In *Women as Healers* thirteen contributors explore the intersection of feminist anthropology and medical anthropology in eleven case studies of women in traditional and emergent healing roles in diverse parts of the world. In a spectrum of healing roles ranging from family healers to shamans, diviners, mediums and midwives, women throughout the world pursue strategic ends through healing, manipulate cultural images to effect cures and explain misfortune and shape and are shaped by the social and political contexts in which they work. In an introductory chapter Carol Shepherd McClain traces the evolution of ideas in medical anthropology and in the anthropology of women that have both constrained and expanded our understanding of the significance of gender to healing, one of the most fundamental and universal of human activities. The contributors include Carol Shepherd McClain, Ruthbeth Finerman, Carolyn Nordstrom, Carole H. Browner, William Wedenoja, Marjery Foz, Barbara Kerewsky Halpern, Laurel Kendall, Merrill Signer, Roberto Garcia, Edward C. Green, Carolyn Sargent and Margaret Reid. *How to Conquer the World* Garrett Wasny, 1999. The State of Food Insecurity in Manzini, Swaziland Tevera, Daniel, Simelane, Nomcebo, 2016-10-17 This study of the food security situation of the poor in Manzini Swaziland's economic hub formed part of AFSUN's baseline survey of eleven Southern African cities It found that the urban poor here are less food secure than in any of the other cities in the survey On the basis of the findings presented in this paper AFSUN makes several policy recommendations to deal with food security challenges in the poor urban areas of Swaziland Among these is that government needs to target urban households specifically in addition to its focus on poverty in rural areas A more national approach that covers both rural and urban areas will help Swaziland to move towards the achievement of the Millennium Development Goal to reduce hunger by 50% Because households that are severely food insecure tend to be large female headed and female centred and have a narrow range of livelihood strategies it is vital for policies that address urban food security to appreciate the complex relationship between household food security and a range of variables such as income gender and household size
