Social Decision Methodology For Technological Projects:

Social Decision Methodology for Technological Projects C.A. Vlek, G. Cvetkovich, 2012-12-06 This book grew out of the conviction that the preparation and management of large scale technological projects can be substantially improved We have witnessed the often unhappy course of societal and political decision making concerning projects such as hazardous chemical installations novel types of electric power plant or storage sites for solid wastes This has led us to believe that probabilistic risk analysis technical reliability analysis and environmental impact analysis are necessary but insufficient for making acceptable and justifiable social decisions about such projects There is more to socio technical decision making than applying acceptance rules based on negligibly low accident probabilities or on maximum credible accidents Consideration must also be given to psychological social and political issues and methods of decision making Our conviction initially gave rise to an international experts workshop titled Social decision methodology for technological projects SDMTTP and held in May 1986 at the University of Groningen the Netherlands at a time when Cvetkovich spent a sabbatical there The work shop aimed at surveying the issues and listing the methods to address them was the first part of an effort whose second part was directed at the production of this volume Plans called for the book to deal systematically with the main problems of socio technical decision making it was to list a number of useful approaches and methods and it was to present a number of integrative conclusions and recommendations for both policy makers and methodologists *The Science of Public Policy* Tadao

Handbook of Democratic Innovation and Governance Stephen Elstub, Oliver Escobar, 2019-12-27 Democratic innovations are proliferating in politics governance policy and public administration These new processes of public participation are reimagining the relationship between citizens and institutions This Handbook advances understanding of democratic innovations in theory and practice by critically reviewing their importance throughout the world The overarching themes are a focus on citizens and their relationship to these innovations and the resulting effects on political equality The Handbook therefore offers a definitive overview of existing research on democratic innovations while also setting the agenda for future

research and practice Exploring Risk Communication J.M. Gutteling, O. Wiegman, 2013-03-09 Exploring Risk Communication presents a systematic planning approach to risk communication Risk communication is seen by many as an important tool for managing technological environmental and natural risks The book's goal is to improve risk communication processes in these areas between private and public risk communication sources and the public The systematic planning approach focuses on research activities which are considered to be diagnostic tools providing insight into the public's reactions to risks and into the public's cognitive abilities to process risk information These studies give us the necessary ingredients for an adequate risk communication from the audience side of the risk communication process Evaluation studies are considered necessary to monitor the effectiveness of the communication Exploring Risk Communication provides a review of current research in risk communication focusing on perceived trust and credibility of risk communication sources and arguments in risk messages risk comparison and framing of risk Special attention is paid to the mass media context of risks and its impact on public perception Finally the potential of the new interactive media for risk communication is reviewed The authors have performed several communication studies in the risk area working from their social psychological background This results in a monograph interesting to those working on risk communication issues on an academic level but the systematic planning approach is also a useful frame of reference for risk communication practitioners or for those who are just interested in the often complex risk communication issues **Governing Sustainability** W. Neil Adger, Andrew Jordan, 2009-02-05 The crisis of unsustainability is above all else a crisis of governance The transition to a more sustainable world will inevitably require radical changes in the actions of all governments and it will call for significant changes to the lifestyles of individuals everywhere Bringing together some of the world's most highly regarded experts on governance and sustainable development this book examines these necessary processes and consequences across a range of sectors regions and other important areas of concern It reveals that the governance of sustainable development is politically contested and that it will continue to test existing governance systems to their limits As an assessment of existing policy practices it will be of great interest to all those who are preparing themselves or their organisations for the sustainability transition

Contaminated Soil '95 W.J. van den Brink, R. Bosman, F. Arendt, 2012-12-06 Towards sustainable land use Dr P Folstar Member of the TNO Board of Management Dr M Popp Chairman of the Board of Directors of Research Centre Karlsruhe FZK Ten years ago in 1985 TNO initiated the First Conference on Contaminated Soil in Utrecht At that time a rather complete inventory of suspected contaminated sites existed in The Netherlands Time had come to consider further actions for investigations evaluation and remediation This concern has been spreading ever since to other European countries and throughout the world In particular German scientists and authorities soon recognized the significance of this problem and consequently joined TNO in organizing and funding a forum for discussions in a series of conferences Following three venues in German cities the 5th conference in Maastricht a Dutch as well as a European city marks the increasing interest in the

international scientific and political community Application of the concept of sustainable development to soil as an essential element of human existence requires an answer to the question how to meet the needs of today's generation without impairing the possibilities of mankind in the future As we do not know the needs of the future especially regarding the functional requirements of soil use we can hardly do better than starting from the present priorities This can not mean to guarantee the quality of soil functions everywhere at any time

International Law, Human Rights and Public Opinion Heping Dang, 2017-03-16 This book explores situations in which public opinion presents itself as an obstacle to the protection and promotion of human rights Taking an international law perspective it primarily deals with two questions first whether international law requires States to take an independent stance on human rights issues second whether international law encourages States to inform and mobilise public opinion with regard to core human rights standards The discussion is mainly organised within the framework of the UN system The work is particularly relevant to situations in which public opinion appears as discriminatory attitudes based on race gender age health sexual orientation and other factors It is also pertinent to circumstances in which public opinion is responsible for the existence of certain harmful customs and practices such as female genital mutilation and capital punishment Noting that the death penalty is increasingly recognised as an infringement of human rights this study further challenges States argument that capital punishment cannot be abolished because of public opinion The book also discusses the role that education bears under international law in

moulding favourable attitudes towards human rights Finally the book challenges States acceptance that public opinion cannot be confronted in this respect Expertise and Decision Support F. Bolger,G. Wright,2007-08-19 This volume brings together a range of contributors from Europe and North America All contributions were especially commissioned with a view to e cidating a major multidisciplinary topic that is of concern to both academics and practitioners The focus of the book is on expert judgment and its interaction with decision support systems In the first part the nature of expertise is discussed and characteristics of expert judges are described Issues concerned with the eval tion of judgment in the psychological laboratory are assessed and contrasted with studies of expert judgment in ecologically valid contexts In addition issues concerned with eliciting and validating expert knowledge are discussed Dem strations of good judgmental performance are linked to situational factors such as feedback cycles and measurement of coherence and reliability in expert ju ment is introduced as a baseline determinant of good judgmental performance Issues concerned with the representation of elicited expert knowledge in kno edge based systems are evaluated and methods are described that have been shown to produce improvements in judgmental performance Behavioral and mathematical ways of combining judgments from multiple experts are compared and contrasted Finally the issues developed in the preceding contributions are focused on current controversies in decision support Expert judgment is utilized as a major input into decision analysis forecasting with statistical models and expert s tems **Reinventing Anarchy, Again** Howard J. Ehrlich,1996 This book brings together the major currents of social anarchist theory in a collection of some of the most important writers from the United States Canada England and Australia The book is organized into eight sections What is Anarchism The State and Social Organization Moving Toward Anarchist Society Anarcha feminism Work The Culture of Anarchy The Liberation of Self and finally Reinventing Anarchist Tactics

Knowledge, Power, and Participation in Environmental Policy Analysis Rob Hoppe,2018-01-16 This volume probes practical dilemmas and competing re search perspectives in environmental policy analysis Scholars working in different fields research traditions societies and policy domains offer significant insights into the processes and consequences of environmental policy making Part 1 Coping with Boundaries describes present day conflict between experts and greater public participation in environmental policy It shows that the institutionalization of increasingly complex environmental problems has led to a conflict between technocracy and democracy Part 2 The Transnational Challenge examines modes of cooperation between grassroots movements scientists and regional authorities in the United States and Canada These and other modes of cooperation laid the foundations for the Great Lakes Water Quality Agreement increased the effectiveness of air pollution treaties and increased climate change Part 3 Bio Hazards Policies and Paralysis deals with environmental prob lems closest to the everyday concerns of the public at large because they have immediate implications for food safety and other values Part 4 The Citizens Perspective focuses on citizen vis a vis environmental policy noting that in order to make policies work citizens must be willing and able to participate in policy making and cooperate in implementing environmental

choices Part 5 Confronting Ordinary and Expert Knowledge explores opportunities and constraints affecting public participation in evaluation of science Part 6 Developments in Research Programming addresses such questions as whether scientists still have opportunities to do the research they want without being interrupted or disturbed by policy makers and other stakeholders Part 7 Policy Sciences Aspirations explores different avenues for improving environmental policy Volume twelve in the PSRA series should inspire further investigations of the relations among knowledge power and participation in environmental policy It will be of timely interest to environmentalists policy makers scholars and the general public

Fairness and Competence in Citizen Participation Ortwin Renn, Thomas Wehler, Peter Wiedemann, 2013-12-01 Ortwin Renn Thomas Wehler Peter Wiedemann In late July of 1992 the small and remote mountain resort of Morschach in the Swiss Alps became a lively place of discussion debate and discourse Over a three day period twenty two analysts and practitioners of public participation from the United States and Europe came together to address one of the most pressing issues in contemporary environmental politics How can environmental policies be designed in a way that achieves both effective protection of nature and an adequate representation of public values In other words how can we make the environmental decision process competent and fair All the invited scholars from academia international research institutes and governmental agencies agreed on one fundamental principle For environmental policies to be effective and legitimate we need to involve the people who are or will be affected by the outcomes of these policies There is no technocratic solution to this problem Without public involvement environmental policies are doomed to fail The workshop was preceded by a joint effort by the three editors to develop a framework for evaluating different models of public participation in the environmental policy arena During a preliminary review of the literature we made four major observations These came to serve as the primary motivation for this book First the last decade has witnessed only a fair amount of interest within the sociological or political science communities in issues of public participation *Emerging Technologies* Gary E. Marchant, Wendell Wallach, 2020-07-26 Emerging technologies present a challenging but fascinating set of ethical legal and regulatory issues The articles selected for this volume provide a broad overview of the most influential historical and current thinking in this area and show that existing frameworks are often inadequate to address new technologies such as biotechnology nanotechnology synthetic biology and robotics and innovative new models are needed This collection brings together invaluable innovative and often complementary approaches for overcoming the unique challenges of emerging technology ethics and governance **Effective Risk Communication** Joseph Arvai, Louie Rivers III, 2013-10-30 There are two questions often asked of risk communication what has been learned from past work and what is needed to push the field forward Drawing on the experience of leading risk researchers and practitioners Effective Risk Communication focuses on answering these questions The book draws together new examples of research and practice from contexts as diverse as energy generation human health nuclear waste climate change food choice and social media This book treats risk

communication as much more than the interchange of risk information between experts and non experts rather it aims to emphasise the diversity in viewpoints and practices In each specially commissioned chapter the authors reflect on the theoretical and applied underpinnings of their best projects and comment on how their approach could be used effectively by others Building upon each other the chapters will provoke new discussion and action around a discipline which many feel is neither meeting important needs in practice nor living up to its potential in research Through a more careful examination of the work already done in risk communication the book will help develop better more reflective practice for the future

Flexibility in Global Climate Policy Tim Jackson, Stuart Parkinson, 2023-04-21 Since the adoption of the Kyoto Protocol to the United Nations Framework Convention on Climate Change in 1997 the negotiation of policy responses to climate change has become an area of major research This authoritative volume sets out the main debates and processes of joint implementation bilateral or multilateral investments in greenhouse gas emission reduction or sequestration and explores the issues involved in constructing an appropriate institutional framework It examines the key economic environmental social and ethical impacts and assesses the operational design of the flexibility mechanisms of joint implementation including emissions trading and the Clean Development Mechanism An approach is developed in which streamlined assessment procedures are combined with institutional safeguards in order to balance the demand for practical mechanisms with the environmental objectives of the Protocol The book provides detailed case studies of energy sector investment in Eastern European host countries

Negotiation Processes: Modeling Frameworks and Information Technology Melvin Shakun, 2012-12-06 This book focuses on negotiation processes and how negotiation modeling frameworks and information technology can support these A modeling framework for negotiation as a purposeful complex adaptive process is presented and computer implemented in the first three chapters Two game theoretic contributions use non cooperative games in extensive form and a computer implemented graph model for conflict resolution respectively Two chapters use the negotiators joint utility distribution to provide problem structure and computer support A chapter on cognitive support uses restructurable modeling as a framework One chapter matches information technologies with negotiation tasks Another develops computer support based on preference programming Two final chapters develop a stakeholder approach to support system evaluation and a research framework for them respectively Negotiation Processes Modeling Frameworks and Information Technology will be of interest to researchers and students in the areas of negotiation group decision negotiation support systems and management science as well as to practising negotiators interested in this technology

Evolution and Constitution E.F. Oeser, 2013-06-29 This work for the first time brings together case law and law based on norms It offers the reader a survey and a new explanation of evolutionary emergence of social contracts and constitutions in the European history and should help to build a bridge between two cultures science and humanities It is addressed to philosophers of law historians of law theorists of science and social scientists

The Political Potential of Sortition Oliver Dowlen, 2017-04-03

The central feature of every true lottery is that all rational evaluation is deliberately excluded Once this principle is grasped the author argues we can begin to understand exactly what benefits sortition can bring to the political community The book includes a study of the use of sortition in ancient Athens and in late medieval and renaissance Italy It also includes commentary on the contributions to sortition made by Machiavelli Guicciardini Harrington and Paine an account of the history of the randomly selected jury and new research into lesser known examples from England America and revolutionary France
