Provided by publisher The Handbook of Social Capital Dario Castiglione, Jan W. van Deth, Guglielmo Wolleb, 2008-04-17 Social capital is a relatively new concept in the social sciences In the last twenty or so years it has come to indicate that networks of social relationships represent a resource for both the individual and society since they provide support for the individual and facilitate collective action Although this is not an entirely new idea the more systematic way in which social capital captures such an intuition has created a new theoretical paradigm and helped to develop a series of innovative research programmes in politics economics and the study of human well being The concept has gained currency beyond academia extending its influence to political and policy making circles at local national and international levels It has also affected the way in which social surveys are conceived and public policies assessed As the idea of social capital has spread the literature about it has increased exponentially After twenty years of rapid expansion it is time for a more considered and critical assessment of how the original concept has been adapted and refined and how successful its application has been The Handbook of Social Capital intends to do precisely that It offers a state of the art view of discussions about the concept of social capital and the way in which it has been applied in empirical research The organization of the Handbook reflects this intention by focusing on conceptual development and analysis in the first part by identifying two main areas of research in which social capital has favoured the development of new and influential research programmes political participation in democratic societies and economic development and by exploring the more normative and policy oriented consequences of social capital All chapters comprising the volume were specifically written for the Handbook by some of the main experts in the fields The book provides authoritative and innovative introduction to the study of social capital

Creation and Returns of Social Capital Henk Flap, Beate Völker, 2004-08-02 The idea of a social capital research program has become increasingly significant within the social sciences This collection of essays contributes

Social Capital and Economics Asimina Christoforou, John B. Davis, 2014-05-30 This volume provides a collection of critical new perspectives on social capital theory by examining how social values power relationships and social identity interact with social capital This book seeks to extend this theory into what have been largely under investigated domains and at the same time address long standing classic questions in the literature concerning the forms determinants and consequences of social capital Social capital can be understood in terms of social norms and networks It manifests itself in patterns of trust reciprocity and cooperation The authors argue that the degree to which and the different ways in which people exhibit these distinctively social behaviours depend on how norms and networks elicit their values reflect power relationships and draw on their social identities This volume accordingly adopts a variety of different concepts and measures that incorporate the variety of contextually specific factors that operate on social capital formation In addition it adopts an interdisciplinary outlook that combines a wide range of social science disciplines and methods of social research Our objective is to challenge standard rationality theory explanations of norms and networks which overlook the role of values power and identity This volume appeals to researchers and students in multiple social sciences including economics sociology political science social psychology history public policy and international relations that employ social capital concepts and methods in their research It can be seen as a set of new extensions of social capital theory in connection with its themes of social values power and identity that would advance the scholarly literature on social norms and networks and their impact on social change and public welfare
