term used by late seventeenth century Scots for intellectual enquiry of all kinds. Encouraged by Stuart patronage and echoing a Royalist ideology of continuity and order following the chaos of the Civil War, the Virtuosi Scottish writers and thinkers sought to define Scotland's identity. They undertook structured empirical enquiry into Scottish natural history and geography, human history and antiquities, law and society, while the legal and medical professions developed their status and purpose through institutions such as the Royal College of Physicians and the Advocates Library. They both complemented and eclipsed the changing intellectual life of the Church and Universities. This book considers the work of leading authors such as Sir George Mackenzie, Sir Robert Sibbald and Lord Stair alongside the many other voices engaged in learned research and debate, examining their shared or contrasting philosophy and methods. It shows how a distinctively Scottish take on the Scientific Revolution was enhanced by close contacts with the Royal Society and English thinkers and a conscious membership of the European Republic of Letters.

Speculum Britanniae Regional Study Antiquarianism And Science In Britain To 17: Bestsellers in 2023 The year 2023 has witnessed a noteworthy surge in literary brilliance, with numerous engrossing novels captivating the hearts of readers worldwide. Lets delve into the realm of popular books, exploring the captivating narratives that have captivated audiences this year. The Must-Read : Colleen Hoover's "It Ends with Us" This poignant tale of love, loss, and resilience has captivated readers with its raw and emotional exploration of domestic abuse. Hoover expertly weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can succeed. Speculum Britanniae Regional Study Antiquarianism And Science In Britain To 17 : Taylor Jenkins Reids "The Seven Husbands of Evelyn Hugo" This spellbinding historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reids absorbing storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Discover the Magic : Delia Owens "Where the Crawdads Sing" This mesmerizing coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens crafts a tale of resilience, survival, and the transformative power of nature, entrancing readers with its evocative prose and mesmerizing setting. These popular novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of captivating stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a brilliant and suspenseful novel that will keep you speculating until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.
