Motherhood and Postnatal Depression Carolyn Westall, Pranee Liamputtong, 2011-07-21 Globally postnatal depression PND is a growing public health problem PND affects 10 to 15% of women in Western society It caused by a combination of biological psychological and social factors Two models have attempted to define and explain PND the biomedical and the sociological models The traditional biomedical model views PND as a medical condition which implies there is individual pathology and abnormality Whilst the biomedical model has been the dominant model in treating PND it has been criticized by feminist sociologists and psychologists for its rigidity in defining and explaining PND In contrast the psychosocial model of health acknowledges the biological factors that impact on emotional well being but places more emphasis on the personal and social factors that impact on emotional well being but places more emphasis on the personal and social factors that contribute to depressive symptoms such as gender poverty social disadvantage and social class The central argument

throughout this book is the importance of support before and after the birth for women's emotional well-being. This book will also include women's journeys through pregnancy, childbirth, motherhood, postnatal depression and resolution. To date, literature has focused on women's lived experiences of PND rather than their personal journeys through pregnancy, childbirth and early motherhood. Additionally, the adjustment to fatherhood has received less attention. For example, little is known about the impact of postnatal depression on the partner, what support partners offer when women with the intention to fill the gap in knowledge of cultural and social issues relating to pregnancy, childbirth and motherhood for women who were diagnosed with and had resolved PND.

Cognition and Emotion Consultant Clinical Psychologist Mick Power, Mick Power, Tim Dalgleish, 2007-11-21. The relationship between thinking and feeling has puzzled philosophers for centuries but more recently has become a dominant focus in psychology and in the brain sciences. This second edition of the highly praised *Cognition and Emotion* examines everything from past philosophical to current psychological perspectives in order to offer a novel understanding of both normal emotional experience and the emotional disorders. The authors integrate work on normal emotions with work on the emotional disorders. Although there are many influential theories of normal emotions within the cognition and emotion literature, these theories rarely address the issue of disordered emotions. Similarly, there are numerous theories that seek to explain one or more emotional disorders, e.g. depression, post-traumatic stress disorder and phobias, but which rarely discuss normal emotions. The present book draws these separate strands together and introduces a theoretical framework that can be applied to both normal and disordered emotions. It also provides a core cognition and emotion textbook through the inclusion of a comprehensive review of the basic literature. The book includes chapters on the historical background and philosophy of emotion, reviews the main theories of normal emotions and of emotional disorders, and includes separate chapters organised around the five basic emotions of fear, sadness, anger, disgust and happiness. *Cognition and Emotion: From Order to Disorder* provides both an advanced textbook for undergraduate and postgraduate courses in addition to a novel approach with a range of implications for clinical practice for work with the emotional disorders.

The new edition includes a focus on the psychosocial perspective with three new chapters on Cognitive behavioural approaches, Attachment theory and psychoanalytic social work, Ecological approaches. Each chapter allows the reader to relate the theories and methods discussed to their own personal experiences. This reader-friendly book includes student questions, glossaries and recommended reading so that students and practitioners can reappraise and expand the knowledge they have learned.
