The Culture Of Conformism Understanding Social Consent:

The Culture of Conformism Patrick Colm Hogan, 2001-04-17 Discusses the psychoanalytic concept of consent the reasons behind it and its effects on power and society How Consumer Culture Controls Our Kids Jennifer Hill, 2015-11-02 This gripping book considers the history techniques and goals of child targeted consumer campaigns and examines children's changing perceptions of what commodities they need to be valued and value themselves In this critique of America's consumption based society author Jennifer Hill chronicles the impact of consumer culture on children from the evolution of childhood play to a child's self perception as a consumer to the consequences of this generation's repeated media exposure to violence Hill proposes that corporations eager to tap into a multibillion dollar market use the power of advertising and the media to mold children's thoughts and behaviors The book features vignettes with teenagers explaining in their own words how advertising determines their needs wants and self esteem An in depth analysis of this research reveals the influence of media on a young person's desire to conform shows how broadcasted depictions of beauty distort the identities of children and teens and uncovers corporate agendas for manipulating behavior in the younger generation The work concludes with the position that corporations are shaping children to be efficient consumers but in return are harming their developing young minds and physical well being *From Starship Captains to Galactic Rebels* Kimberly Yost, 2013-12-12 Real world leaders hold the fates of companies armies and nations in their hands but the leaders portrayed in science fiction play for larger stakes Their decisions determine the survival of species planets or reality itself They tend therefore to be larger than life characters like Doc Savage Obi Wan Kenobi and Captain James T Kirk In *From Starship Captains to Galactic Rebels* Kimberley Yost brings the principles of leadership studies to bear on characters from a quarter century of classic science fiction television series examining how their adventures can illuminate the challenges of real world leadership These in depth case studies cover a full range of science fictional leaders from conventional heroes such as Jonathan Archer of *Star Trek Enterprise* to William Adama and Laura Roslin the dark conflicted protagonists of *Battlestar Galactica* Charismatic rebels like Malcolm Reynolds of *Firefly* and the ragtag fugitives of *Farscape* stand alongside pillars of the establishment like John Sheridan of *Babylon 5* In her analysis Yost considers emerging flawed and failed leaders as well as successful ones women as well as men and aliens as well as humans An insightful examination of how leadership is represented on the small screen *From Starship Captains to Galactic Rebels* will appeal not only to fans of televised science fiction but also to those grappling with the problems of leadership regardless of their species **Confessions and Declarations of Multicolored Men** Frederick Douglass Alcorn, 2020-10-06 This book is a culturally situated study of the experiences and perspective garnered from a group of post secondary Black African American bi multi racial male students aged 19-37 The undergirding interest was to see if there was an awareness of the group's manly inclinations tendencies and predispositions and understand how such awareness projects and influences their quest and discipline for learning and to academically achieve The sociological

construct of habitus as conveyor of dispositions inclinations and tendencies provides an analytical framework permitting an appreciation of interactions between personal identity social belonging and approaches to learning and education The result is an original and powerful account of the ways in which unspoken dominant mainstream intergroup cultural relationships involving social political attitudes decision making and behavioral reactions and responses interact with internalized self in group or in ascription with group oppression repression intellectual cognitive physical strategies determination and work that have brought men of Black African American bi multi racial descent in the U S to their current social position Unlike some public discourse in U S society this is not a blame game nor is it one of relinquishing self or group responsibility but one based upon and motivated by a deeper understanding of complex facts The prose can be best described as an ethnographical narrative synthesizing a wealth of original observations with insights from scholarly and popular literature and media Its original and engaging style may appeal to a broad audience including postsecondary educators and students researchers studying the sociology of gender African American identity intercultural relational communications student services social work and social psychology as well as mental and physical healthcare practitioners

What is Colonialism?

Patrick Colm Hogan, 2023-11-30 What is Colonialism develops a clear and rigorous account of what colonialism is and how it works It draws on and synthesizes recent work in cognitive science affective science and social psychology along with Marxism and related forms of analysis Hogan begins with some fundamental conceptual distinctions such as the degree to which a group shares beliefs dispositions and skills versus the degree to which they share identification with a category Building on these distinctions he defines colonialism in terms of political economic and cultural autonomy clarifying the nature of culture and autonomy particularly He goes on to articulate an invaluable systematic account of the varieties of colonialism The final chapters outline the motives of imperialists differentiating these from their ideological rationalizations and sketching the harms caused by colonialism The book concludes by considering when or if one can achieve a genuinely postcolonial condition Hogan illustrates these analyses by examining influential literary works by European writers such as Joseph Conrad and by non Europeans such as Athol Fugard Kamala Markandaya and Wole Soyinka This accessible and informative volume is the ideal resource for students and scholars interested in colonialism and empire

Global Easts Jie-Hyun Lim, 2022-07-05 South Korean historian Jie Hyun Lim raised under an

anticommunist dictatorship turned to Marxian thought to explain his country's development even as he came to struggle with its Eurocentrism. As a transnational scholar working in postcommunist Poland, Lim recognized striking similarities between Korean and Polish history and politics. One realization stood out: Both Korea and Poland at once the West for Asia yet Eastern Europe had been assigned the role of East. This book explores entangled Easts to reconsider global history from the margins. Examining the politics of history and memory, Lim reveals the affinities linking Eastern Europe and East Asia. He draws out commonalities in their experiences of modernity in their transitions from dictatorship to democracy and in the shaping of collective memory. Ranging across Poland, Germany, Israel, Japan, and Korea, Lim traces the global history of how notions of victimhood have become central to nationalism. He criticizes mass dictatorships of right and left in the Global Easts, considering Nazi jurist Carl Schmitt's notion of sovereign dictatorship and the concept of decisionist democracy. Lim argues that nationalism is inherently transnational, critiquing how the nationalist imagination of the Global East has influenced countries across borders. Theoretically sophisticated and conceptually innovative, this book sheds new light on the transnational complexity of historical memory and imagination, the boundaries between democracy and mass dictatorship, and the fluidity of East and West.

The Mind and its Stories Patrick Colm Hogan, 2003-09-29 There are profound, extensive, and surprising universals in literature which are bound up with universals in emotion. Hogan maintains that debates over the cultural specificity of emotion are misdirected because they have ignored a vast body of data that bear directly on the way different cultures imagine and experience emotion in literature. This is the first empirically and cognitively based discussion of narrative universals. Professor Hogan argues that to a remarkable degree the stories people admire in different cultures follow a limited number of patterns and that these patterns are determined by cross-culturally constant ideas about emotion. In formulating his argument, Professor Hogan draws on his extensive reading in world literature, experimental research treating emotion and emotion concepts, and methodological principles from the contemporary linguistics and the philosophy of science. He concludes with a discussion of the relations among narrative, emotion concepts, and the biological and social components of emotion.

Narrative Beginnings Brian Richardson, 2008-12-01 George Eliot wrote that man cannot do without the make-believe of a beginning. *Beginnings* it turns out can be quite unusual, complex, and deceptive. The first major volume to focus on this critical but neglected topic, this collection brings together theoretical studies and critical analyses of beginnings in a wide range of narrative works spanning several centuries and genres. The international and interdisciplinary scope of these essays represents every major theoretical perspective, including feminist, cognitive, postcolonial, postmodern, rhetorical, ethnic, narratological, and hypertextual.

Ethical Sense and Literary Significance Donald R. Wehrs, 2023-07-31 This study blends together ethical philosophy, neurocognitive evolutionary studies, and literary theory to explore how imaginative discourse addresses a distinctively human deep sociality and by doing so helps shape cultural and literary history. Deep sociality arising from an improbable evolutionary history both entwines and leaves non-reconciled what is felt to be

significant for us and what ethical sense seems to call us to acknowledge as significant independent of ourselves Ethical Sense and Literary Significance connects literary and cultural history without reducing the literary to a mere expression of something else It argues that affective differences between non egocentric and egocentric registers of significance are integral to the bioculturally evolved deep sociality that verbal art addresses often in unsettling and socially critical ways Much imaginative discourse in early societies as well as recent ones brings ethical sense and literary significance together in ways that reveal their intricate but non harmonized internal entwinement Drawing on contemporary scholarship in the humanities and sciences Donald R Wehrs explores the implications of interdisciplinary approaches to topics central to a wide range of fields beyond literary studies including neuroscience anthropology phenomenological philosophy comparative history and social psychology American Literature and American Identity Patrick Colm Hogan,2021-11-10 In recent years cognitive and affective science have become increasingly important for interpretation and explanation in the social sciences and humanities However little of this work has addressed American literature and virtually none has treated national identity formation in influential works since the Civil War In this book Hogan develops his earlier cognitive and affective analyses of national identity further exploring the ways in which such identity is integrated with cross culturally recurring patterns in story structure Hogan examines how authors imagined American identity understood as universal democratic egalitarianism in the face of the nation s clear and often brutal inequalities of race sex and sexuality exploring the complex and often ambivalent treatment of American identity in works by Charlotte Perkins Gilman Eugene O Neill Lillian Hellman Djuna Barnes Amiri Baraka Margaret Atwood N Scott Momaday Spike Lee Leslie Marmon Silko Tony Kushner and Heidi Schreck

Civil Disobedience Lawrence Quill,2009-03-26 What role might civil disobedience play in the politics of representative democracies as power leaks from the nation state If traditional politics has surrendered to the interests of global corporations what are the consequences Quill proposes a reappraisal of civil disobedience and civil obedience in order to address these and other questions Empire and Poetic Voice Patrick Colm Hogan,2012-02-01 In *Empire and Poetic Voice* Patrick Colm Hogan draws on a broad and detailed knowledge of Indian African and European literary cultures to explore the way colonized writers respond to the subtle and contradictory pressures of both metropolitan and indigenous traditions He examines the work of two influential theorists of identity Judith Butler and Homi Bhabha and presents a revised evaluation of the important Nigerian critics Chinweizu Jemie and Madubuike In the process he presents a novel theory of literary identity based equally on recent work in cognitive science and culture studies This theory argues that literary and cultural traditions like languages are entirely personal and only appear to be a matter of groups due to our assertions of categorical identity which are ultimately both false and dangerous *The Palgrave Handbook of Affect Studies and Textual Criticism* Donald R. Wehrs,Thomas Blake,2017-12-01 This volume provides a comprehensive account of how scholarship on affect and scholarship on texts have come to inform one another over the past few decades The result has been that explorations of how texts

address elicit shape and dramatize affect have become central to contemporary work in literary film and art criticism as well as in critical theory rhetoric performance studies and aesthetics Guiding readers to the variety of topics themes interdisciplinary dialogues and sub disciplinary specialties that the study of interplay between affect and texts has either inaugurated or revitalized the handbook showcases and engages the diversity of scholarly topics approaches and projects that thinking of affect in relation to texts and related media open up or enable These include but are not limited to investigations of what attention to affect brings to established methods of studying texts in terms of period genre cultural contexts rhetoric and individual authorship

Affective Narratology Patrick Colm Hogan, 2011-11-01 Stories engage our emotions We've known this at least since the days of Plato and Aristotle What this book helps us to understand now is how our own emotions fundamentally organize and orient stories In light of recent cognitive research and wide reading in different narrative traditions Patrick Colm Hogan argues that the structure of stories is a systematic product of human emotion systems Examining the ways in which incidents events episodes plots and genres are a function of emotional processes he demonstrates that emotion systems are absolutely crucial for understanding stories Hogan also makes a case for the potentially integral role that stories play in the development of our emotional lives He provides an in depth account of the function of emotion within story in widespread genres with romantic heroic and sacrificial structures and more limited genres treating parent child separation sexual pursuit criminality and revenge as these appear in a variety of cross cultural traditions In the course of the book Hogan develops interpretations of works ranging from Tolstoy's Anna Karenina to African oral epics from Sanskrit comedy to Shakespearean tragedy Integrating the latest research in affective science with narratology this book provides a powerful explanatory account of narrative organization

Sexual Identities Patrick Colm Hogan, 2018 Patrick Colm Hogan a leading theorist of cognitive cultural studies offers the first cognitive cultural study of identity in sex sexuality and gender With precise conceptual distinctions wide ranging citation of empirical research and careful explication of diverse literary works Hogan defends a systematic skepticism about gender differences and a view of sexuality as evolved but also contingent and variable

For the Souls of Black Folks Cari Jackson,2013-05-21 For the Souls of Black Folks examines the impact of black religious culture in shaping the ethical values and sociopolitical condition of U S blacks The book reviews the nexus of theological traditions and historical factors that have formed black churches as environments where preachers serve as the moral compass for black churchgoers For the Souls of Black Folks builds upon the work of sociologist W E B Du Bois who highlighted the presence of a double consciousness in the collective psyche of blacks stemming from racial oppression The book explores the ways in which that double consciousness often reflected in black preaching socializes black Christians to subjugate their own moral authority to that of black preachers The central argument is that this socialization to submit to preachers greatly underserves black churchgoers in developing and exercising their own power and authority as social agents and thus significantly impedes the full sociopolitical liberation of all blacks The book offers important new preaching strategies that more effectively facilitate the empowerment of blacks as critical agents of social transformation and healing in the twenty first century
