Social Capital And Democratic Transition:

Social Capital and the Transition to Democracy Gabriel Badescu, Eric Uslaner, 2004-06-01 The concept of social capital has been used by political scientists to explain both the transition to democracy in Eastern Europe and the decline of social cohesion in Western societies This edited collection presents the latest quantitative research on how post communist countries are adapting to Western models of society The book combines theoretical and institutional analysis with detailed case studies looking at Russia Poland Bulgaria Lithuania Romania and the former East Germany *The Myth of Civil Society* O. Encarnación, 2015-12-25 Almost irrespective of the geographic setting the debate about the future of democracy in post authoritarian societies is increasingly tied to the strength of civil society A strong civil society is thought to be crucial to the emergence of successful democracies while a weak civil society is deemed the cause of flawed or frozen democracies Using contrasting evidence from Spain and Brazil this study challenges these widespread assumptions about contemporary democratization It argues that it is the performance of political institutions rather than the configuration of civil society that determines the consolidation of democratic regimes *The Politics and Law of Democratic Transition* Sonia Zaman Khan, 2017-10-25 Peaceful legal and political changing of the guards is taken for granted in developed democracies but is not evident everywhere As a relatively new democracy marred by long periods of military rule Bangladesh has been encountering serious problems because of a prevailing culture of mistrust weak governance institutions constant election manipulation and a peculiar socio political history which between 1990 and 2011 led to a unique form of transitional remedy in the form of an unelected neutral caretaker government CTG during electoral transitions This book provides a contextual analysis of the CTG mechanism including its inception operation manipulation by the government of the day and abrupt demise It queries whether this constitutional provision even if presently abolished after overseeing four acceptable general elections actually remains a crucial tool to safeguard free and fair elections in Bangladesh Given the backdrop of the culture of mistrust the author examines whether holding national elections without a CTG or an umpire of some kind can settle the issue of credibility of a given government The book portrays that even the management of elections is a matter of applying pluralist approaches Considering the historical legacy and contemporary political trajectory of Bangladesh the cause of deep rooted mistrust is examined to better understand the rationale for the requirement emergence and workings of the CTG structure The book unveils that it is not only the lack of nation building measures and governments wish to remain in power at any cost which lay behind the problems that Bangladesh faces today Part of the problem is also the flawed logic of nation building on the foundation of Western democratic norms which may be unsuitable in a South Asian cultural environment Although democratic transitions on the crutch of the CTG have been useful in moments of crisis its abolition creates the need for a new or revised transitional modality perhaps akin to the CTG ethos to oversee electoral governance which will have to be renegotiated by the polity based on the people s will The book provides a valuable resource for researchers and academics

working in the area of constitutional law democratic transition legal pluralism and election law *The Politics and Memory of Democratic Transition* Diego Muro, Gregorio Alonso, 2010-11-23 Most accounts on the Spanish transition to democracy of the late 1970s are based on a false dilemma Its simplest formulation could be was it the pressure from below i e the organized working classes students and neighbors associations that triggered political change or was the elite settlement reached by the regime soft liners and the moderate sectors of the democratic opposition that established it This new and innovative volume appraises the movement towards a more democratic Spain from a variety of important perspectives the collection of essays sheds light on the wide range of crucial processes institutions and actors involved in the political transformation that operated in the Spanish instance of the Third Wave of democratization By making comparisons to other democratic transitions synthesizing the ideas of several leading Spanish History scholars as well as incorporating new voices involved in creating the directions of research to come *The Politics and Memory of Democratic Transition* offers a thorough and vital look at this key period in contemporary Spanish history taking stock of critical lessons to be gleaned from the Spanish Transition and pointing the way toward its future as a democratic nation *Trust and Transitions* Joseph D. Lewandowski, Milan Znoj, 2009-01-23 Employing a range of empirical and theoretical approaches contributors to this volume examine the nature and function of trust from within the framework of social capital theory The empirically oriented chapters focus on post Communist countries including Serbia and Montenegro Romania and especially the Czech Republic Indeed the collection contains an entire section devoted to analyzing trust and transition in the wake of the velvet revolution The theoretical chapters engage the work of Tocqueville Putnam and Uslaner among others as they seek to clarify and rethink what in fact trust is where trust originates the causal relevance of trust for successful marketization and democratization and the extent to which existing conceptions of social capital can be adequately deployed in diverse contexts With contributions from noted American and Central European political scientists sociologists and philosophers this book presents an illuminating set of contemporary perspectives on the complex role of trust in times of transition *Baltic Business and Socio-Economic Development 2007* Jost W. Kramer, Gunnar Prause, Jüri Sepp, 2010-12-06 Hauptbeschreibung The 3rd International Conference on Baltic Business and Socio Economic Development took place between 17th and 19th of June 2007 in Tallinn The conference provided an opportunity to discuss issues related particularly to assessment of socio economic development and business environment in the Baltic Sea Region the economic and financial situation of SMEs and possibilities of international co operation in the area of education activity With more than 100 participants the conference represented a great platform to disseminate knowledge on socio economic conditions for regi *Repression, Resistance, and Democratic Transition in Central America* Latin American Studies Association. International Congress, 2000 For Central America the last third of the 20th century was a time of dramatic change in which most countries shifted from dictatorships to formal political democracy This study demonstrates how revolt and revolution served as the motors of political change in

Central America The book examines the various ways in which democratic transition has taken place all of which have been distinct from countries in South America where democratization was relatively sudden and peaceful It analyzes the major forces shaping change in the region and provides the recent political history of all six Central American countries Nicaragua El Salvador Guatemala Honduras Costa Rica and Panama Each country s particular transition should add to the reader s understanding of democratization

Participatory Democracy and Political Participation Thomas Zittel,Dieter Fuchs,2006-11-22 A detailed new examination of the initiatives governments are exploring to reform the institutions and procedures of liberal democracy in order to provide more opportunities for political participation and inclusion Combining theory and empirical case studies this is a systematic evaluation of the most visible and explicit efforts to engineer political participation via institutional reforms Part I discusses the phenomenon of participatory engineering from a conceptual standpoint while parts II III and IV take a comparative as well as an empirical perspective The contributors to these sections analyze participatory institutions on the basis of empirical models of democracy such as direct democracy civil society and responsive government and analyze the impact of these models on political behaviour Part V includes exploratory regional case studies on specific reform initiatives that present descriptive accounts of the policies and politics of these reforms Delivering a detailed assessment of democratic reform this book will of strong interest to students and researchers of political theory democracy and comparative politics

Democratization Christian W. Haerpfer,Patrick Bernhagen,Christian Welzel,Ronald Inglehart,2019 Democratization is the first textbook to focus on the global wave of democratization that has been occurring since around 1970 Bringing together leading authors from diverse international backgrounds it introduces students to the theoretical and practical dimensions of the subject in an authoritative accessible and systematic way The book takes into account the international factors that affect politics at the level of the nation state showing students the direction in which the discipline is moving It is accompanied by an innovative companion website that provides numerous resources for students and instructors Democratization covers several key themes including 1 Theories of democratization and their relation to democratic theory 2 Critical prerequisites and driving social forces of democratic transition 3 Pivotal actors and institutions involved in democratization 4 Conditions for democratic survival the consolidation of newly democratized countries and the analysis of failed democratization 5 Demonstrations of how these factors have played a role in the different regions in which the global wave of democratization has transplanted authoritarian and communist systems 6 Possible futures of democratization worldwide

Citizens, Democracy, and Markets Around the Pacific Rim Russell J. Dalton,To-ch'öl Sin,2006-11-02 East Asia is one of the most dynamic areas of political change in the world today what role do citizens play in these processes of change Drawing upon a unique set of coordinated public opinion surveys conducted by the World Values Survey this book provides a dramatically new image of the political cultures of East Asia Most East Asian citizens have strong democratic aspirations even in still autocratic nations Most East Asians support

liberal market reforms even in nations where state socialism has been dominant. The book's findings thus provide a new perspective on the political values of Asian publics. We demonstrate that the dramatic socioeconomic changes of the past several decades have transformed public opinion, altering many of the social norms traditionally identified with Asian values and creating public support for further political and economic modernization of the region. Political culture in East Asia is not an impediment to change but creates the potential for even greater democratization and marketization.

Comparative Politics is a series for students and teachers of political science that deals with contemporary government and politics. The General Editors are Max Kaase, Professor of Political Science, Vice President and Dean, School of Humanities and Social Science, International University Bremen, Germany, and Kenneth Newton, Professor of Comparative Politics, University of Southampton. The series is produced in association with the European Consortium for Political Research.
