Ameka, M.E. Kropp Dakubu, 2008-04-10 This book explores the thesis that in the Kwa languages of West Africa aspect and modality are more central to the grammar of the verb than tense Where tense marking has emerged it is invariably in the expression of the future and therefore concerned with the impending actualization or potentiality of an event hence with modality rather than the purely temporal sequencing associated with tense The primary grammatical contrasts are perfective versus imperfective The main languages discussed are Akan Dangme Ewe Ga and Twuli while Nzema Ahanta Likpe and Eastern Gbe are also mentioned Knowledge about these languages has deepened considerably during the past decade or so and ideas about their structure have changed The volume therefore presents novel analyses of grammatical forms like the so called S Aux O V Other or future constructions and provides empirical data for theorizing about aspect and modality It should be of considerable interest to Africanist linguists typologists and creolists interested in substrate issues      *Intonation in African Tone Languages* Laura J. Downing, Annie Rialland, 2016-11-07 This volume brings together two under investigated areas of intonation typology While tone languages make up to 70 percent of the world's languages only few have been explored for intonation And even though one third of the world's languages are spoken in Africa and most sub Saharan languages are tone languages recent collections on tone and intonation typology have almost entirely ignored African languages This book aims to fill this gap      **The Phonological Representation of Suprasegmentals** Koen Bogers, Harry van der Hulst, Marten Mous, 2016-09-26 No detailed description available for The Phonological Representation of Suprasegmentals      Fundamentals of Phonetics, Phonology and Tonology Rose-Juliet Anyanwu, 2008 This book is to some extent a reference work uniting theory and description It comprises four structured parts Phonetics Phonology Tonology and Specific African Sound Patterns By means of concrete examples the book describes and compares a wide range of basic and current issues and facts that are of utmost relevance for all persons working on language or linguistics as well as in related fields The book provides core instruments needed and used in the study of phonology and phonological analyses It discusses modern phonological theories Phonological issues and processes such as vowel harmony assimilation dissimilation lenition as well as fortition are explained Prosodic topics such as tone stress pitch and intonation are considered Issues in tonology include tonological analysis tonal behaviour and rules Special attention is given to specific

sounds found in African languages      **The Ghanaian linguistics nexus** Christopher R. Green, Samson Lotven, 2024-06-17

There is a long and rich tradition of excellence in Ghanaian linguistics and the detailed study of Ghanaian languages. This tradition has expanded by leaps and bounds in recent years thanks in part to a cadre of renowned and highly productive Ghanaian linguists conducting research at universities around the globe as well as in Ghana itself. So too has the commitment to careful description, documentation and theorizing underlying this tradition been extended to the students that these scholars have trained. The papers in this volume reflect the vast reach of this research tradition grounded in but expanding beyond Ghanaian languages ranging from experimental phonetics to language description to political discourse analysis.

Diversity in African languages Doris L. Payne, Sara Pacchiarotti, Mokaya Bosire ,2016-12-31 Diversity in African Languages contains a selection of revised papers from the 46th Annual Conference on African Linguistics held at the University of Oregon Most chapters focus on single languages addressing diverse aspects of their phonology morphology semantics syntax information structure or historical development These chapters represent nine different genera Mande Gur Kwa Edoid Bantu Nilotic Gumuzic Cushitic and Omotic Other chapters investigate a mix of languages and families moving from typological issues to sociolinguistic and inter ethnic factors that affect language and accent switching Some chapters are primarily descriptive while others push forward the theoretical understanding of tone semantic problems discourse related structures and other linguistic systems The papers on Bantu languages reflect something of the internal richness and continued fascination of the family for linguists as well as maturation of research on the family The distribution of other papers highlights the need for intensified research into all the language families of Africa including basic documentation in order to comprehend linguistic diversities and convergences across the continent In this regard the chapter on Daats i in Gumuzic stands out as the first ever published article on this hitherto unknown and endangered language found in the Ethiopian Sudanese border lands
