Debating Climate Change Elizabeth L Malone, 2009-12-01 As greenhouse gas emissions continue unabated and contentious voices fill the air the question gains urgency How can people with widely varying viewpoints agree to address climate change Each participant in the debate seems to have a different agenda from protecting economic growth in developing countries to protecting the energy industry in industrialized countries from those aghast at the damage done to the Earth to optimists who think we just need to adjust our technological approach Debating Climate Change sorts through the tangle of arguments surrounding climate change to find paths to unexpected sites of agreement Using an innovative sociological approach combined discourse and social network analyses Elizabeth L Malone analyzes 100 documents representing a range of players in this high stakes debate Through this she shows how even the most implacable adversaries can find common ground and how this common ground can be used to build agreement Written in a clear accessible style this original research and insightful use of communication analysis will help advance understanding and negotiation on climate change throughout the pivotal times to come Published with Science in Society

Nursing Practice, Policy and Change

Marjorie Gott, 2018-10-08 Many drugs requiring intravenous infusion are used in situations where precise and rapid administration are essential. A simple miscalculation can easily lead to a massive error in dose administration with disastrous medical consequences. This is the living nightmare of every sleep-deprived junior doctor. *Intravenous Infusions: A Guide To Their Calculation* contains the vital information which doctors, nurses, and pharmacists need on those occasions demanding quick decisions. It could save lives. Globalization and Development Don Kalb, Wil Pansters, Hans Siebers, 2004-06-24 This book is a collective effort by researchers affiliated with the CERES Research School in Development Studies in the Netherlands. These experts discuss themes and concepts crucial to the overlapping fields of globalization and development research. Individual chapters examine the notions and issues of globalization, livelihood, identity, governance, transnationalism, and knowledge. *Routledge Handbook of Social Futures* Carlos López Galviz, Emily Spiers, 2021-11-22 Featuring chapters from an international range of leading and emerging scholars, this Handbook provides a collection of cutting-edge interdisciplinary research that sheds new light on contemporary futures studies. Engaging with key defining questions of the early twenty-first century such as climate change, big data, AI, the future of economics, education, mental health, cities, and more, the Handbook provides a review and synthesis of futures scholarship, highlighting the role that societies can and should play in their making. While the various chapters demonstrate how futures emerge and take shape in particular places at particular times, the distinctive insight provided by the volume overall is that futures thinking today must be social and contextual. By presenting a range of futures work from contexts around the globe, the Handbook contextualizes techniques, forecasting, backcasting, scenario planning, collaboration, and co-production to ask how different dimensions of the social are created and circulated in the process. Through its thirty chapters, the volume explores and interrogates narratives, anticipations, enactments, ecologies, collaborations, prospectations, and so on to highlight which versions of the social are legitimized and which are encouraged and foreclosed. This Handbook opens an important conversation about the centrality of the social in futures thinking. By bringing arts, humanities, and social sciences scholars and practitioners into conversation with biologists, environmental climate, and computer scientists, this volume seeks to encourage new pathways across between and within multiple disciplines to interrogate the futures we need and want. The social must be our starting point if we are to steer our planet in a direction that supports good lives for the many everywhere. *Long-range Futures Research* Robert H. Samet, 2009-03-24 This highly readable study explains how complexity science provides an evolutionary model for the civil system with a new world view that out-ranges United Nations reference scenarios to beyond 2150. **Negotiating Statehood** Tobias Hagmann, Didier Péclard, 2011-10-04 *Negotiating Statehood: Dynamics of Power and Domination in Africa* provides a conceptual framework for analysing dynamic processes of state-making in Africa. Features a conceptual framework which provides a method for analysing the everyday making, contestation, and negotiation of statehood in contemporary Africa. Conceptualizes who negotiates statehood, the actors, resources, and repertoires where these negotiation processes take

place and what these processes are all about includes a collection of essays that provides empirical and analytical insights into these processes in eight different country studies in Africa. Critically reflects on the negotiability of statehood in Africa

Sanctuaries of the City Anni Greve, 2016-04-01 This book proposes that we can learn from Tokyo about the intrinsic importance of in-between realms to an international culture the sanctuaries. It argues that certain urban societies are more robust than others because they offer socio-spatial capacities that enable the development of skills for coping with modern forms of living. It studies places that may open the way to an international culture namely market places venues for performing arts and religious sites which with particular reference to the Durkheimian tradition are considered here in their quality as sanctuaries. From its empirical analysis of such sanctuaries in Tokyo this book develops a more general theory about mega-cities urban sociability and identity

Global Nation? John Wiseman, 1998-11-13 Globalisation was one of the most ubiquitous buzzwords of the late twentieth century yet its meaning was often elusive. Retrenchments trade alliances global warming currency devaluations and so on are often explained as unavoidable consequences of globalisation and even everyday things from the food we eat to the television we watch and the clothes we wear are apparently impacted upon by globalisation. This 1998 book provides an accessible exploration of the meanings and implications of globalisation. The discussion is carefully grounded in the changing social economic ecological and political relationships of Australia. Global Nation also looks at a range of existing and potential responses to the globalisation process arguing that there may be alternatives even though we are increasingly told that there are not

Transition and Justice Gerhard Anders, Olaf Zenker, 2014-12-03 Transition and Justice examines a series of cases from across the African continent where peaceful new beginnings were declared after periods of violence and where transitional justice institutions helped define justice and the new socio-political order. Offers a new perspective on transition and justice in Africa transcending the institutional limits of transitional justice. Covers a wide range of situations and presents a broad range of sites where past injustices are addressed. Examines cases where peaceful new beginnings have been declared after periods of violence. Addresses fundamental questions about transitions and justice in societies characterized by a high degree of external involvement and internal fragmentation

Future Cities Nick Dunn, Paul Cureton, 2020-12-10 What might our cities look like in ten twenty or fifty years? How may future cities face global challenges? Imagining the city of the future has long been an inspiration for many architects artists and designers. This book examines how cities of the future have been visualised what these projects sought to communicate and what the implications may be for us now. It provides a visual history of the future and explores the relationships between different visualisation techniques and ideologies for cities. Thinking about what futures are who they are for why they are desirable and how and when they are to be brought into being is central to this book. Through visualisation we are able to experiment in ways that would be impractical and potentially hazardous in the real world and this book therefore aims to contribute toward a better understanding of the power and agency of visualisations for future cities. In

this lavishly illustrated text the authors apply several critical lenses to consider the subject in different ways technological futures social futures and global futures providing a comprehensive survey and analysis of visions for future cities and engaging creatively with how we perceive tomorrow s world and future studies more widely

Rebuilding Communities in an Age of Individualism Paul Hopper,2017-07-05 As modern societies become increasingly individualistic this fascinating book examines how we can maintain and revive local communities and community life It demonstrates how the major developments and processes of our time notably globalization post industrialism and de traditionalization contribute to this individualism to the detriment of community life The author examines how community is a necessary and important component of human life and discusses possible ways in which to arrest its decline In this regard strategies geared to fostering trust and social capital are outlined as the basis for reinvigorating community life The volume provides a coherent and distinct analysis of community as well as offering concrete policy prescriptions to counter the excessive individualism of our times In both the nature and scope of its analysis it offers a unique contribution to an extremely important issue in the contemporary period one that increasingly preoccupies politicians academics and ordinary citizens

Rule and Rupture Christian Lund,Michael Eilenberg,2017-07-11 Rule and Rupture State Formation Through the Production of Property and Citizenship examines the ways in which political authority is defined and created by the rights of community membership and access to resources Combines the latest theory on property rights and citizenship with extensive fieldwork to provide a more complex nuanced assessment of political states commonly viewed as weak fragile and failed Contains ten case studies taken from post colonial settings around the world including Cambodia Nepal Indonesia Afghanistan Rwanda Somalia Democratic Republic of Congo Colombia and Bolivia Characterizes the results of societal ruptures into three types of outcomes for political power reconstituted and consolidated challenged and fragmented Brings together exciting insights from a global group of scholars in the fields of political science development studies and geography

Virtualism James G. Carrier,Daniel Miller,2020-08-25 We live in a time of economic virtualism whereby our lives are made to conform to the virtual reality of economic thought Globalization transnational capitalism structural adjustment programmes and the decay of welfare are all signs of the growing power of economics one of the most potent forces of recent decades In the last thirty years economics has ceased to be just an academic discipline concerned with the study of economy and has come to be the only legitimate way to think about all aspects of society and how we order our lives Economic models are no longer measured against the world they seek to describe but instead the world is measured against them found wanting and made to conform This profound and dangerous change in the power of abstract economics to shape the lives of people in rich and poor countries alike is the subject of this interdisciplinary study Contributors show how economics has come to portray a virtual reality a world that seems real but is merely a reflection of a neo classical model and how governments the World Bank and the IMF combine to stamp the world with a virtual image that condemns as irrational our local social and cultural arrangements

Further it is argued that virtualism represents the worrying emergence of new forms of abstraction in the political economy of which economics is just one example

Enjoying the Beat of Appearance: An Psychological Symphony within **Social Futures Global Visions Development Change**

In some sort of eaten by screens and the ceaseless chatter of quick transmission, the melodic beauty and mental symphony produced by the written word frequently fade in to the background, eclipsed by the relentless sound and interruptions that permeate our lives. However, set within the pages of **Social Futures Global Visions Development Change** a marvelous literary treasure filled with organic thoughts, lies an immersive symphony waiting to be embraced. Crafted by an elegant musician of language, that charming masterpiece conducts visitors on a mental trip, skillfully unraveling the concealed melodies and profound influence resonating within each cautiously crafted phrase. Within the depths of this moving analysis, we can discover the book is key harmonies, analyze its enthralling publishing design, and surrender ourselves to the profound resonance that echoes in the depths of readers souls.
