Morrison, William M. Block, M. Dale Strickland, Bret A. Collier, Markus J. Peterson, 2008-03-21 We developed the first edition of this book because we perceived a need for a compilation on study design with application to studies of the ecology conservation and management of wildlife We felt that the need for coverage of study design in one source was strong and although a few books and monographs existed on some of the topics that we covered no single work attempted to synthesize the many facets of wildlife study design We decided to develop this second edition because our original goal synthesis of study design remains strong and because we each gathered a substantial body of new material with which we could update and expand each chapter Several of us also used the first edition as the basis for workshops and graduate teaching which provided us with many valuable suggestions from readers on how to improve the text In particular Morrison received a detailed review from the graduate students in his *Wildlife Study Design* course at Texas A M University We also paid heed to the reviews of the first edition that appeared in the literature Principles of Assessment and Outcome Measurement for Occupational Therapists and Physiotherapists Alison Laver Fawcett, 2013-03-15 This textbook on assessment and outcome measurement is written for both occupational therapy and physiotherapy students and qualified therapists It begins by defining what is meant by assessment outcome evaluation and measurement and discussing the complexity of therapy assessment and measurement including the challenge of measuring human behaviour and the impact of factors such as task demand and context including the environment Methods of data collection e g observation interview standardised testing and sources e g self report proxy for collecting information about clients are then reviewed and the main purposes of assessment e g descriptive evaluative

predictive discriminative presented The book then addresses the topics of standardisation levels of measurement reliability validity and clinical utility There is a chapter describing and applying models for categorizing levels of function to aid assessment and measurement The concept of clinical reasoning and reflective practice is then explored Application of principles is supported through detailed case studies and worksheets and the criteria for test critique and guidelines for choosing a particular assessment approach are discussed
