New York, The Ronald Press Co., 1923 Rudolf Alexander Clemen,      *Meat Then and Now* Dell M. Allen, 2022-06-09 As the population of the United States expanded and moved westward the meat and livestock industry expanded as well Animals were essential not only for food and other products but also as a source of power for pulling wagons and farm equipment The parallel development of railroads was instrumental in the efficient transport for both livestock and meat during America's rapid growth in the 1800s and early 1900s An entire industry was developed to raise market slaughter and process meat for the nation's citizens and this fascinating book provides extensive histories of early meat companies Researched with authoritative and meticulous detail by a leading expert in the field of meat and food safety *Meat Then and Now* will give you perspective on the industry rooted in the history of America's development      **The Meat Industry in the United States** United States. Bureau of Agricultural Economics. Library, 1928      *The Kansas Beef Industry* Charles L. Wood, Joshua Specht, 2021-10-08 This book relates the modern development of the Kansas beef cattle industry combining both the history of production including specific business problems and the significant work in upbreeding and an examination of the marketing aspects of the industry that became so important during the twentieth century Sharpest focus is on the period 1890 to 1940 after the Western beef industry had passed through the transition from using the expansive open range method of beef production to the more rational and organized methods of today Wood presents a detailed discussion of the history of upbreeding He points out the little known fact that the fine blooded animals especially Herefords that moved out from the Midwest were probably more important in stocking the ranges of the Plains and the Southwest than the many thousands of Longhorns driven from Texas He emphasizes the interregional aspect of beef production and the unique role played by Kansas On the threshold of the Great Plains Kansas received cattle from both the Midwest and the Southwest for many years upbred cattle moving South and stocker cattle moving from the South or Southwest into Kansas for additional maturing before being shipped to the Midwest for fattening or for slaughter Wood also looks closely at the relationship of cattlemen to government and to big business railroads stockyards and packers He sees the cattlemen as agricultural producers and business managers rather than as romantic self reliant giants of the earth Taking issue with the popular myth that cattlemen were and are ruggedly individualistic and disdainful of outside help Wood discusses the cattlemen's repeated demands for aid especially during the 1930s Included in the book is the history of the Kansas Livestock Association which the author credits as being one of the most significant stock associations in the West during this century Wood sets the KLA's growth within the context of the larger organizational revolution in the nation's business world A concluding chapter surveys major developments after World War II including the development of feedlots and irrigation the new cross breeding decentralization of packers and the

advent of trucking to replace railroads There has been scant information on these topics in the general literature of the Great Plains

**Machines of Animals** Neal A. Knapp,2023-05-09 How the Chicago International Livestock Exposition leveraged the eugenics movement to transform animals into machines and industrialize American agriculture In 1900 the Chicago International Livestock Exposition became the epicenter of agricultural reform that focused on reinventing animals bodies to fit a modern industrial design Chicago meatpackers partnered with land grant university professors to create the International a spectacle on the scale of a world's fair with the intention of setting the standard for animal quality and in doing so transformed American agriculture In Making Machines of Animals Neal A Knapp explains the motivations of both the meatpackers and the professors describing how they deployed the International to redefine animality itself Both professors and packers hoped to replace so called scrub livestock with improved animals and created a new taxonomy of animal quality based on the burgeoning eugenics movement The International created novel definitions of animal superiority and codified new norms resulting in a dramatic shift in animal weight body size and market age These changes transformed the animals from multipurpose to single purpose products These standardized animals and their dependence on off the farm inputs and exchanges limited farmers choices regarding husbandry and marketing ultimately undermining any goals for balanced farming or the maintenance and regeneration of soil fertility Drawing on land grant university research and publications meatpacker records and propaganda and newspaper and agricultural journal articles Knapp critiques the supposed market oriented efficiency driven industrial reforms proffered by the International which were underpinned by irrational racist ideologies The livestock reform movement not only resulted in cruel and violent outcomes for animals but also led to twentieth century crops and animal husbandry that were rife with inefficiencies and agricultural vulnerabilities
