The comprehensiveness and the interdisciplinary range of themes are impressive and they make the Handbook into a wonderful tool for teachers and students of women's and gender studies. Nina Lykke, Linköping University. Gender and women's studies is one of the most challenging fields within the social sciences; the dynamics of gender relations and the social and cultural implications of gender constructions offer a lively forum of debate. The Handbook of Gender and Women's Studies presents a comprehensive and engaging review of the most recent developments within the field, including the study of masculinity, the feminist implications of postmodernism, the cultural turn, and globalization. The authors review current research and offer critical analyses of women's and gender studies in work, the welfare state, family, education, religion, violence, and war, and feminist global politics. Edited by three leading academics from Europe and the United States and with 25 chapters written by scholars based throughout the world, the Handbook situates the most important debates in the field within a uniquely international and interdisciplinary context. The Handbook is a useful introduction to gender theory and an exciting starting point for fresh debates.

First published in 1985, the Handbook for Achieving Gender Equity Through Education quickly established itself as the essential reference work concerning gender equity in education. This new expanded edition provides a 20-year retrospective of the field, one that has the great advantage of documenting U.S. national data on the gains and losses in the efforts to advance gender equality through policies such as Title IX, the landmark federal law prohibiting sex discrimination in education equity programs and research. Key features include Expertise: Like its predecessor, over 200 expert authors and reviewers provide accurate, consensus research-based information on the nature of gender equity challenges and what is needed to meet them at all levels of education. Content Area Focus: The analysis of gender equity within specific curriculum areas has been expanded from 6 to 10 chapters, including mathematics, science, and engineering. Global Diversity Focus: Global gender equity is addressed in a separate chapter as well as in numerous other chapters. The expanded section on gender equity strategies for diverse populations contains seven chapters on African Americans, Latinas/os, Asian and Pacific Island Americans, American Indians, gifted students, students with disabilities, and lesbian, gay, bisexual, and transgender students. Action Oriented: All chapters contain practical recommendations for making education activities and outcomes more gender equitable. A final chapter consolidates individual chapter recommendations for educators, policymakers, and researchers to achieve gender equity in and through education. New Material: Expanded from 25 to 31 chapters, this new edition includes more emphasis on male gender equity.
