Life-span Development Leonie Sugarman, 2004-03-01 This thorough revision of the highly successful first edition of Life Span Development offers the reader a wide ranging and thought provoking account of human development throughout the lifespan The lifespan approach emphasises that development does not stop when we cease to be adolescents but goes on throughout adulthood and into old age In initial chapters Leonie Sugarman outlines the issues surrounding the notion of development and how it can be studied including reviews of the work of key theorists Erikson Levinson and Gould She goes on to consider the different ways in which the life course can be construed as a series of age related stages as a cumulative

sequence as a series of developmental tasks as a series of key life events and transitions or as a narrative construction which creates a sense of dynamic continuity A final chapter looks at how people cope the resources that are available and the theoretical and practical issues regarding interventions to assist them in the process New to this edition is increased coverage of the topical issue of successful ageing and a new chapter on the increasingly popular narrative approach to lifespan development This edition is also more student friendly with exercises in self reflection that encourage the reader to look at the development of their own lives or those of their current or future clients Boxed material highlighting major theories and clarifying concepts is also included This book will be invaluable for students of developmental and occupational psychology and professionals in the fields of health management education and social work

Handbook of Adult Development Jack Demick, Carrie Andreoletti, 2012-12-06 This volume is an outgrowth of contemporary research on development over the adult lifespan which by now has burgeoned and developed both nationally and internationally However for us the impetus to be involved in this area was spawned and nurtured by our initial association with the Society for Research in Adult Development SRAD with its origins some 15 years ago by Michael Commons and his associates in Cambridge Massachusetts Through the good will and support of this society we also became and are still heavily involved with the Journal of Adult Development and the Kluwer Plenum Monograph Series on Adult Development and Aging of which this volume is a companion Many of the contributions in the volume are from SRAD members who consistently adhere to a focus on positive adult development Their chapters have been complemented by pieces from other researchers who have adopted more mainstream approaches to adult development and aging Regardless of the particular approach and or focus of the chapter all the work reported herein supports the relatively recent idea that development is not restricted to children and adolescents but continues throughout the adult lifespan in ways that we never envisioned some 20 years ago Thus the volume represents state of the art theory research and practice on adult development which has the potential to occupy us all for some time to come

Concept Development in the Secondary School Peter Langford, 2016-03-10 Originally published in 1987 this book introduces the reader to work on the intellectual development of adolescents relevant to the secondary school teacher It covers the teaching of English history geography economics politics

legal studies physics chemistry biology and mathematics Although it emphasises the continuing importance of Piaget's thought the book aims to introduce readers to the non Piagetian research that had taken place in recent years The Philosophical Foundations of Ecological Civilization Arran Gare, 2016-08-05 The global ecological crisis is the greatest challenge humanity has ever had to confront and humanity is failing The triumph of the neo liberal agenda together with a debauched scientism has reduced nature and people to nothing but raw materials instruments and consumers to be efficiently managed in a global market dominated by corporate managers media moguls and technocrats The arts and the humanities have been devalued genuine science has been crippled and the quest for autonomy and democracy undermined The resultant trajectory towards global ecological destruction appears inexorable and neither governments nor environmental movements have significantly altered this or indeed seem able to The Philosophical Foundations of Ecological Civilization is a wide ranging and scholarly analysis of this failure This book reframes the dynamics of the debate beyond the discourses of economics politics and techno science Reviving natural philosophy to align science with the humanities it offers the categories required to reform our modes of existence and our institutions so that we augment rather than undermine the life of the ecosystems of which we are part From this philosophical foundation the author puts forth a manifesto for transforming our culture into one which could provide an effective global environmental movement and provide the foundations for a global ecological civilization

Education for Adults Malcolm Tight, 2014-06-17 The nature of adult education at individual group and community levels is the concern of this book Definitions and patterns of adult learning are critically assessed in both this country and abroad and the processes involved considered in detail Both case studies and thematic articles have been included and are selected to illustrate the breadth of the field along a number of areas formal non formal and informal education face to face and distance education from basic levels of education to higher education from highly deterministic to more open or self directed forms of education It is felt that the study and practice of the education of adults can be best advanced by the adoption of such a broad view
