Historic Preservation and the Livable City Eric W. Allison,Lauren Peters,2010-12-20 For both the preservation professional and urban planner this book shows how preservation is a key to the creation of livable cities The author Eric Allison the founder and coordinated of the graduate historic preservation program at Pratt Institute in New York City offers tools and case studies that preservationists and planners can learn from in implementing preservation projects or plans in cities large and small This book is a must read for anyone working in or interested in these fields and the creation and maintenance of livable cities

Utopian England Dennis Hardy,2012-12-06 England in the early part of the twentieth century was rich in utopian ventures diverse and intriguing in their scope and aims Two world wars an economic depression and the emergence of fascist states in Europe were all a spur to idealists to seek new limits to escape from the here and now and to create sanctuaries for new and better lives Dennis Hardy explores this fascinating history of utopian ideals the lives of those who pursued them and the utopian communities they created Some communities were fired by a long tradition of land movements others by thoughts of more humane ways of building towns In turn there were experiments devoted to the arts to the promotion of religious doctrine and to a variety of political causes And some were just places of the imagination Utopian England is about just one episode in the perennial search for perfection but what is revealed has lessons that extend well beyond a particular time and place So long as there are failings in society so long as rationality is not enough there will continue to be a place for thinking the impossible for going in search of utopia

The Garden City Movement Up-To-Date Ewart Gladstone Culpin,2015-03-05 This work was written and compiled by the then Secretary of the Garden Cities and Town Planning Association in 1913 It shows just how much the conception of the garden city had been broadened from Howard s original texts Indeed the Association s own name had been broadened to add the newly emergent practice and theory of town planning to the original focus Alongside the garden city recognition is now given to the burgeoning numbers of garden suburbs and garden villages Many examples of these are identified and briefly described including many which are small and now little known greatly adding to the interest of the publication Even the underlying arguments for such developments differ Alongside the more altruistic arguments in favour of reform there are now those which explicitly emphasise the need to ensure a healthy race to maintain the Empire

Urban heritage in times of uncertainty Dimitra Babalis,2019-12-30 How should designers respond to urban uncertainty How can we ensure our urban heritage is protected against urban risks and climate change How can we create places that increase urban quality socialisation equity and opportunities for change minimising environmental damages This volume addresses current trends

and challenges that explore on how we transform our urban heritage in ways which increase urban resilience embracing innovation and technology Part one provides a critical view in driving forward a new conception of urban transformation that should respond to current concerns around economic social and urban change Part two underscores the importance of the current perception of urban and architectural design that can take into consideration climate change

Housing and the City Katharina Borsi, Didem Ekici, Jonathan Hale, Nick Haynes, 2022-06-28 *Housing and the City* explores housing histories theories and projects in diverse geographies It presents a geographically dispersed history of the twentieth century modern housing project and its social diagram juxtaposed with case studies from the past and the present that suggest that we can live and work differently While the contributions are diverse in their theoretical approach and geographical situation their juxtaposition yields transversal connections in the conception of the home and the city and highlights the diversity of architectural solutions in the formation of housing and its communities The collection also reveals architecture's contribution to the construction of the self and communities the individual and the collective as both urban spatial entities and socio political concepts *Housing and the City* provides essential reading for students academics and practitioners interested in the history theory or current design of housing At a time when cities are witnessing new ways of working changing social demographics increased geographical mobility and mass migrations as well as the pervasive threat of the climate crisis all trends exacerbated by the Covid 19 pandemic *Housing and the City* presents a historical and theoretical reflection on the question what does it mean to be at home in the city in the twenty first century

Ecology and the Literature of the British Left H. Gustav Klaus, Valentine Cunningham, 2016-04-29 Premised on the belief that a social and an ecological agenda are compatible this collection offers readings in the ecology of left and radical writing from the Romantic period to the present While early ecocriticism tended to elide the bitter divisions within and between societies recent practitioners of ecofeminism environmental justice and social ecology have argued that the social the economic and the environmental have to be seen as part of the same process Taking up this challenge the contributors trace the origins of an environmental sensibility and of the modern left to their roots in the late eighteenth and early nineteenth centuries charting the ways in which the literary imagination responds to the political industrial and agrarian revolutions Topics include Samuel Taylor Coleridge's credentials as a green writer the interaction between John Ruskin's religious and political ideas and his changing view of nature William Morris and the Garden City movement H G Wells and the Fabians the devastated landscapes in the poetry and fiction of the First World War and the leftist pastoral poetry of the 1930s In historicizing and connecting environmentally sensitive literature with socialist thought these essays explore the interactive vision of nature and society in the work of writers ranging from William Wordsworth and John Clare to John Berger and John Burnside

The Making of Place and People in the Danish Metropolis Christian Sandbjerg Hansen, 2021-04-06 This book investigates the sociohistorical making of place and people in Copenhagen from around 1900 to the present day Drawing inspiration from Pierre Bourdieu's sociology

of social space and symbolic power and from Lo c Wacquant s hypothesis of advanced marginality and territorial stigmatisation the book explores the genesis and development of the notorious neighbourhood of Copenhagen North West As an extraordinary place the North West provides an illustrative case of Danish welfare and urban history that questions the epitome on inclusive Copenhagen Through detailed empirical analysis the book spotlights three angles and entanglements of the social history of this area of Copenhagen the production of socio spatial constructions and authoritative categorisations of the neighbourhood especially by the state and the media the local social pedagogical interventions and symbolic boundary drawings by welfare agencies in the neighbourhood and the residents subjective experiences of place social divisions and dishonour In this way *The Making of Place and People in the Danish Metropolis* analyses how social symbolical and spatial structures dynamically intertwine and contribute to the fashioning of divisions of inequality and marginality in the city over the course of some 125 years It will appeal to scholars of sociology urban studies and urban history with interests in social welfare

Biodiversity Islands: Strategies for Conservation in Human-Dominated Environments Florencia Montagnini, 2022-04-22 This book is intended to provide an overview for the identification and establishment of biodiversity islands It presents examples and case studies where the biodiversity islands approach is being used in a variety of locations and contexts worldwide It will contribute to design parameters on appropriate sizing and spatial distribution of biodiversity islands in order to be effective in conservation and regeneration across the landscape using integrated landscape management approaches This book is essential given the current worldwide trend of habitat destruction and the need to preserve biodiversity and its values The chapters are organized in five sections The first section provides the introduction Section 2 3 and 4 discuss the challenges and alternatives of establishment and management case studies across the globe safeguarding of the environmental economic and social benefits and the final section offers a conclusion The contributing authors present views from the academic the practitioner and the policymaker perspectives offering alternatives and suggestions for promoting strategies that support biodiversity conservation through intentionally designed frameworks for sustainable forest landscapes Readers will discover suggestions and concrete examples that can be used by a variety of stakeholders in various settings throughout the world This book is useful to researchers farmers foresters landowners land managers city planners and policy makers alike

Landscape and Authority in the Early Modern World Stephen H. Whiteman, 2023-04-25 Courts and societies across the early modern Eurasian world were fundamentally transformed by the physical technological and conceptual developments of their era Evolving forms of communication greatly expanded mobility the spread of scientific knowledge and the emergence of an increasingly integrated global economy all affected how states articulated and projected visions of authority into societies that in turn perceived and responded to these visions in often contrasting terms Landscape both reflected and served as a vehicle for these transformations as the relationship between the land and its imagination and consumption became a fruitful site for the negotiation of imperial identities within and beyond

the precincts of the court In *Landscape and Authority in the Early Modern World* contributors explore the role of landscape in the articulation and expression of imperial identity and the mediation of relationships between the court and its many audiences in the early modern world Nine studies focused on the geographical areas of East and South Asia the Islamic world and Europe illuminate how early modern courts and societies shaped and were shaped by the landscape including both physical sites such as gardens palaces cities and hunting parks and conceptual ones such as those of frontiers idealized polities and the cosmos The collected essays expand the meaning and potential of landscape as a communicative medium in this period by putting an array of forms and subjects in dialogue with one another including not only unique expressions such as gardens paintings and manuscripts but also the products of rapidly developing commercial technologies of reproduction especially print The volume invites a deeper and more nuanced understanding of the complexity with which early modern states constructed and deployed different modes of landscape for different audiences and environments Contributors Robert Batchelor Seyed Mohammad Ali Emrani John Finlay Caroline Fowler Katrina Grant Finola O Kane Anton Schweizer Larry Silver Stephen H Whiteman

The European City and Green Space Peter Clark, 2016-12-05 Recent years have seen sustained public debate and controversy over the greening of European cities associated with the environmental movement pressures of urban redevelopment and the promotional strategies of cities competing in a global market But the European debate over urban green space has a long history dating back to Victorian concerns for the green lungs of the city to combat the health and social problems caused by rapid population and industrial growth This book explores the multiplicity of green space developments in the modern city ranging over parks and commons garden suburbs and the cities in the park allotment gardens green belts and national urban parks It is concerned not only with the different types of green space but the many influences shaping their evolution from international planning ideas to the rise of modern day sport and leisure and the effects of the transport revolution No less vital in this story is the interaction of the many actors involved in the often fractious political process of creating green spaces architects and planners politicians developers and other businessmen NGOs and local residents This volume is particularly concerned with contexts how international planning ideas are transmitted and adapted in different European cities how the construction of green space is affected by local power structures and relationships and how ordinary people perceive and use green spaces quite often at variance with official designs *The European City and Green Space* looks at these and other issues through the prism of four metropolises London Stockholm Helsinki and St Petersburg All represent different types of North European city yet each has experienced distinctive economic political and cultural trajectories whilst also facing powerful challenges and problems of similar kinds with regard to green space This volume examines how each has responded to them and what patterns emerge

The Urban Garden City Sandrine Glatron, Laurence Granchamp, 2018-03-24 This book provides an interdisciplinary overview of the role of gardens in cities throughout different historical periods It shows that thanks to various forms of spatial and social

organisation gardens are part of the material urban landscape biodiversity symbolic and social shape and assets of our cities and are increasingly becoming valued as an order to follow Gardens have long been part of the development of cities serving different purposes through the ages shaping neighborhoods to promote health or hygiene introducing aesthetic or biological elements gathering the citizens around a social purpose and providing food and diversity in times of crisis Highlighting examples that can serve as the basis for comparisons the chapters offer a brief panorama of experiences and models of gardens in the city in the European context and in various periods of history while also discussing issues related to garden cities urban agriculture and community gardens The contributors are university staff from various disciplines in the human and life sciences in discourse with other academics but also with practitioners who are interested in experiences with urban gardens and in promoting an awareness of their spatial social and philosophical goals throughout history The book will appeal to urban geographers sociologists and historians but also to urban ecologists dealing with ecosystem services biodiversity and sustainable development in cities From a more operational standpoint landscape planners and architects are sure to find many of the projects enlightening and inspirational

Replenished Ethnicity Tomás Roberto Jiménez, 2010

Without a doubt Tomas Jimenez has written the single most important contemporary academic study on Mexican American assimilation Clear headed crisply written and free of ideological bias Replenished Ethnicity is an extraordinary breakthrough in our understanding of the largest immigrant group in the history of the United States Bravo Gregory Rodriguez author of *Mongrels Bastards Orphans and Vagabonds Mexican Immigration and the Future of Race in America* Tomas Jimenez's Replenished Ethnicity brilliantly navigates between the two opposing perils in the study of Mexican Americans pessimistically overracializing them or optimistically overassimilating them This much needed and gracefully written book illuminates the on the ground situations of the later generations of this key American group insightfully identifying and analyzing the unique factor operating in its case more or less continuous immigration for more than a century Jimenez's work provides a landmark for all future studies of Latin American incorporation into U S society Richard Alba author of *Remaking the American Mainstream* Tomas Jimenez's study adds a much needed but long absent element to our understanding of how immigration contributes to the construction and reproduction of Mexican American ethnicity even as it continuously evolves His work provides useful and needed detail that are absent even from the most reliable surveys Rodolfo de la Garza Columbia University In a masterful piece of social science Tomas Jimenez debunks allegations about slow social and cultural assimilation of Mexican Americans through a richly textured ethnographic account of Mexican Americans lived experiences in two communities with distinct immigration experiences Population replenishment via immigration he claims maintains distinctiveness of established Mexican origin generations via infusion of cultural elixir in varying doses over time and place Ironically it is the vast heterogeneity of Mexican Americans generational depth socioeconomic national origin and legal that both contributes to the population's ethnic uniqueness and yet defies singular theoretical frameworks Jimenez's page turner

uses the Mexican American ethnic prism to re interpret the U S ethnic tapestry and revise the canonical view of assimilation Replenished Ethnicity sets a high bar for second generation scholarship about Mexican Americans Marta Tienda The Office of Population Research at Princeton University *Zionist Architecture and Town Planning* Nathan Harpaz, 2013 Established as a Jewish settlement in 1909 and dedicated a year later Tel Aviv has grown over the last century to become Israel s financial center and the country s second largest city This book examines a major period in the city s establishment when Jewish architects moved from Europe including Alexander Levy of Berlin and attempted to establish a new style of Zionist urbanism in the years after World War I The author explores the interplay of an ambitious architectural program and the pragmatic needs that drove its chaotic implementation during a period of dramatic population growth He explores the intense debate among the Zionist leaders in Berlin in regard to future Jewish settlement in the land of Israel after World War I and the difficulty in imposing a town plan and architectural style based on European concepts in an environment where they clashed with desires for Jewish revival and self identity While modern values advocated universality Zionist ideas struggled with the conflict between the concept of New Order and traditional and historical motifs As well as being the first detailed study of the formative period in Tel Aviv s development this book presents a valuable case study in nation building and the history of Zionism Meticulously researched it is also illustrated with hundreds of plans and photographs that show how much of the fabric of early twentieth century Tel Aviv persists in the modern city

The Urban Archetypes of Jane Jacobs and Ebenezer Howard Abraham Akkerman, 2020-01-09 Ebenezer Howard an Englishman and Jane Jacobs a naturalized Canadian personify the twentieth century s opposing outlooks on cities Howard had envisaged small towns newly built from scratch fashioned on single family homes with small gardens Jacobs embraced existing inner city neighbourhoods emphasizing the verve of the living street From Howard s idea the American Dream of garden suburbs had emerged yet his conceptualization of a modern city received criticism for being uniform and alienated from the rest of the city Similarly at the turn of the new century Jacobs inner city neighbourhoods came to be recognized as the result of commodification vacillating between poverty and newly discovered hubs of urban authenticity Presenting Howard and Jacobs within a psychocultural context *The Urban Archetypes of Jane Jacobs and Ebenezer Howard* addresses our urban crisis in the recognition that city form is a gendered allegorical medium expressing femininity and masculinity within two founding features of the built environment void and volume Both founding contrasts bring tensions but also the opportunities of fusion between pairs of urban polarities human scale against superscale gait against speed and spontaneity against surveillance Jacobs and Howard in their respective attitudes have come to embrace the two ancient archetypes the Garden and the Citadel leaving it to future generations to blend their two contrarian stances
