Rondilla and Paul Spickard ask important questions such as What are the colorism issues that operate in Asian American communities Are they the same issues for all Asian Americans for women and for men for immigrants and the American born for Chinese Filipinos Koreans Vietnamese and other Asian Americans Do they reflect a desire to look like White people or is some other motive at work Including numerous stories about and by people who have faced discrimination in their own lives this book is an invaluable resource for people interested in colorism among Asian Americans

Color Matters Kimberly Jade Norwood, 2013-12-17 In the United States as in many parts of the world people are discriminated against based on the color of their skin This type of skin tone bias or colorism is both related to and distinct from discrimination on the basis of race with which it is often conflated Preferential treatment of lighter skin tones over darker occurs within racial and ethnic groups as well as between them While America has made progress in issues of race over the

past decades discrimination on the basis of color continues to be a constant and often unremarked part of life In Color Matters Kimberly Jade Norwood has collected the most up to date research on this insidious form of discrimination including perspectives from the disciplines of history law sociology and psychology Anchored with historical chapters that show how the influence and legacy of slavery have shaped the treatment of skin color in American society the contributors to this volume bring to light the ways in which colorism affects us all influencing what we wear who we see on television and even which child we might pick to adopt Sure to be an eye opening collection for anyone curious about how race and color continue to affect society Color Matters provides students of race in America with wide ranging overview of a crucial topic

Adoption in a Color-blind Society Pamela Anne Quiroz, 2007 Recent adoption policy changes are based on assumptions that race is no longer relevant and that if government officials and activists would just get out of the way adoption would provide one means of eradicating the fixation on race and racism Adoption in a Color Blind Society examines the public presentation of private adoption agency Web sites and race talk in adoption chat rooms to lay bare the lie of color blind discourse and reveal that rather than eroding the meaning of race has shifted The private adoption market provides an illustration of Eduardo Bonilla Silva's thesis of the Latinization of the U S as biracial children are either downgraded or upgraded into a tri racial system of categories depending at least in part upon their heritage Drawing also on popular adoption literature and information in the public domain the book provides a critical interpretation of the discursive practices of private adoption and argues that despite the current discourse of equity in contemporary adoption African American children continue to be marginalized as bargain basement deals Color blind individualism extends beyond the U S to our new global reality where children are simply another commodity within the transnational marketplace of adoption

The Melanin Millennium Ronald E. Hall, 2012-09-14 In the aftermath of the 60s Black is Beautiful movement and publication of The Color Complex almost thirty

years later the issue of skin color has mushroomed onto the world stage of social science. Such visibility has inspired publication of the *Melanin Millennium* for insuring that the discourse on skin color meet the highest standards of accuracy and objective investigation. This volume addresses the issue of skin color in a worldwide context. A virtual visit to countries that have witnessed a huge rise in the use of skin whitening products and facial feature surgeries aiming for a more Caucasian like appearance will be taken into account. The book also addresses the question of whether using the laws has helped to redress injustices of skin color discrimination or only further promoted recognition of its divisiveness among people of color and Whites. The *Melanin Millennium* has to do with now and the future. In the 20th century science including eugenics was given to and dominated by discussions of race category. Heretofore there remain social scientists and other relative to the issue of skin color loyal to race discourse. However in their interpretation and analysis of social phenomena the world has moved on. Thus while race dominated the 20th century the 21st century will emerge as a global community dominated by skin color and making it the melanin millennium.

Imagining Black America Michael Wayne, 2014-02-25
DIVScientific research has now established that race should be understood as a social construct not a true biological division of humanity. In *Imagining Black America* Michael Wayne explores the construction and reconstruction of black America from the arrival of the first Africans in Jamestown in 1619 to Barack Obama's reelection. Races have to be imagined into existence and constantly reimagined as circumstances change. Wayne argues and as a consequence the boundaries of black America have historically been contested terrain. He discusses the emergence in the nineteenth century and the erosion during the past two decades of the notorious one drop rule. He shows how significant periods of social transformation emancipation the Great Migration the rise of the urban ghetto and the Civil Rights Movement raised major questions for black Americans about the defining characteristics of their racial community. And he explores how factors such as class age and gender have influenced perceptions of what it means to be black. Wayne also considers how slavery and its legacy have defined freedom in the United States. Black Americans he argues because of their deep commitment to the promise of freedom and the ideals articulated by the Founding Fathers became and remain quintessential Americans the incarnation of America in the words of the civil rights leader A. Philip Randolph.

Cortés, 2013-08-15 This comprehensive title is among the first to extensively use newly released 2010 U S Census data to examine multiculturalism today and tomorrow in America This distinction is important considering the following NPR report by Eyder Peralta Based on the first national numbers released by the Census Bureau the AP reports that minorities account for 90 percent of the total U S growth since 2000 due to immigration and higher birth rates for Latinos According to John Logan a Brown University sociologist who has analyzed most of the census figures The futures of most metropolitan areas in the country are contingent on how attractive they are to Hispanic and Asian populations Both non Hispanic whites and blacks are getting older as a group These groups are tending to fade out he added Another demographer William H Frey with the Brookings Institution told The Washington Post that this has been a pivotal decade We re pivoting from a white black dominated American population to one that is multiracial and multicultural Multicultural America A Multimedia Encyclopedia explores this pivotal moment and its ramifications with more than 900 signed entries not just providing a compilation of specific ethnic groups and their histories but also covering the full spectrum of issues flowing from the increasingly multicultural canvas that is America today Pedagogical elements include an introduction a thematic reader s guide a chronology of multicultural milestones a glossary a resource guide to key books journals and Internet sites and an appendix of 2010 U S Census Data Finally the electronic version will be the only reference work on this topic to augment written entries with multimedia for today s students with 100 videos with transcripts from Getty Images and Video Vault the Agence France Press and Sky News as reviewed by the media librarian of the Rutgers University Libraries working in concert with the title s editors
