Thinking Globally, Composing Locally Rich Rice, Kirk St. Amant, 2018-05-01. *Thinking Globally, Composing Locally* explores how writing and its pedagogy should adapt to the ever-expanding environment of international online communication. Communication to a global audience presents a number of new challenges: writers seeking to connect with individuals from many different cultures must rethink their concept of audience. They must also prepare to address friction that may arise from cross-cultural rhetorical situations, variation in available technology, and in access between interlocutors and disparate legal environments. The volume offers a pedagogical framework that addresses three interconnected and overarching objectives: using online media to contact audiences from other cultures to share ideas; presenting ideas in a manner that invites audiences from other cultures to recognize, understand, and convey or act upon them; and composing ideas to connect with global audiences to engage in ongoing and meaningful exchanges via online media. Chapters explore a diverse range of pedagogical techniques including digital notebooks designed to create a space for active dialogic and multicultural inquiry, experience mapping to identify communication disruption points in international customer service, and online forums used in global distance education. *Thinking Globally, Composing Locally* will prove an invaluable resource for instructors seeking to address the many exigencies of online writing situations in global environments. Contributors: Suzanne Blum Malley, Katherine Bridgman, Maury Elizabeth Brown, Kaitlin Clinnin, Cynthia Davidson, Susan Delagrang, Scott Lloyd, Dewitt Amber Engelson, Kay Halasek, Lavinia Hirsu, Daniel Hocutt, Vassiliki Kourbani, Tika Lamsal, Liz Lane, Ben Lauren, J. Corpus and Context Svenja Adolphs, 2008-04-25. *Corpus and Context* explores the relationship between corpus linguistics and pragmatics by discussing possible frameworks for analysing utterance function on the basis of spoken corpora. The book articulates the challenges and opportunities associated with a change of focus in corpus research from lexical to functional units, from concordance lines to extended stretches of discourse, and from the purely textual to multi-modal analysis of spoken corpus data. Drawing on a number of spoken corpora, including the five million word Cambridge and Nottingham Corpus of Discourse in English (CANCODE), funded by CUP, a specific speech act function is being explored using different approaches and different levels of analysis. This involves a close analysis of contextual variables in relation to

lexico grammatical and discoursal patterns that emerge from the corpus data as well as a wider discussion of the role of context in spoken corpus research *Exploring the Power of Social Talk in a Foreign Language* Gerrard Mugford, 2023-12-13 This book examines the fundamental interactional dimension to foreign language communication including the establishment development consolidation and maintenance of interpersonal relations It argues that interpersonal language use such as small talk casual conversation and gossip talk is not only key to meaningful and productive communication but that it is an essential dimension with respect to successful foreign language interaction and that engaging in interpersonal language is communicatively valuable and worthwhile in its own right Crucially it explores how teaching and learning can utilise the role of social talk and relational engagement in helping interactants to express voice and convey their own values attitudes and beliefs Finally it develops a critical relational pedagogy focused on language speakers needs objectives and desires Redressing the imbalance between transactional and interactional language teaching and stressing the importance of phatic and relational language use in helping language users achieve their communicative goals it will appeal to researchers postgraduates and scholars in the fields of education and linguistics Corpus-Based Sociolinguistics Eric Friginal, Jack Hardy, 2013-12-17 In the last decade the availability of corpora and the technological advancements of corpus tools have increased dramatically Applied linguists have greater access to data from around the world and in a variety of languages through websites blogs and social networking sites and there is a high level of interest among these scholars in applying corpora and corpus based methods to other research areas particularly sociolinguistics This innovative guidebook presents a systematic in depth account of using corpora in sociolinguistics It introduces and expands the application of corpora and corpus approaches and tools in sociolinguistic research surveys the growing number of studies in corpus based sociolinguistics and provides instructions and options for designing and developing corpus based studies Readers will find practical information on such contemporary topics as workplace registers megacorpora and using the web as a corpus Vignettes case studies discussion questions and activities throughout further enhance students involvement with the material and provide opportunities for hands on practice of the methods discussed Corpus Based Sociolinguistics is a comprehensive and accessible guide a must read for any student or scholar interested in exploring this popular and promising approach to sociolinguistic research *Linguistics and Language Behavior Abstracts* ,2008
