Creations of Fire Cathy Cobb, Harold Goldwhite, 2013-11-11. The history of chemistry is a story of human endeavor and as erratic as human nature itself. Progress has been made in fits and starts and it has come from all parts of the globe. Because the scope of this history is considerable—some 100,000 years—it is necessary to impose some order, and we have organized the text around three discernible, albeit gross, divisions of time. Part 1, Chaps. 1–7, covers 100,000 B.C. to the late 1700s and presents the background of the Chemical Revolution. Part 2, Chaps. 8–14, covers the late 1700s to World War I and presents the Chemical Revolution and its consequences. Part 3, Chaps. 15–20, covers World War I to 1950 and presents the Quantum Revolution and its consequences and hints at revolutions to come. There have always been two tributaries to the chemical stream: experiment and theory. But systematic experimental methods were not routinely employed until the 1600s, and quantitative theories did not evolve until the 1700s, and it can be argued that modern chemistry as a science did not begin until the Chemical Revolution in the 1700s. xi, xii. PREFACE. We argue, however, that the first experiments were performed by artisans and the first theories proposed by philosophers and that a revolution can be understood only in terms of what is being revolted against.

The Hermetic Tradition Julius Evola, 2018-07-13. This important survey of alchemical symbols and doctrines sets forth the mysterious worldview and teachings of the practitioners of the royal art. One of the leading exponents of the Hermetic tradition, Julius Evola demonstrates the singularity of subject matter that lies behind the words of all adepts in all ages, showing how alchemy, often misunderstood as primitive chemistry or a mere template for the Jungian process of individuation, is nothing less than a universal secret science of human and natural transformation. First published in 1931 in Italian. This is the first English translation. Draws from a host of sources in the Western esoteric tradition, works on theurgy, magic, and gnosticism from neoplatonic, Arab, and medieval sources.
