## **Teaching And Learning History In Elementary School:**

**Teaching and Learning History in Elementary Schools** Jere E. Brophy, Bruce VanSledright, 1997-01-01 In clear concise language this book deals with fundamental issues that must be addressed if teachers are to construct coherent and powerful history curricula including What are the purposes and goals that different types of teachers establish for their history teaching and What do children know and think about history and what are the teaching implications for our schools This book represents a major advance in developing a knowledge base about children s historical learning and thinking that applies to history teaching some of the principles involved in teaching for understanding and conceptual change teaching methods that have been so successful in other school subjects      **In Search of America's Past** Bruce

VanSledright, 2002-04-12 Offers alternatives to conventional textbook learning for history students describing the use of in depth historical projects and investigations that result in better retention of knowledge      *Doing History* Linda S.

Levstik, Keith C. Barton, 2011-01-26 Now in its fourth edition this popular text offers a unique perspective on teaching and learning history in the elementary and middle grades Through case studies of teachers and students in diverse classrooms and from diverse backgrounds it shows children engaging in authentic historical investigations often in the context of an integrated social studies curriculum The central assumption is that children can engage in valid forms of historical inquiry collecting and data analysis examining the perspectives of people in the past considering multiple interpretations and creating evidence based historical accounts In each chapter the authors explain how the teaching demonstrated in the vignettes reflects basic principles of contemporary learning theory thus providing specific examples of successful activities and placing them in a theoretical context that allows teachers to adapt and apply them in a wide variety of settings New in the Fourth Edition Expanded coverage of world history in two new chapters Integration of new technologies to support history instruction Updated classroom examples bibliographies and references      **Teaching History in the Elementary**

**School** John D. Hoge, 1988      **Historical Literacy** Paul A. Gagnon, 1989 Essays on the teaching of history as the core of social studies in the schools      *Teaching of History in Elementary and Secondary Schools* Henry Johnson, 1915

**Teaching of History in Elementary and Secondary Schools** Harry Johnson, 1921      Knowing, Teaching, and Learning History Peter N. Stearns, Peter Seixas, Sam Wineburg, 2000-09 This four part volume identifies the problems and issues in late 20th and early 21st century history education working towards an understanding of this evolving field It aims to give both students and teachers insights into the best way of developing historical understanding in pupils      *The Challenge of Rethinking History Education* Bruce VanSledright, 2010-09-13 In *The Challenge of Rethinking History Education* Bruce A VanSledright argues for a more inquiry oriented approach to history teaching and learning that fosters a sense of citizenship through the critical skills of historical investigation      **A Handbook for History Teachers** Dorothy Dymond, 2023-11-06 First Published in 1929 A Handbook for History Teachers is an attempt on the part of a number of teachers many of them

members of the S E London branch of the Historical Association to offer some practical help in the choice of historical material for children It discusses themes like schemes of work in elementary junior and senior schools textbooks for pupils under fifteen class library books for pupils under fifteen book lists for teachers and sources for the preparation of history stories by the teacher This is an essential read for history teachers and education *The Palgrave Handbook of History and Social Studies Education* Christopher W. Berg, Theodore M. Christou, 2020-04-03 This Handbook presents an international collection of essays examining history education past and present Framing recent curriculum reforms in Canada and in the United States in light of a century long debate between the relationship between theory and practice this collection contextualizes the debate by exploring the evolution of history and social studies education within their state or national contexts With contributions ranging from Canada Finland New Zealand Sweden the Netherlands the Republic of South Africa the United Kingdom and the United States chapters illuminate the ways in which curriculum theorists and academic researchers are working with curriculum developers and educators to translate and refine notions of historical thinking or inquiry as well as pedagogical practice **Researching History Education** Linda S. Levstik, Keith C. Barton, 2018-02-06 The authors research is well known and among the most important American works being done on how children learn history It is thus a great idea to gather this pivotal research in one place The volume offers a new perspective through the authors reflections on the research process It is profound without pomposity ideal for the intended audience the tone is just right There really isn't another book that does what this one does Stephen J Thornton University of South Florida Researching History Education combines a selection of Linda Levstik's and Keith Barton's previous work on teaching and learning history with their reflections on the process of research These studies address students ideas about time evidence significance and agency as well as classroom contexts of history education and broader social influences on students and teacher's thinking These pieces widely cited in history and social studies education and typically required reading for students in the area were chosen to illustrate major themes in the authors own work and trends in recent research on history education In a series of new chapters written especially for this volume the authors introduce and reflect on their empirical studies and address three issues suggested in the title of the volume theory method and context Although research on children's and adolescents historical understanding has been the most active area of scholarship in social studies in recent years as yet there is little in depth attention to research methodologies or to the perspectives on children history and historical thinking that these methodologies represent This book fills that need The authors hope is that it will help scholars draw from the existing body of literature in order to participate in more meaningful conversations about the teaching and learning of history Researching History Education provides a needed resource for novice and experienced researchers and will be especially useful in research methodology courses both in social studies and more generally because of its emphasis on techniques for interviewing children the impact of theory on research and the importance of cross cultural comparisons *Resources in*

*Education*, 2001      **How Students Learn** National Research Council, Division of Behavioral and Social Sciences and Education, Committee on How People Learn, A Targeted Report for Teachers, 2004-12-23 How do you get a fourth grader excited about history How do you even begin to persuade high school students that mathematical functions are relevant to their everyday lives In this volume practical questions that confront every classroom teacher are addressed using the latest exciting research on cognition teaching and learning How Students Learn History Mathematics and Science in the Classroom builds on the discoveries detailed in the bestselling How People Learn Now these findings are presented in a way that teachers can use immediately to revitalize their work in the classroom for even greater effectiveness Organized for utility the book explores how the principles of learning can be applied in teaching history science and math topics at three levels elementary middle and high school Leading educators explain in detail how they developed successful curricula and teaching approaches presenting strategies that serve as models for curriculum development and classroom instruction Their recounting of personal teaching experiences lends strength and warmth to this volume The book explores the importance of balancing students knowledge of historical fact against their understanding of concepts such as change and cause and their skills in assessing historical accounts It discusses how to build straightforward science experiments into true understanding of scientific principles And it shows how to overcome the difficulties in teaching math to generate real insight and reasoning in math students It also features illustrated suggestions for classroom activities How Students Learn offers a highly useful blend of principle and practice It will be important not only to teachers administrators curriculum designers and teacher educators but also to parents and the larger community concerned about children s education      The Teaching American History Project Rachel G. Ragland, Kelly A. Woestman, 2010-05-26 This collection of essays and research reports from participants in The Teaching American History Project provides models for historians teachers teacher educators and others interested in the teaching and learning of American History and presents examples of lessons learned from a cross section of TAH projects      *Teaching and Learning in History* Ola Hallden, 2012-10-12 Research on history instruction and learning is emerging as an exciting new field of inquiry The editors prepared this volume because the field is at an important moment in its development a stage where there is research of sufficient depth and breadth to warrant a collection of representative pieces The field of research on history teaching and learning connects with both traditional research on social studies and with recent cognitive analyses of domains such as mathematics and physics However the newer research goes beyond these activities as well Where traditional research approaches to social studies instruction and learning have focused on curriculum they have avoided the study of purely disciplinary features the textual components of history and the concomitant demands as well as the nature of various learners Where recent cognitive analyses of mathematics and physics have dealt with misconceptions and knowledge construction they have avoided topics such as perspective taking interpretation and rhetorical layerings The new work by contrast has been concerned with these issues as well as the careful analyses of the

nature of historical tasks and the nature of disciplinary and instructional explanations The lines of research presented in these chapters are both compelling and diverse and include a range of topical questions such as What affects the quality of teaching How are historical documents interpreted in the writing of history How is history explained What are the classroom demands on an elementary school social studies teacher What does text accomplish or fail to accomplish in educational settings How do teachers think about particular topics for history teaching Although much of the research reflects a grounding in or the influence of cognitive psychology not all of it derives from that tradition Traditions of rhetoric curriculum analysis and developmental psychology are also woven throughout the chapters The editors envision this volume as a contribution to educational research in a subject matter and as a tool for practitioners concerned with the improvement of instruction in history They also anticipate that it will contribute to cognitive science

*Teaching History for the Common Good* Keith C. Barton, Linda S. Levstik, 2004-07-13 In *Teaching History for the Common Good* Barton and Levstik present a clear overview of competing ideas among educators historians politicians and the public about the nature and purpose of teaching history and they evaluate these debates in light of current research on students historical thinking In many cases disagreements about what should be taught to the nation's children and how it should be presented reflect fundamental differences that will not easily be resolved A central premise of this book though is that systematic theory and research can play an important role in such debates by providing evidence of how students think how their ideas interact with the information they encounter both in school and out and how these ideas differ across contexts Such evidence is needed as an alternative to the untested assumptions that plague so many discussions of history education The authors review research on students historical thinking and set it in the theoretical context of mediated action an approach that calls attention to the concrete actions that people undertake the human agents responsible for such actions the cultural tools that aid and constrain them their purposes and their social contexts They explain how this theory allows educators to address the breadth of practices settings purposes and tools that influence students developing understanding of the past as well as how it provides an alternative to the academic discipline of history as a way of making decisions about teaching and learning the subject in schools Beyond simply describing the factors that influence students thinking Barton and Levstik evaluate their implications for historical understanding and civic engagement They base these evaluations not on the disciplinary study of history but on the purpose of social education preparing students for participation in a pluralist democracy Their ultimate concern is how history can help citizens engage in collaboration toward the common good In *Teaching History for the Common Good* Barton and Levstik discuss the contribution of theory and research explain the theory of mediated action and how it guides their analysis and describe research on children's and adults knowledge of and interest in history lay out a vision of pluralist participatory democracy and its relationship to the humanistic study of history as a basis for evaluating the perspectives on the past that influence students learning explore four principal stances toward history identification analysis

moral response and exhibition review research on the extent to which children and adolescents understand and accept each of these and examine how the stances might contribute to or detract from participation in a pluralist democracy address six of the principal tools of history narrative structure stories of individual achievement and motivation national narratives inquiry empathy as perspective taking and empathy as caring and review research and conventional wisdom on teachers knowledge and practice and argue that for teachers to embrace investigative multi perspectival approaches to history they need more than knowledge of content and pedagogy they need a guiding purpose that can be fulfilled only by these approaches and preparation for participatory democracy provides such purpose Teaching History for the Common Good is essential reading for history and social studies professionals researchers teacher educators and students as well as for policymakers parents and members of the general public who are interested in history education or in students thinking and learning about the subject      *Teaching History and Social Studies to English Language Learners* Luciana C. de Oliveira, Kathryn M. Obenchain, 2017-12-12 This book investigates the preparation of secondary history and social studies SS teachers to teach English language learners ELLs in twenty first century classrooms This edited collection focuses on the ways in which pre service and in service teachers have developed or may develop instructional effectiveness for working with ELLs in the secondary history and social studies classroom The authors address a variety of standards and content examples including the National Council for Social Studies C3 Framework and Curriculum Standards the Common Core State Standards for English Language Arts and content from history geography and civics This volume is part of a set of four edited books focused on teaching the key content areas to English language learners      **History Education and the Construction of National Identities** Mario Carretero, Mikel Asensio, María Rodríguez-Moneo, 2013-01-01 How is history represented As just a record of the past as a part of a present identity or as future goals This book explores how historical contents and narratives are presented in school textbooks and other cultural productions museums monuments etc and also how they are understood by students in the context of increasing globalization In these contemporary conditions the relation between history learning processes in and out of school and the construction of national identities presents an ever more important topic It is being studied by looking at the appropriation of historical narratives which are frequently based on the official history of a nation state Most of the chapters in this volume are educational studies about how the learning of history takes place in school settings of different countries such as Canada France Germany Latin America Spain the Netherlands the United Kingdom and the United States Covering such a broad sample of cultural and national contexts they provide a rich reflection on history as a subject related to patriotism cosmopolitanism both or neither      *Handbook of Research on Learning and Instruction* Richard E. Mayer, Patricia A. Alexander, 2011-02-15 During the past twenty years researchers have made exciting progress in the science of learning i e how people learn and the science of instruction i e how to help people learn This Handbook examines learning and instruction in a variety of classroom and non classroom environments and with a

variety of learners both K 16 students and adult learners The chapters are written by leading researchers from around the world all of whom are highly regarded experts on their particular topics The book is divided into two sections learning and instruction The learning section consists of chapters on how people learn in reading writing mathematics science history second languages and physical education as well as learning to think critically learning to self monitor and learning with motivation The instruction section consists of chapters on effective instructional methods feedback examples self explanation peer interaction cooperative learning inquiry discussion tutoring visualizations and computer simulations Each chapter reviews empirical research in a specific domain and is structured as follows Introduction Defines key constructs and provides illustrative examples or cases Historical Overview Summarizes the historical context for the topic or domain Theoretical Framework Summarizes major models or theories related to the topic or domain Current Trends and Issues Synthesizes the research literature and highlights key findings or conclusions Practical Implications Suggests relevance of the research for educational practice Future Directions Considers next steps or stages needed for future research
