Intelligence can be characterised both as the ability to absorb and process information and as the ability to reason Humans and other animals have both of these abilities to a greater or lesser degree but the search for artificial intelligence has been hampered by our inability to create a theory that covers both of these characteristics In this provocative and ground breaking book Professor Keith Devlin argues that to obtain a deeper understanding of the nature of intelligence and knowledge acquisition we must broaden our concept of logic For these purposes Devlin introduces the concept of the infon a quantum of information and merges it with situations a mathematical construction generalising the notion of sets developed by Barwise and Perry at Stanford University in order to study the meaning of natural languages He develops and describes the theory here in general and intuitive terms and discusses its relevance to a variety of concerns such as artificial intelligence cognition natural language and communication *Handbook of Logic and Language* Johan F.A.K. van Benthem,Alice ter
