### **Hydrothermal Reactions for Materials Science and Engineering** S. Somiya,2012-12-06

According to the late Professor Emeritus Seitaro Tsuboi l the word hydrothermal was used as early as 1849 by a British geologist Sir Roderick Murchison 1792 187 I in relation to the action of heated water in bringing about change in the earth s crust The term abounds in later geological literature and is most frequently met in connection with the processes that take place at a stage near the closing in the course of consolidation of magma When a cooling magma reaches that stage the residual liquid contains a large proportion of volatile components chiefly water and further cooling results in the formation of minerals of special interest or ore deposits A great concern of Tsuboi s as a petrologist was to elucidate the details of the nature of various actions involved in these hydrothermal processes of which little was known It is remarkable that in the last few decades extensive high temperature and high pressure experiments in which water plays an important role have become practicable in laboratories owing to the development of new apparatus and new methods As a result the knowledge essential to the elucidation of hydrothermal processes has been improved but is still far from complete

### **Rapid Manufacturing**

Neil Hopkinson,Richard Hague,Philip Dickens,2006-02-22 Rapid Manufacturing is a new area of manufacturing developed from a family of technologies known as Rapid Prototyping These processes have already had the effect of both improving products and reducing their development time this in turn resulted in the development of the technology of Rapid Tooling which implemented Rapid Prototyping techniques to improve its own processes Rapid Manufacturing has developed as the next stage in which the need for tooling is eliminated It has been shown that it is economically feasible to use existing commercial Rapid Prototyping systems to manufacture series parts in quantities of up to 20 000 and customised parts in quantities of hundreds of thousands This form of manufacturing can be incredibly cost effective and the process is far more flexible than conventional manufacturing Rapid Manufacturing An Industrial Revolution for the Digital Age addresses the academic fundamentals of Rapid Manufacturing as well as focussing on case studies and applications across a wide range of industry sectors As a technology that allows manufacturers to create products without tools it enables previously impossible geometries to be made This book is abundant with images depicting the fantastic array of products that are now being commercially manufactured using these technologies Includes contributions from leading researchers working at the forefront of industry Features detailed illustrations throughout Rapid Manufacturing An Industrial Revolution for the Digital Age is a groundbreaking text that provides excellent coverage of this fast emerging industry It will interest manufacturing industry practitioners in research and development product design and materials science as well as having a theoretical appeal to researchers and post graduate students in manufacturing engineering product design CAD CAM and CIM
