McKay, 2012-07-20 Aiming to furnish the reader with the historical data to engage with the debates surrounding the Cameron government's Big Society and civil society this book gives the reader a greater and more informed historical consciousness of how the NGO sector has grown and influenced Routledge Handbook of Diplomacy and Statecraft B.J.C. McKercher, 2012-03-12 Despite post Cold War arguments about their demise Great Powers not only continue to thrive with lesser Powers they form the basis of the constellation of global politics This topical new Handbook illustrates how and why the new international order has evolved and is still evolving since the end of the Cold War through the application of diplomacy and statecraft Including cutting edge contributions from over 40 scholars the handbook is structured around seven sections Context of Diplomacy Great Powers Middle Powers Developing Powers International Organisations and Military Alliances International Economy Issues of Conflict and Co operation Through analysis of a wide range of case studies the Handbook assesses the diplomacy and statecraft of individual powers offering insights into how they function their individual perception of national interests and the roles they play in modern statecraft The contributors also seek to evaluate the organizations and contemporary issues that continue to influence the shaping of the new international order A comprehensive survey of diplomacy across the world this work will be essential reading for scholars and professionals alike When Rambo Meets the Red Cross Stanislava P. Mladenova, 2024-04-01 Non governmental organizations and militaries are notorious for their difficult relationship The military is mostly understood through the prism of its lethality and NGOs are perceived as idealistic do gooders ready to save the world Stanislava P Mladenova traces the changing character of interaction between both of these entities She argues that the boundaries which once separated their functions are fading Fragile ungoverned and insecure spaces need both of what these actors can provide As a result they have drawn closer together and have everything at their disposal for a collaborative efficient and productive civil military partnership which is contrary to what many observers and leaders in the conflict and development space have long believed Mladenova makes a convincing case that it is high time both sets of actors put aside their differences bringing to light a fast changing landscape of vicious poverty insecurity and climate change where the conventional way of doing business will become the exception not the rule *Routledge Handbook of African Security* James J. Hentz, 2013-08-22 This new Handbook examines the issues challenges and debates surrounding the problem of security in Africa Africa is home to most of the world's current conflicts and security is a key issue However African security can only be understood by employing different levels of analysis the individual human security the state national state security and the region regional international security Each of these levels provides analytical tools for understanding what could be called the African security predicament and these debates are animated by the new security issues immigration small arms transfers gangs and

domestic crime HIV AIDS transnational crime poverty and environmental degradation African security therefore not only presents concrete challenges for international security but provides a real world context for challenging conventional conceptions of security Drawing together contributions from a wide range of key thinkers in the field the Routledge Handbook of African Security engages with these debates and is organized into four parts Part I The African security predicament in the twenty first century Part II Understanding conflict in Africa Part III Regionalism and Africa Part IV External influences This Handbook will be of great interest to students of African politics human security global security war and conflict studies peacebuilding and IR in general

Humanitarianism Tim Allen, Anna Macdonald, Henry Radice, 2018-06-27 The field of humanitarianism is characterised by profound uncertainty by a constant need to respond to the unpredictable and by concepts and practices that often defy simple or straightforward explanation Humanitarians often find themselves not just engaged in the pursuit of effective action but also in a quest for meaning That is the starting point for this book Humanitarian action has in recent years confronted geopolitical challenges that have upended much of its conventional modus operandi and presented threats to its foundational assumptions and legal frameworks The critical interrogation of the purpose practice and future of humanitarian action has yielded a rich new field of enquiry humanitarian studies and many thoughtful books articles and reports So the question arose as to the most useful way to provide a critical overview that might serve to bring some definitional clarity as well as analytical rigor to the waves of critique and shifting sands of humanitarian action

Humanitarianism A Dictionary of Concepts provides an authoritative analysis that attempts to rethink rather than merely problematize or define the issues at stake in contemporary humanitarian debates It is an important moment to do so Just about every tenet of humanitarianism is currently open to question as never before

The Politics of Aid to Burma Anne Decobert, 2015-11-19 For over sixty years conflict between state forces and armed ethnic groups was ongoing in parts of the borderlands of Burma Ethnic minority communities were subjected to systematic and widespread abuses by an increasingly complex patchwork of armed state and non state actors Populations in more remote and disputed border areas typically had little to no access to even basic healthcare and education services As part of its counter insurgency campaign the military state also historically restricted international humanitarian access to civilian populations in unstable border areas It was in this context that cross border aid to Burma had developed as an alternative mechanism for channelling assistance to populations denied aid through more conventional systems Yet by the late 2000s national and international changes had significant impacts on an aid debate which had important political and ethical implications Through an ethnographic study of a cross border aid organisation working on the Thailand Burma border this book focuses on the political and ethical dilemmas of humanitarian government It explores the ways in which aid systems come to be defined as legitimate or illegitimate humanitarian or un humanitarian in an international context that has witnessed the multiplication of often conflicting humanitarian systems and models It examines how an embodied history of violence can shape the worldviews and actions of local humanitarian actors as well as institutions created to mitigate human

suffering It goes on to look at the complex and often invisible webs of local organisations international NGOs donors armed groups and other actors which can develop in a cross border and extra legal context a context where competing constructions of systems as legitimate or illegitimate are highlighted Exploring the history of humanitarianism from the local aid perspective of Burma this book will be of interest to students and scholars of Southeast Asian Studies Anthropology of Humanitarian Aid and Development Studies

Recolonisation Susantha Goonatilake, 2006-09-07 As the Cold War ended there was a conscious policy shift in Western countries and as a consequence among international agencies which was directed at supporting non governmental organizations NGOs in the developing world As a result large amounts of foreign funds began to be granted to various NGO groups with the ostensible aim of encouraging pro people development This book contributes to the emerging debate which is questioning the role of foreign funded NGOs There is a growing awareness that they often have a powerful and structural influence impacting on both organisational landscapes and civil society In this context Susantha Goonatilake studies the political economy of NGO activity in Sri Lanka a country which once had a vibrant democratic tradition and a functioning civil society The author maintains that focused NGO penetration into the country began in the 1980s simultaneously with the growth of the authoritarian state He contends that their subsequent activities in Sri Lanka have had a deep and visible impact on civic life from restructuring the state to de mobilising the armed forces to privatising foreign relations to controlling key segments of academia and media To illustrate his argument he takes up four areas social development human rights international relations and academia and describes the role of foreign funded NGOs in all four Through these case studies the author highlights his basic premise that the work of foreign funded NGOs actually undermines local civil institutions and that they project an implicit agenda for re colonisation Constituting the first detailed case study of what is
