Counselling Skills for Health Professionals Philip Burnard,Jo Campling,2013-11-11 This is the second edition of a book that I hope continues to be of practical value For counselling must always be that practical No amount of talking on its own can really make a difference if people do not end up doing something as a result of counselling The practical thread remains an important one throughout this edition Counselling Skills for Health Professionals is not just a how to do it book people are probably too complicated for that approach to be of much use Counselling is never simply a matter of learning a range of skills which you then apply in a range of settings In the end counselling is about facing the person in front of you listening to them carefully and then supporting them as they work through their problems For many problems there are no easy answers and counselling doesn't offer any quick fixes It is essentially a supportive process There are many things it cannot do It cannot change certain social and political situations It cannot cure diseases On the other hand what it can do is offer people more hope Often just the fact that there is someone who is prepared to hear your story and to listen to you is all that is needed I remain convinced that the key issue in all types of counselling is the ability to listen

that you set up quite badly That is probably not such a terrible thing besides that should be part of the process of using this book As you read it notice when rules are broken Check the phrasing the sentence and paragraph construction and see whether or not I have stuck to the rules Then see whether or not the rules would have improved the passage in question Begin to read books as much for their style layout and general format as for their content If you are going to write you need to see plenty of examples of all of these things good bad and indifferent to write for some time but was always This is a book I have wanted nervous of writing so here it is an introduction to some of the ways and means of writing It is as I say personal I hope it will be useful A word about sexism and the writing process I find the use of his or her and its variants clumsy

Working with the Mentally Disordered Offender in the Community Phillip J. Vaughan, Douglas Badger, 2013-12-20 In the past forensic psychiatry has been a sub speciality of general psychiatry without its own separate identity However since the mid 1980s there has been a growing interest in the application of community care principles to mentally disordered offenders A new set of attitudes have developed which have enabled the mentally disordered offender to emerge from relative institutional obscurity to a much higher profile in the community Although numerically small in relation to the general psychiatric population forensic patients tend to attract the public's attention by virtue of their greater propensity for troublesome behaviour Such a group needs expert community support in order to maintain an acceptable public face Unfortunately these developments have outstripped the creation of training opportunities for community staff charged with their support and supervision Most community practitioners have had to learn on the job with inadequate support and supervision from senior staff who often have less direct experience of working with this client group than themselves Just such a situation prompted the authors in 1990 to establish a module on Working with Mentally Disordered Offenders in the Community as part of an MA in Social Work at the University of Reading As the course developed it became clear that the topic and content had equal application to other community professionals working in the field *Teaching, Assessing and Evaluation for Clinical Competence* Mary Neary, 2000 This is a highly practical introduction to teaching assessing and evaluating students for all health care practitioners It encourages the reader to take a self directed approach to their own development as assessors Mary Neary has produced an ideal text for health professionals preparing to take on the role of mentor supervisor or assessor OVERALL THIS IS A WELL WRITTEN AND CONCEIVED BOOK PACKED WITH KNOWLEDGE AND IDEAS Nursing Standard *Spinal Cord Injury Rehabilitation* Karen Whalley Hammell, 2013-12-11 *The Teacher Practitioner and Mentor in Nursing, Midwifery, Health Visiting and the Social Services* Peter Jarvis, Sheila Gibson, 1997 The extensive revisions and additions to this text reflect the changes in the way in which teaching and learning take place within health care education The roles of the teacher practitioner and the mentor are defined and discussed in detail and the importance of relationships within the education process is explored The authors also examine new developments in adult learning and the concept of the learning experience with particular emphasis on reflective practice and quality
