Social Assistance Dynamics In Europe:

Social assistance dynamics in Europe Saraceno, Chiara, 2002-01-30 Throughout Europe income support for the poor has become highly controversial. It is often assumed to be not the answer to but the cause of social exclusion and is increasingly believed to give rise to welfare dependency. This book contributes to a more complex understanding of welfare state regimes and welfare recipients in contemporary Europe. Describing social assistance careers in different national and urban contexts, it documents the strong interplay between personal biographies and policy patterns, a particularly useful perspective which complements the more structural top down approach of much international work in social policy. Social assistance dynamics in Europe is unique in comparing a range of northern and southern European countries: Sweden, Germany, France, Italy, Spain, and Portugal, in its focus on the actual working of their policies, their set of actors, cultural background, implementation, etc. and in its methodological approach which combines longitudinal analysis with qualitative research. Academics and students of welfare and poverty, policy makers and social policy evaluators in the public, private, and non-profit sectors will find this book invaluable. *Social Assistance Dynamics in Europe* Chiara Saraceno, 2002-01-30

Describing social assistance careers in different national and urban contexts, this innovative book documents the strong interplay between personal biographies and policy patterns, a particularly useful perspective which complements the more structural top down approach of much international work in social policy. *The Responsiveness of Social Policies in Europe* Fenger, Menno, van der Steen, Martijn, 2013-09-18 Modern welfare states are confronted with a wide variety of social and economic developments including individualization, secularization, globalization, and changing preferences and ideologies of citizens. Using in-depth analysis gathered over 15 years, this book closely analyzes the consequences of these significant changes for social policies, offering theoretical and practical insights about their responsiveness. It includes a comparative analysis of recent developments in social assistance, sheltered work, and labour market policies in the Netherlands, showing how policy makers are continually trying to incorporate societal transformations into social policies while being obstructed by the path-dependent development of welfare state institutions. The insights from the case studies are related to developments in other European countries in the areas of social assistance, sheltered work, and labour market policies and show how policy makers and politicians deal with multiple challenges, interests, and perspectives on social policies. This book is essential reading for academics and students interested in the institutional development of social policies. **The Italian Welfare State in a European Perspective** Ugo Ascoli, Emmanuele Pavolini, 2016-06-01 There is a need to understand the Italian welfare state, but as yet it has received little academic research attention. *The Italian Welfare State in a European Perspective* is the first book to explore the evolution of Italy's welfare state in the decades since the Trente Glorieuses (1945-75). It offers a rare overview and analysis of the Italian situation based on an in-depth study of the main social policy fields, including education, higher education, and taxation policies, a detailed analysis of the connection between policies and their

outputs outcomes and a comparative perspective framing the Italian case within the European context This is the first English language book to take a comparative look at the Italian welfare state as a whole since the 2008 economic crisis It will be a valuable resource for academics and researchers as well as students

Combating Poverty in Local Welfare Systems Alexandru Panican,Håkan Johansson,2016-07-12 This book analyzes national anti poverty measures at a local level via a set of unique and up to date empirical studies of minimum income support schemes and activation measures in five European cities In examining this local welfare system approach it investigates the role that civil society organizations play and the governance arrangements that prevail in contacts between public and civil society actors in local anti poverty strategies The current financial and economic crisis has caused increasing levels of poverty and unemployment and put national minimum income protection schemes under severe strain Combating Poverty in Local Welfare Systems therefore represents a timely and important intervention in the political and scientific debates as to whether more local welfare is the solution to the challenges facing European welfare states

Framing Welfare Recipients in Political Discourse Lenka Kissová,2021-07-08 This book explores the shift towards individual responsibility that is increasingly evident in welfare systems across the world The book will be of interest to students and scholars across sociology social policy and political science with a particular focus on migration minorities political discourse securitisation social justice and human rights This book offers a compelling read

analysing how workfare is legitimated in the Central European context through the innovative metaphor of political farming. The analytical framework brings together several distinct streams of theorizing: critical discourse studies, critical security studies, governmentality, boundary making and the dynamics of ethnic relations seamlessly and effectively. Through a very nuanced discursive analysis, Kissov shows how the poor, the offenders and the unadaptable categories policymakers use to talk about material need recipients are linked pathologically with criminality, abuse of the system and other negative perceptions. This is a must read text for anyone interested in how political actors justify questionable legislation that cements inequality in today's neoliberal milieu.

B. Nadya Jaworsky, Associate Professor, Sociology, Masaryk University, Czech Republic

Lenka Kissov's book is clearly written and carefully researched. Her interdisciplinary insight and discursive analysis of parliamentary debates on Slovak workfare policies illustrates the deliberate, precise and politicized collocation of Roma marginalization and economic disadvantage in a manner that starkly illustrates systemic racism dressed up as morally necessary regulatory reform. Moreover, her research has broader comparative and methodological relevance given how she layers in and utilizes governmentality, securitization and legitimation theory, unmasking how neoliberal economic assumptions and dog whistle politics woven into the speech of politicians works to demonize recipients as real or potential cheats and criminals, enact further social exclusion and heighten inequality and fear while not so subtly promoting existing prejudices. Her overarching metaphor, that of parliamentarians engaging in political farming where their ideas seed and take root in fertile soil of the national landscape, resulting in regulatory products, effectively demonstrates how social reality generally and state regulation specifically can be constructed divorced from actual evidence, a process beyond her specific case and critically relevant to our times.

Rescaling Social Policies towards Multilevel Governance in Europe Yuri Kazepov, 2017-10-24 The workings of multi level governance institutional choices concerning centralisation decentralisation and subsidiarity are widely debated within European public policy but few systematic studies assessing the effects of changing divisions of power for policy making have been carried out This volume offers an assessment of the workings of multi level governance in terms of social welfare policy across different clusters of European states Nordic Southern European Central and East European This book reports on a major comparative study at the European Centre for Social Welfare policy and Research which included partners from universities in Finland France Italy Norway Sweden Poland Spain and Switzerland It reports on three particular policy areas social assistance and local policies against poverty activation and labour market policies and care for the elderly The authors describe different starting points strategies and solutions in European countries which are facing similar challenges and could thus learn from each other They explore the differences between European welfare regimes in terms of territorial responsibilities the changes that have taken place over the past few years and their effects The book is distinctive in highlighting comparative transversal and transnational issues of multi level governance in social welfare policies rather than presenting country reports

Perspectives on European Social Work Walter Lorenz, 2006-06-22 The book offers explanations and clarifications for the bewildering variety of titles and job profiles in the social professions in Europe It presents them both as a product of specific national welfare arrangements and as a sign of a special kind of professional autonomy that so far helped to correct national welfare trends Now this autonomy is once more called for in the light of the complete re structuring of all European welfare states and a European model of social work could deliver impulses for real alternatives to growing exclusion and inequality

The Boundaries of Welfare Maurizio Ferrera, 2005-11-24 To what extent has the process of European integration redrawn the boundaries of national welfare states What are the effects of such redrawing Boundaries count they are essential in bringing together individuals groups and territorial units and for activating or strengthening shared ties between them If the profile of boundaries changes over time we might expect significant consequences on bonding dynamics i e on the way solidarity is structured in a given political community The book addresses these two questions in a broad historical and comparative perspective The first chapter sets out a novel theoretical framework which reconceptualizes the welfare state as a bounded space characterized by a distinct spatial politics This reconceptualization takes as a starting point the state building tradition in political science and in particular the work of Stein Rokkan The second chapter briefly outlines the early emergence and expansion of European welfare states till World War II Chapters 3 and 4 analyse the relationship between domestic welfare state developments and the formation of a supranational European Community between the 1960s and the 2000s illustrating how the process of European integration has increasingly eroded the social sovereignty of the nation state Chapter 5 focuses on new emerging forms of sub national and trans national social protection while Chapter 6 discusses current trends and future perspectives for a restructuring of social protection at the EU level While there is no doubt that European integration has significantly altered the boundaries of national welfare destabilizing delicate political and institutional equilibria the book concludes by offering some suggestions on how a viable system of multi level social protection could possibly emerge within the new EU wide boundary configuration
