**An Architectural Agenda for Energy** Kiel Moe,2013-07-31 Convergence is based on the thermodynamic premise that architecture should maximize its ecological and architectural power No matter how paradoxical it might initially seem architects should maximize energy intake maximize energy use and maximize energy feedback and reinforcement This presumes that the necessary excess of architecture is in fact an architect s greatest asset when it comes to an agenda for energy not a liability But how do we start to understand the full range of eco thermodynamic principles which need to be engaged with in order to achieve this Kiel Moe explicates three factors materials energy systems and amortization When these three factors converge through design the resulting buildings begin to perform in complex if not subtle ways By drawing on a range of architectural thermodynamic and ecological sources as well as illustrated and well designed case studies the author shows what architecture stands to gain by simultaneously maximizing the architectural and ecological power of buildings **A Field Guide to a New Meta-field** Barbara Maria Stafford,2011-06 Includes bibliographical references and index

essays range from the Tower of Babel to the Wizard of Oz from Christo to Christmas trees from the lightness of being to the weight of architecture This ultimately optimistic book suggests that architecture is as vital as ever It is tempting to say that our present cultural situation has rendered architecture nearly impossible if not unnecessary But it is also possible to look to what our lives at the turn of the millennium typically lack fulfillment spirituality a sense of belonging weight and to conclude that the ground for architecture has never been more fertile The texts intelligent and readable draw equally from literary sources architectural practice philosophical analyses pop culture and everyday experiences Willis s perspective as a writer architect artist and teacher informs his work his texts are at once reflective and proactive as they challenge readers to rethink their participation in the built environment Accompanying the text are the author s original illustrations which link the forms and forces surrounding architecture at the end of the twentieth century in novel thought provoking ways

**Detailing Worlds** Eric Bellin, 2025-02-06 In the 21st century the word detail appears constantly in discussions of building and we use it in many different ways yet just over 250 years ago detail meant nothing at all particular to the work of architects engineers or builders Detailing Worlds is the first book to examine the origins and evolution of detail as a concept with meanings specific to practices of building By exploring how past meanings and roles were ascribed to detail in different worlds of practice those of academics technicians students engineers and architects Detailing Worlds looks to the future illuminating the ways disciplinary knowledge and the concepts on which it is based evolve and change over time It is a story about how such concepts are slowly but constantly reconceived redefined and transformed by individuals as they interact with one another and how this process is shaped by the ever changing sociocultural and technological dimensions of the world around us Richly illustrated with more than 200 images including figures from rare texts archival student drawings and practitioners construction documents from the 18th through 20th centuries Detailing Worlds ventures to tell the history of a disciplinary specific idea and offer insights about how we think and speak about the practice of building today The Publishers Weekly, 1928 **Journal of the Society of Architectural Historians** Society of Architectural Historians, 2004 Includes special issues
