Encyclopedia of Education: Race-State James W. Guthrie, 2003

A Study of Interactions Institute of Medicine, National Research Council, Division of Behavioral and Social Sciences and Education, Board on Children, Youth, and Families, Program Committee for a Workshop on the Synthesis of Research on Adolescent Health and Development, 2006-05-25 Scholars and adults in general have pondered for centuries the

mysterious processes that influence the ways in which children gradually become adults The development of professional organizations and journals devoted to adolescence as well as increasing appreciation in academia and the world of policy for the importance of this phase of life have helped this field catch up with the pace of research on other stages of human development particularly infancy and early childhood The development of a comprehensive review of research on adolescence depends in large part on the perceived need for such a synthesis and the extent to which different research fields as well as policy and practice would benefit from such an effort To address these issues the National Research Council and the Institute of Medicine through the Board on Children Youth and Families held a two day workshop in September 2005 The workshop was designed as an opportunity for an interdisciplinary group to explore the different strands of research that contribute to understanding adolescence In the brief time available the group was not asked to address the entire range of issues related to adolescent health and development but rather to provide an initial explanation of issues that a longer term study might address A Study of Interactions summarizes the major themes discussed at the workshop It begins with an overview of what adolescence is and current views of the processes that shape development in the second decade of life It explores the transdisciplinary research issues already presented in this field as well as issues raised in discussions of goals for the field s future A closing section describes the presenters thoughts on the feasibility of launching an in depth contextual study that could more firmly establish connections among the many fields of study concerned with adolescence Life-span Human Development Carol K. Sigelman, Elizabeth A. Rider, 2003 By combining the best of topical and chronological approaches this text presents life span development as a motion picture rather than as a series of individual snapshots

Disabilities in Infancy and Childhood Fatima Y Ismail, Pasquale J. Accardo, Bruce K Shapiro, 2024-11-26 Capute and Accardo's Neurodevelopmental Disabilities in Infancy and Childhood Fourth Edition provides updated foundational theoretical and practical knowledge on the spectrum and continuum of neurodevelopmental disabilities shaped by ongoing advances in neuroscience and related disciplines. It reviews the overarching principles of assessment, diagnosis, and management of patients with a wide range of neurodevelopmental disabilities. Streamlined or fully rewritten chapters including developmental screening and surveillance, neuroimaging and genetic evaluation, early intervention, principles of pharmacological treatment, principles of successful management programs, aging and transition, planning telemedicine, and care in low resource settings are included. The book's practical, expert-led approach aims to prepare future clinicians to skillfully assess and manage children with neurodevelopmental disabilities with the aid of clinical approach flowcharts, common presentations, diagnostic algorithms, and clinic notes templates. Provides the most comprehensive, authoritative, and up-to-date single volume on practical aspects of care for patients with neurodevelopmental disabilities. Presents a reorganized single volume that is more accessible than previous editions. Features new chapters on telemedicine, novel therapies, care in low resource settings, and the future of neurodevelopmental disabilities. Includes full color illustrations throughout along with explanatory figures. Covers clinical approaches and diagnostic algorithms and templates for clinic notes that are available for online download.

Sex Differences and Implications for Translational Neuroscience Research Institute of Medicine, Board on Health Sciences Policy, Forum on Neuroscience and Nervous System Disorders, 2011-02-25 Biological differences between the sexes influence not only individual health but also public health, biomedical research, and health care. The Institute of Medicine held a workshop March 8-9, 2010 to discuss sex differences and their implications for translational neuroscience research which bridges the gap between scientific discovery and application.
