reports form the nucleus of this book and provide fascinating insights about state and private patronage and the class economic issues related to the affordability and prestige of the piano in Russia Issues surrounding the transformation of the music industry in Russia the role of women as patrons and performers the exportation of instruments to the Russian Far East and the complex system of tariffs and trade protection that benefited domestic piano manufacturers provide this book s thematic links Conclusions indicate that while favorable tariff laws and state imposed economic policies benefited the family owned firms in the nineteenth century they remained in effect in the decades after the nationalization of the piano industry in 1917
