Overcoming Unintentional Racism in Counseling and Therapy Charles R. Ridley, 2005-03-16 Overcoming Unintentional Racism in Counseling and Therapy, Second Edition, examines the dynamics and effects of racism in counseling with an emphasis on the insidiousness of unintentional racism. The Second Edition provides a new section on the policies and practices of agencies and other institutions in the mental health system unintentionally resulting in service disparities. Macro system and micro system interventions are proposed to overcome these disparities.

Cases on Trauma-Informed Gatekeeping in Counselor Education Hurlless, Nikki, Davis, Leslie E., 2024-12-05 Gatekeeping in the counseling profession is a critical responsibility balancing the need to uphold ethical standards while showing compassion and understanding. It involves complex decision making often without clear guidelines which can lead to uncertainty and stress for those in gatekeeping roles. Adopting a trauma-informed approach adds valuable context helping gatekeepers navigate the process with greater empathy and awareness of the broader implications. Evidence-based practices not only enhance the effectiveness of gatekeeping but also support the well-being of both gatekeepers and those they evaluate. Strengthening gatekeeping processes is essential for maintaining professional integrity, safeguarding client welfare, and fostering a healthy counseling community. Cases on Trauma-Informed Gatekeeping in Counselor Education focuses on gatekeeping from a trauma-informed lens and helps readers consider multiple contextual layers of the process and outcomes of this work. It compiles relevant theoretical considerations, practical applications, empirical findings, and case illustrations of scenarios related to professional gatekeeping processes through a trauma-informed lens. Covering topics such as decision making, neurodiversity, and supervision, this book is an excellent resource for counselor educators, field supervisors, doctoral students, and more.

The Integral Intake Andre Marquis, 2012-05-22 Using formal assessment instruments in counseling and psychotherapy is an efficient and systematic way to obtain information about clients and to subsequently tailor a counseling approach most likely to serve clients optimally. The more information a counselor obtains during the initial interview and first sessions, the more likely the client will be deeply understood by the counselor, which in turn increases the likelihood that an appropriate course of counseling will be taken and ultimately leading to a more successful outcome. The Integral Intake is an idiographic, biographical, multidimensional assessment instrument based upon the Integral Psychology pioneered by Ken Wilber. From the perspective of Integral theory, comprehensive and holistic conceptualization of clients seeking counseling and psychotherapy includes knowledge of four distinct perspectives: quadrants of each client, the client's experience, the individual viewed subjectively,

from within the client's behavior the client viewed objectively from without the client's culture the client's system viewed subjectively from within and the client's social system the client's system viewed objectively from without The intake form is designed to provide the practitioner with a range of background information that can then be used to more quickly and effectively formulate a counseling treatment approach The assessment form and accompanying materials will be included on a downloadable resource formatted to be printed and reproduced for use with each new client The book will provide an overview of the Integral Psychology model describe the development of the assessment form and its use and provide general guidelines for the evaluation of responses and planning for an appropriate counseling approach A series of case examples based on actual completed intake forms will provide insight into the use of the Integral Intake
