Six Impossible Things Before Breakfast: The Evolutionary Origins of Belief Lewis Wolpert, 2008-07-17

Marvelously funny and provocative Publishers Weekly Why do 70 percent of Americans believe in angels while others are convinced that they were abducted by aliens What makes people believe in improbable things when all the evidence points to the contrary And don't almost all of us at some time or another engage in magical thinking In *Six Impossible Things Before Breakfast* evolutionary biologist Lewis Wolpert delves into the important and timely debate over the nature of belief looking at its psychological foundations to discover just what evolutionary purpose it could serve Wolpert takes us through all that science can tell us about the beliefs we feel are instinctive He deftly explores different types of belief those of children of the religious and of those suffering from psychiatric disorders and he asks whether it is possible to live without belief or whether it is a necessary component of a functioning society

Alice in Wonderland DISNEY BOOK GROUP, 2010-02-02 Join Alice as she disappears down a rabbit hole one more time and emerges in the topsy turvy world of Wonderland Curious happenings punctuate Alice s journey including wild encounters with the Red Queen the Mad Hatter the Jabberwocky and many others A novelization from the screenplay of Alice in Wonderland the motion picture directed by Tim Burton Quantum Sense and Nonsense Jean Bricmont, 2017-10-27

Permeated by the author s delightful humor this little book explains with nearly no mathematics the main conceptual issues associated with quantum mechanics The issue of determinism Does quantum mechanics signify the end of a deterministic world view The role of the human subject or of the observer in science Since Copernicus science has increasingly tended to

dethrone Man from his formerly held special position in the Universe But quantum mechanics with its emphasis on the notion of observation may once more have given a central role to the human subject The issue of locality Does quantum mechanics imply that instantaneous actions at a distance exist in Nature In these pages the author offers a variety of views and answers bad as well as good to these questions The reader will be both entertained and enlightened by Jean Bricmont's clear and incisive arguments

Realism and Religion Michael Scott, 2017-09-29 This book draws together a distinguished group of philosophers and theologians to present new thinking on realism and religion The religious realism antirealism debate concerns the questions of God's independence from human beings the nature of religious truth and our access to religious truths Although both philosophers and theologians have written on these subjects there has been little sustained investigation into these issues akin to that found in comparable areas of research such as ethics or the philosophy of science In addition the absence of any agreed approach to the problem underlines both the need for fresh thought on it and the fruitfulness of this area for further research The editors introduction sets the context of the realism debate traces connections amongst the essays which follow and proposes lines for future development and enquiry The contributors present a variety of contrasting positions on key issues in the religious realism debate and each opens up new and important themes Gordon Kaufman Peter Lipton and Simon Blackburn provide the opening chapters and the context for the collection Alexander Bird John Hare Graham Oppy and Nick Trakakis Merold Westphal and John Webster explore topics that are central to the debate This volume of original essays will both introduce newcomers to the field and suggest new lines of research for those already familiar with it

The End of Two Illusions Hamid Dabashi, 2022-04-19 Dismantling the myths that divide Islam and the West this cutting edge work of critical thinking proposes new ways to reread Islamic and

world histories Extending from the front page news coverage of our daily lives back into the deepest and most revelatory histories of the last two hundred years and earlier Hamid Dabashi's *The End of Two Illusions* is a daring provocative and groundbreaking work that dismantles the most dangerous delusions manufactured between two vastly fetishized abstractions Islam and the West With this book Dabashi shows how the civilizational divides imagined between these two cosmic binaries have defined their entanglement in ways that have nothing to do with the lived experiences of either Muslims or the diverse and changing communities scarcely held together by the myth of the West Through detailed historical and contemporary analysis *The End of Two Illusions* untangles the motivations that produced this global fiction Dabashi demonstrates how the West was an ideological commodity and civilizational mantra invented during the European Enlightenment serving as an epicenter for the rise of globalized capitalist modernity In turn Orientalist ideologues went around the world manufacturing equally illusory abstractions in the form of inferior civilizations in India China Africa Latin America and the Islamic world The result was the projection of Islam and the West as the prototype of a civilizational hostility that has given false explanations and flawed prognoses of our contemporary history with weaponized Islamophobia on one side and militant Islamism on the other as its most palpable manifestations Dabashi argues it is long past time to dismantle this dangerous liaison expose and overcome its perilous delusions and reimagine the world beyond its shimmering mirage *The End of Two Illusions* is the most iconoclastic work of critical thought and scholarship to emerge in recent memory clearing the way toward a far more liberating imaginative geography of the world we share

Love's Caravan James Patrick, 2023-07-21 Everyone has an imagination but how many of us can say we use it to its full potential Not only Ibn Arabi the greatest Shaykh of Sufism but poets and mystics in every age have developed their imagination to the point where they can apprehend a silence that speaks in symbol and a dynamic stillness that can transform the world This journey starts from where we are as novice meditators in a bustling distracted world and guides us into the mystical imagination with twelve short discussions each illustrated by accessible memorable poems With creative challenges in each chapter you can chart your own exploration by writing a poem painting a picture or making a piece of music using the suggestions as a starting point Stops along the route of this armchair pilgrimage include dreams alchemists Sufi stories bardic states angels synchronicities prophecies a mermaid and a well known crucifixion This book is for seekers yogis and believers of all traditions and at all stages as well as those who simply want to better connect with their creative imagination
