Conzen, 2014-06-03 The only compact yet comprehensive survey of environmental and cultural forces that have shaped the visual character and geographical diversity of the settled American landscape The book examines the large scale historical influences that have molded the varied human adaptation of the continent's physical topography to its needs over more than 500 years It presents a synoptic view of myriad historical processes working together or in conflict and illustrates them through their survival in or disappearance from the everyday landscapes of today **Taking Measures Across the American Landscape** James Corner, James M. Corner, Alex S. MacLean, 1996-01-01 Photographs and essays express the way the American landscape has been forged by various cultures in the past and what the possibilities are for its future design Jacket **Ansel Adams and the American Landscape** Jonathan Spaulding, 1995 Spaulding provides a full biography and a critical analysis of the work of the man who introduced the general public to photography as art *The American Landscape Tradition* Joseph S. Czeszchowski, 1982 Contains 176 landscapes painted by 126 American artists between 1740 and 1965 with accompanying text *The American Landscape*, 1972 *The Artist and the American Landscape* John Paul Driscoll, Arnold Skolnick, 1998 The expansive and diverse American landscape has inspired artists for hundreds of years Since the arrival of the first Europeans who interpreted what is now America as a new Eden artists have felt and expressed a special affinity for the landscape The Artist and the American Landscape surveys 200 years of American landscape painting region by region We begin in 1798 with Ralph Earl's Landscape

View of Old Bennington and continue through the divergent works of the Hudson River School William M Chase and the Impressionists John Marin and the Modernists the Regionalists John Steuart Curry and Grant Wood and post war masters such as Fairfield Porter Finally this volume includes an extensive overview of major contemporary artists who draw their inspiration from the landscape The Artist and the American Landscape is the most comprehensive fully illustrated survey of its kind and a riveting look at the artist s compelling response to the drama of the land we live in **Home Ground** Barry Lopez, Debra Gwartney, 2013 A landmark work hailed as an homage to landscape and language now in a redesigned field guide edition Picturesque Literature and the Transformation of the American Landscape, 1835-1874 John Evelev, 2021 This work challenges dominant narratives of the concerns of nineteenth century literature to show how supposedly minor works of picturesque helped transform the American landscape and create what we now recognize as the defining spaces of American life The American landscape John Conron, 1974 **Nature and Culture** Barbara Novak, 2007-01 In this illustrated volume including a number of stunning color prints the author explains that for fifty extraordinary years American society bestowed in the idea of Nature its most cherished ideals Between 1825 and 1875 all kinds of Americans artists writers scientists as well as everyday citizens believed that God in Nature could resolve human contradictions and that nature itself confirmed the American destiny During these years Nature God and Man converged to become a trinity and it was through the landscape painters the leaders of this intellectual movement that the nation was reminded of divine benevolence by keeping before their eyes the mountains trees forests and lakes Using diaries and letters of the artists as well as quotes from literary texts journals and periodicals the author illuminates the range of ideas projected on to the American landscape by painters such as Thomas Cole Albert Bierstadt Frederic Edwin Church Asher B Durand Fitz Hugh Lane and Martin J Heade and writers such as Ralph Waldo Emerson Henry David Thoreau William Wordsworth Theodore Rousseau and Frederich Wilhelm Schelling Adding a new dimension to the discussion of nature s influence on the American mind she explains how religion philosophy science and literature served as the support system for the idea of God in Nature She shows that the idea of nature as a national vested interest was invaluable to a young expanding nation but ultimately this essentially monolithic view collapsed from within undermined by the Civil War Darwinism and a burgeoning technological landscape Taking American landscape painting in its golden era as a product of society she examines the cultural background of paintings as an index to their intrinsic meaning She explains for example how new discoveries in science were made consonant with Deity how religion itself permeated nature with the idea of Creation and how the landscape artists were given the task of providing the images of nature that became the national iconography She goes on to demonstrate how American landscapists handling rocks clouds plants and other natural elements paralleled and diverged from scientific developments and also how the landscapists who accompanied explorers on their westward expeditions related to their scientific colleagues With a new introduction this volume encompasses a vast cultural panorama It demonstrates how the influence of the nature

served not only as a vehicle for artistic creation but as its ideal form **Reading the American Landscape** Lex ter Braak, Anne Hoogewoning, Erik de Jong, Frank van der Salm, David Hamers, 2009 Their journey is recorded in Reading the American Landscape which includes essays by the members of the group and a number of American landscape researchers

Over Alex MacLean, 2008-10 A collection of 250 full color aerial photographs of the American landscape captures the complex interrelationship between the natural and constructed environments the impact of the American lifestyle on the environment and the consequences of both natural processes and human intervention Frederick Law Olmsted: Designing the American Landscape Charles E. Beveridge, 1995 **Enduring Roots** Gayle Brandow Samuels, 2005-01-03 Trees are the grandest and most beautiful plant creations on earth From their shade giving arching branches and strikingly diverse bark to their complex root systems trees represent shelter stability place and community as few other living objects can Enduring Roots tells the stories of historic American trees including the oak the apple the cherry and the oldest of the world s trees the bristlecone pine These stories speak of our attachment to the land of our universal and eternal need to leave a legacy and demonstrate that the landscape is a gift to be both received and sometimes tragically to be destroyed Each chapter of this book focuses on a specific tree or group of trees and its relationship to both natural and human history while exploring themes of community memory time and place Readers learn that colonial farmers planted marker trees near their homes to commemorate auspicious events like the birth of a child a marriage or the building of a house They discover that Benjamin Franklin s Newtown Pippin apples were made into a pie aboard Captain Cook s Endeavour while the ship was sailing between Tahiti and New Zealand They are told the little known story of how the Japanese flowering cherry became the official tree of our nation s capital a tale spanning many decades and involving an international cast of characters Taken together these and many other stories provide us with a new ways to interpret the American landscape It is my hope the author writes that this collection will be seen for what it is a few trees selected from a great forest and that readers will explore both the trees and the forest and find pieces of their own stories in each **The American Landscape** , 2025-07-30 Get ready for a cross country trip of the United States Readers will be stopping at some of the country s most awe inspiring locations from Niagara Falls in the northeast to the Grand Canyon in the southwest Each book is filled with fascinating facts and history about a unique region of the United States and covers topics such as geology wildlife and local populations The accessible text is paired with amazing photographs of natural formations and landscapes to give readers a complete learning experience

The American Landscape Stephen F. Mills, 2013-12-19 American landscapes are some of the best known images in the world we recognize Niagara Falls the Grand Canyon the Manhattan skyline and the streets of San Francisco in a thousand advertisements and TV shows But how have these places come to be as they are and why are some places familiar while others are quite unknown The American Landscape introduces the reader to the changing face of the American environment tracing the way in which the present array of forests and farms parks and superhighways cities and suburbs have come about
