McMurrin, 1985-02-01 Established to advance and reflect upon the scholarly and scientific learning relating to human values and valuation the annual Tanner lectures are international and intercultural and transcend ethnic national religious and ideological distinctions Volume V includes A Writer from Mexico by Carlos Fuentes Only a Vision by Ilya Prigogine The Incomplete Egoist by David Gauthier Scientific Literacy as a Goal in a High Technology Society by Herbert A Simon The Value of Genius Haydn in His Time by H C Robbins Landon and indexes for the first five volumes in the series Appointment as a Tanner lecturer is a recognition of uncommon capabilities and outstanding scholarly or leadership achievement in the field of human values The lecturers represented in Volume V originally published in 1984 view the self from five varied perspectives from the exploration of the intimate creative self to the preparation of the individual for citizenship through scientific training **The Tanner Lectures on Human Values** Sterling M. McMurrin, 2011-04-28 A prestigious series of lectures that are international and intercultural and transcend ethnic national religious and ideological distinctions *The Paradoxes of Political Liberty* Quentin Skinner, 1984 Handbook of Income Distribution Anthony Barnes Atkinson, François Bourguignon, 2000 **Medical Benefit and the Human Lottery** Duff R. Waring, 2008-01-18 Bioethicists moral philosophers and social policy analysts have long debated about how we should decide who shall be saved with scarce lifesaving resources when not all can be saved It is often claimed that it is fairer to save younger persons and that age is an ethically relevant consideration in such tragic decisions Medical benefit should be maximized and final selection should aim to minimize the contaminating influence of chance These claims are challenged by Duff R Waring in Medical Benefit and the Human Lottery one of the few books that attempts a sustained defence of random patient selection This book combines ethics and political philosophy in its novel and strict egalitarian approach to patient selection for transplantable organs Waring addresses the question of whether we should choose between lives on the basis of fair chances or best outcomes He argues that final selection criteria should be based on fair chances that equalize opportunity as opposed to best outcomes His defence of hardy egalitarianism aims to show that random selection by lottery can affirm both a common humanity and the equal value of lives The notion of patient selection by lottery has not fared well in bioethics and has been regarded by some as a moral affront Waring argues that a human selection lottery may be neither as crude nor as ethically anomalous as some have supposed Indeed it can reflect a familiar conception of equality as a political and moral ideal This conception abstracts from many undeniable differences between patients and claims that scarce resources should be allocated on the principled

assumption that each of their lives is equally worth saving The book is also notable for its critiques of some recent utilitarian notions of medical benefit which can have an age biased impact on elderly patients Waring then argues against the leading contemporary age based approaches to patient selection He explores the way random selection by lottery can affirm his egalitarian ethos in cases where eligible transplant candidates have each passed a threshold level of prospective medical benefit that has been set by democratic deliberation Taming chance with a human lottery is defended as the most lucid means of ensuring equal opportunity In so doing Waring argues that we give the principle of equal concern and respect a radical expression above a noncomparative threshold of medical benefit each candidate can have an equal claim to life

On the Currency of Egalitarian Justice, and Other Essays in Political Philosophy Gerald A. Cohen, 2011-01-03 G A Cohen was one of the most gifted influential and progressive voices in contemporary political philosophy At the time of his death in 2009 he had plans to bring together a number of his most significant papers This is the first of three volumes to realize those plans Drawing on three decades of work it contains previously uncollected articles that have shaped many of the central debates in political philosophy as well as papers published here for the first time In these pieces Cohen asks what egalitarians have most reason to equalize he considers the relationship between freedom and property and he reflects upon ideal theory and political practice Included here are classic essays such as Equality of What and Capitalism Freedom and the Proletariat along with more recent contributions such as Fairness and Legitimacy in Justice Freedom and Money and the previously unpublished How to Do Political Philosophy On ample display throughout are the clarity rigor conviction and wit for which Cohen was renowned Together these essays demonstrate how his work provides a powerful account of liberty and equality to the left of Ronald Dworkin John Rawls Amartya Sen and Isaiah Berlin *Foucault and Social Dialogue* Chris Falzon, 2006-06-19 Foucault and Social Dialogue Beyond Fragmentation is a compelling yet extremely clear investigation of these options and offers a new way forward Christopher Falzon argues that the proper alternative to foundationalism is not fragmentation but dialogue and that such a dialogical picture can be found in the work of Michel Foucault Such a reading of Foucault allows us to see for the first time the ethical and political position implicit in Foucault's work and how his work contributes to the larger debate concerning the death of man The Evolution of Population Biology Rama S. Singh, Marcy K. Uyenoyama, 2004-01-15 This 2004 collection of essays deals with the foundation and historical development of population biology and its relationship to population genetics and population ecology on the one hand and to the rapidly growing fields of molecular quantitative genetics genomics and bioinformatics on the other Such an interdisciplinary treatment of population biology has never been attempted before The volume is set in a historical context but it has an up to date coverage of material in various related fields The areas covered are the foundation of population biology life history evolution and demography density and frequency dependent selection recent advances in quantitative genetics and bioinformatics evolutionary case history of model organisms focusing on polymorphisms and selection mating system evolution and

evolution in the hybrid zones and applied population biology including conservation infectious diseases and human diversity
