Dharwadker,2018-10-16 The urban theatre which emerged under Anglo European and local influences in colonial metropolises such as Calcutta and Bombay around the mid nineteenth century marked the beginning of the modern period in Indian theatre distinct from classical postclassical and more proximate precolonial traditions A Poetics of Modernity offers a unique selection of original theoretically significant writings on theatre by playwrights directors actors designers activists and policy makers to explore the full range of discursive positions that make these urban practitioners modern The source texts represent nine languages including English and about one third of them have been translated into English for the first time the volume thus retrieves a multilingual archive that so far had remained scattered in print and manuscript sources around the country A comprehensive introduction by Dharwadker argues for historically precise definitions of theatrical modernity outlines some of its constitutive features and connects it to the foundational theoretical principles of urban theatre practice in modern India

Indigenous Shona Philosophy Paschall Mungwini,2017-12-29 Some of the most provocative questions confronting philosophers in Africa are grounded in the historical memory of conquest and the peripheralisation the continent Mungwini offers a critical reconstruction of indigenous Shona philosophy as an aspect of the African intellectual heritage held hostage by colonial modernity In this comprehensive work he lays bare the thoughts of the Shona who are credited with the founding of the ancient Great Zimbabwe civilisation Retracing the epistemic thread in the fabric of Shona culture and philosophy he explores the assumptions that inform their thinking The exchange of such knowledge is fundamental to the future of humanity

Ideological, Social and Cultural Aspects of Events Omar Moufakkir,Tomas Pernecky,2014-12-10 There is an ever growing importance of events in modern society and until now existing literature on events has been dominated by the economic perspective Social and Cultural Aspects of Events addresses the social and cultural side of events and explores the role they have in fostering change and community development It examines the transformatory function of events in the context of development studies as phenomena that can promote and facilitate human development including social societal and individual change This book provides vital and timely exploration and encourages the study of more diverse themes within event management

Mapping Modernities Alan Dingsdale,2013-02-01 When the communist governments of Eastern Europe and the Soviet Union collapsed between 1989 and 1991 there was a revived interest in a region that had been largely neglected by western geographers Mapping Modernities draws on the resulting work and other original theoretical and empirical sources to describe interpret and explain the place and spatial order of modernities in Central and Eastern Europe since 1920 to give a theoretically underpinned regional geography of the area The book interprets the geography of Central and Eastern Europe from 1920 to 2000 in terms of spatial modernity It details the individual and collective development of

places produced within the three modernising projects of Nationalism Communism and Neo liberalism **The New Wealth of Cities** John Montgomery, 2017-09-29 Over the past two decades city economies have restructured in response to the decline of older industries This has involved new forms of planning and urban economic development a return to traditional concerns of city building and a focus on urban design During this period there has also been a marked rise in our understanding of cultural development and its role in the design economy and life of cities In this book John Montgomery argues that this amounts to a shift in urban development He provides a long overdue look at the dynamics of the city that is how cities work in relation to the long cycles of economic development and suggests that a new wave of prosperity built on new technologies and new industries is just getting underway in the Western world The New Wealth of Cities focuses on what effect this will have on cities and city regions and how they should react Original and wide ranging this book will be a definitive resource on city economies and urban planning explaining why it is that cities develop over time in periods of propulsive growth and bouts of decline Cultural Studies Lawrence Grossberg, Janice Radway, 1990-11-08 First published in 1990 Routledge is an imprint of Taylor Francis an informa company *Cultural Identity and Global Process* Jonathan Friedman, 1994-10-05 This fascinating book explores the interface between global processes identity formation and the production of culture Examining ideas ranging from world systems theory to postmodernism Jonathan Friedman investigates the relations between the global and the local to show how cultural fragmentation and modernist homogenization are equally constitutive trends of global reality With examples taken from a rich variety of theoretical sources ethnographic accounts of historical eras the analysis ranges across the cultural formations of ancient Greece contemporary processes of Hawaiian cultural identification and Congolese beauty cults Throughout the author examines the interdependency of world market and local cultural transformations and demonstrates the complex interrelations between globally structured social processes and the organization of identity Jonathan Friedman also documents the development and significance of a global perspective in an anthropology that illuminates a wide variety of domains from prehistory to world hegemony In so doing he interrogates the emergence of the concept of culture and suggests that anthropology itself is best understood within the trajectory of modernity **The Left in Search of a Center** Michael Crozier, Peter Murphy, 1996 Does leftist political thought have a future American liberalism is being marginalized European socialism is exhausted and cultural radicalism has become little more than a sideshow Contributors to The Left in Search of a Center probe questions of how political community can be imagined and constituted in the contemporary world Together they make it apparent that the still emerging idea of political community is anchored in the pluralistic and cross cultural nature of late twentieth century Western societies Handbook of Historical Sociology Gerard Delanty, Engin F Isin, 2003-06-03 The overall conception of the volume is absolutely splendid and the editors skilfully place the material in the context of disciplinary and post disciplinary developments in sociology This is a major contribution to the field as well as a comprehensive and reliable guide to its main components William Outhwaite

Professor of Sociology School of European Studies University of Sussex It is hard to think of anything that has been left out in this masterly survey of contemporary historical sociology The editors have done a superb job in the selection of both themes and contributors We now at last have an up to date book to assign in our graduate courses on comparative historical sociology There s really nothing else like it out there The editors introduction is one of the best things I have read on how the field developed and the problems it has encountered Krishan Kumar William R Kenan Jr Professor of Sociology University of Virginia The range of topics covered and the number of distinguished scholars who have contributed to the handbook is impressive with leading figures such as Bryan S Turner John R Hall Gianfranco Poggi and Craig Calhoun among the contributors to a book that covers areas as diverse as post colonial historiography and the historical sociology of the city the handbook fills a void within the sizable literature on historical sociology and undoubtedly will be a useful addition to graduate reading lists The British Journal of Sociology What is important in historical sociology What are the main routes of development in the subject This Handbook consists of 26 chapters on historical sociology It is divided into three parts Part One is devoted to Foundations and covers Marx Weber evolutionary and functionalist approaches the Annales School Elias Nelson and Eisenstadt Part Two moves on to consider major approaches such as modernization approaches late Marxist approaches historical geography institutional approaches cultural history intellectual history postcolonial and genealogical approaches The third part is devoted to the major substantive themes in historical sociology ranging from state formation nationalism social movements classes patriarchy architecture religion and moral regulation to problems of periodization and East West divisions Each part includes an introduction that summarizes and contextualizes chapters A general introduction to the volume outlines the current situation of historical sociology after the cultural turn in the social sciences It argues that historical sociology is deeply divided between explanatory sociological approaches and more empirical and interpretative historical approaches Systematic and informative the book offers readers the most complete and authoritative guide to historical sociology
