## **The American College:**

**The American College and University** Frederick Rudolph, 2011-07-01 First published in 1962 Frederick Rudolph's groundbreaking study *The American College and University* remains one of the most useful and significant works on the history of higher education in America. Bridging the chasm between educational and social history, this book was one of the first to examine developments in higher education in the context of the social, economic, and political forces that were shaping the nation at large. Surveying higher education from the colonial era through the mid-twentieth century, Rudolph explores a multitude of issues, from the financing of institutions and the development of curriculum to the education of women and blacks, the rise of college athletics, and the complexities of student life. In his foreword to this new edition, John Thelin assesses the impact that Rudolph's work has had on higher education studies. The new edition also includes a bibliographic essay by Thelin covering significant works in the field that have appeared since the publication of the first edition. At a time when our educational system as a whole is under intense scrutiny, Rudolph's seminal work offers an important historical perspective on the development of higher education in the United States.

**The American College and the Culture of Aspiration, 1915-1940** David O. Levine, 2019-06-30 Is higher education a right or a privilege? Who should go to college? What should they study there? These questions were hotly debated between the world wars when an unprecedented boom in college enrollments forced Americans to struggle between their belief in the importance of educational opportunity and their desire to preserve the existing social structure. In *The American College and the Culture of Aspiration, 1915-1940*, David O. Levine offers the first in-depth history of higher education during this era, a period when colleges and universities became arbiters of social and economic mobility and a hierarchy of schools evolved to meet growing demands for occupational training and socialization.
