

A man with a beard, wearing a white hard hat and a high-visibility yellow safety vest over a blue long-sleeved shirt, is smiling and talking on a mobile phone. He is holding a clipboard in his left hand. The background is a blurred construction site with a large piece of orange and grey machinery, possibly a crane or excavator, and some trees in the distance.

Global Context** Bill Williams, José Figueiredo, James Trevelyan, 2013-09-03 This volume aims to provide the reader with a
broad cross section of empirical research being carried out into engineers at work The chapters provide pointers to other
relevant studies over recent decades an important aspect we believe because this area has only recently begun to coalesce as
a field of study and up to now relevant empirical research has tended to be published across a range of academic disciplines
This lack of readily available literature might explain why contemporary notions of engineering have drifted far from the
realities of practice and are in urgent need of revision The principal focus is on what empirical studies tell us about the social
and technical aspects of engineering practice and the mutual interaction between the two After a foreword by Gary Lee
Downey the research presented by the various chapter authors is based on empirical data from studies of engineers working
in a variety of global settings that include Australia Ireland Portugal South Asia Switzerland the UK and the US The following
groups of readers are addressed researchers and students with an interest in engineering practice professional engineers
particularly those interested in research on engineering practice engineering educators people who employ recruit or work
with engineers Providing a much clearer picture of engineering practice and its variations than has been available until now
the book is of interest to engineers and those who work with them At the same time it provides invaluable resource material
for educators who are aiming for more authentic learning experiences in their classrooms Further information visit the
