The Development Of Motives And Values In The Child:

The Development of Motives and Values in the Child Robert Oliver Tilman, 1964 *World Yearbook of Education* 2009
Marilyn Fleer, Mariane Hedegaard, Jonathan Tudge, 2012-04-05 The World Yearbook of Education 2009 Childhood Studies and the Impact of Globalization Policies and Practices at Global and Local Levels examines the concept of childhood and childhood development and learning from educational sociological and psychological perspectives This contributed volume seeks to explicitly provide a series of windows into the construction of childhood around the world as a means to conceptualizing and more sharply defining the emerging field of global and local childhood studies At the global level there has been increasing discontent with how children have been reified and measured Prevailing Eurocentric and North American notions of childhood and development across the North South boundaries show vast differences in how childhood is constructed and how development is theorized The World Yearbook of Education 2009 volume provides comprehensive research from Asia Pacific the Americas the African region and European communities and is presented with a special focus on education It examines childhood from birth to twelve years of age across institutional contexts and within both poor majority and rich minority countries Cultural historical theory has been used as the framework for investigating and providing insights into how childhood is theorized politicized enacted and lived across these communities A range of theoretical orientations informs this book including cultural historical theory ecological theory and cross cultural research The World Yearbook of Education 2009 volume is organized into 3 sections Section 1 Examines the global construction of childhood development and learning Section 2 Discusses the local conditions and global imperatives that arise from a broadly based analysis of the studies presented within this section Section 3 Draws upon cultural historical theory and ecological theory and brings together the themes explored throughout the preceding two sections The World Yearbook of Education 2009 volume seeks to make visible the cultural historical construction of childhood and development across the north south regions and scrutinizes the policy imperatives that have maintained the global colonization of families **Early Childhood Pedagogies** Jane Murray, 2018-12-07 Diverse international perspectives on the ways in which young children s learning and care may be supported converge in this book Traversing the field of early childhood education and care from its established philosophical underpinnings to 21st century research policies and practices the contributions to this volume draw together past and present discourses as a basis for shaping future trajectories In spite of a growing international consensus on the strong influence of early childhood experiences on lifetime outcomes the nineteen chapters reveal contemporary early childhood pedagogy as a collection of spaces characterised by plurality complexity and dissonance These characteristics signal the importance of recognising early childhood pedagogies multiple models of practice for the many diverse learning and care contexts that have the capacity to value young children as individuals and enable each to flourish now and throughout their lives Moreover such characteristics disrupt notions that a single optimal early childhood pedagogy is either
