Developing the Global South Paulos Milkias,2010 For four decades the UN has attempted to foster development in the countries of the Southern hemisphere The book provides a synopsis of these efforts from the Brandt Commission Report to Boutros Boutros Ghali's Agenda for Development It presents opposing arguments in parceling responsibility for the growing gap between the North and the South and details the Millennium Development Goals and assesses their successes and failures so far Prof Milkias provides suggestions for closing the gap for removing the debt burden that is currently crushing the nations of the South and for relieving the poverty ignorance and disease that plague so much of humanity American Abolitionists Stanley Harrold,2014-09-25 This book the latest in the Seminar Studies in History series examines the movement to abolish slavery in the US from the origins of the movement in the eighteenth century through to the Civil War and the abolition of slavery in 1865 Books in this Seminar Studies in History series bridge the gap between textbook and specialist survey and consists of a brief Introduction and or Background to the subject valuable in bringing the reader up to speed on the area being examined followed by a substantial and authoritative section of Analysis focusing on the main themes and issues There is a succinct Assessment of the subject a generous selection of Documents and a detailed bibliography Stanley Harrold provides an accessible introduction to the subject synthesizing the enormous amount of literature on the topic American Abolitionists explores the roles of slaves and free blacks in the movement the importance of empathy among antislavery whites for the suffering slaves and the impact of abolitionism upon the sectional struggle between the North and the South Within a basic chronological framework the author also considers more general themes such as black abolitionists feminism and anti slavery violence For readers interested in American history **The Question of Limits** Christian Marouby,2018-11-09 We have forgotten how to think about limits Most philosophical approaches to the environment have focused primarily on the value of the natural world the status of anthropocentrism and the Anthropocene and the largely ethical questions of our impact on the world While fully acknowledging these concerns this book emphasizes

the centrality of the confrontation between the imperative of growth that has been present since the Enlightenment and our belated rediscovery of limits The expression Limits to Growth the title of a famous book from 1972 by Donella H Meadows et al may have passed into a common discourse yet the notion of limits itself remains insufficiently theorized or even reflected upon in the current movement of environmental advocacy Sometimes it even seems as if there is an effort to avoid it This book argues that on the contrary we can only resolve the present global challenges by confronting the question of limits and making it central to our reflection This entails discussing the long history of thinking about limits in which Malthus is the most infamous figure but which also includes such major participants as John Stuart Mill and Karl Marx Ultimately The Question of Limits contends that the value of embracing limits extends beyond the environment and offers the potential to become a transformative social good The Question of Limits will be of great interest to students and scholars working at the intersection of environmental studies economics intellectual history and philosophy The Fragility of the 'Failed State' Paradigm Neyire Akpınarlı, 2010 The absence of effective government one of the most important issues in current international law became prominent with the failed state concept at the beginning of the 1990s Public international law however lacked sufficient legal means to deal with the phenomenon Neither attempts at state reconstruction in countries such as Afghanistan and Somalia on the legal basis of Chapter VII of the UN Charter nor economic liberalisation have addressed fundamental social and economic problems This work investigates the weaknesses of the failed state paradigm as a long term solution for international peace and security arguing that the solution to the absence of effective government can be found only in an economic and social approach and a true universalisation of international law *The World and a Very Small Place in Africa* Donald R. Wright, 1997 This study looks at the effects of global phenomena trans Saharan trade European expansion the rise of an Atlantic plantation complex industrialization imperialism colonialism world wars growth of a world market political independence and economic dependence on the way of life in Niimi a small area at the mouth of the Gambia river in West Africa now called The Gambia over the last six seven hundred years Written in clear accessible prose and drawing on archival and oral traditions the work considers global developments from a local regional perspective

understanding guest and host relations and its implications for commercial settings The second comprises social scientists using hosts and guests as a metaphor for understanding the relationship between host communities and guests as people from outside the community migrants asylum seekers and illegal immigrants The Routledge Handbook of Hospitality Studies encourages both the study of hospitality as a human phenomenon and the study for hospitality as an industrial activity embracing the service of food drink and accommodation Developed from specifically commissioned original contributions from recognised authors in the field it is the most up to date and definitive resource on the subject The volume is divided into four parts the first looks at ways of seeing hospitality from an array of social science disciplines the second highlights the experiences of hospitality from different guest perspectives the third explores the need to be hospitable through various time periods and social structures and across the globe while the final section deals with the notions of sustainability and hospitality This handbook is interdisciplinary in coverage and is also international in scope through authorship and content The state of the art orientation of the book is achieved through a critical view of current debates and controversies in the field as well as future research issues and trends It is designed to be a benchmark for any future assessment of the field and its development This handbook offers the reader a comprehensive synthesis of this discipline conveying the latest thinking issues and research It will be an invaluable resource for all those with an interest in hospitality encouraging dialogue across disciplinary boundaries and areas of study Chapters Chapter 4 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

Periods of World History Charles A. Truxillo, 2008 Periods of World History a Latin American Perspective is the first serious attempt to write a world history narrative in which Latin America receives serious consideration The chronology of the work covers the normative period of world history to date 1800 B.C. to 1800 A.D. During this time differentiation of world societies was at its height The six civilized core areas of the ecumene interacted but were not moving toward uniformity as was characteristic of the first phase of world history Theocratic civilizations 3500-1500 B.C. Over the last two centuries global societies have also tended to coalesce because of westernization industrialism nationalism ideology and the media During the normative phase of human history Latin America moved from being a periphery of Afro-Eurasia to the status of becoming the economic crucible of Spain's vast Catholic

monarchy which was the ecumene's first global power 1492-1648 A.D. Latin America was again reduced to peripheral status. Periods of World History explains these processes in the larger context of a truly global historical narrative and as such makes an extraordinary contribution to understanding human social development. Charles Truxillo is a professor of Chicano Studies at the University of New Mexico in Albuquerque. He received his Ph.D. in Latin American history at UNM and has published two other books: *History of Islam* and *By the Sword and the Cross*. Dr. Truxillo is dedicated to teaching Chicano Studies in the context of Latin America and world history. *A Concise Economic History of the World* Rondo E.

Cameron, 1993. This classic book offers a broad sweep of economic history from prehistoric times to the present and explores the disparity of wealth among nations. Now in its fourth edition, *A Concise Economic History of the World* includes expanded coverage of recent developments in the European Union, transition economies, and East Asia. **Disciples of All Nations**

Lamin O. Sanneh, 2008. Tracing the rise of Christianity to its key role in Europe's maritime and colonial expansion, this text sheds light on the ways in which societies in Africa, Asia, and Latin America have been drawn into the Christian orbit.

Compiled by experts in the field, the Companion is fully indexed for ease of access. **The African Experience** Roland Oliver, 1992. Covering the entire span of human history across the African continent, this book begins in the Garden of Eden in the highland interior of East Africa and ends with the disintegration of apartheid. In the first chapter, the author introduces us to our earliest tool-making ancestor known affectionately as 'Dear Boy'. In the last, the author ponders the changes we are likely to see as the political elites of Africa begin to review the operation of their single-party systems. The book covers the human colonization of the continent, the origins of food production, the formation and diffusion of African languages, the achievements of Ancient Egypt, the impact of Judaism, Christianity, and Islam, slavery, the caravan trade, exploration and colonization, the economic, political, and social developments which gave rise to the modern nation-states. This book looks at all these aspects in an overview of the history of Africa.
