Literacy, Libraries and Learning Ray Doiron, Marlene Asselin, 2005. The school library has changed dramatically. Today it is a portal to a world of learning that includes traditional books, digital resources, and online environments. As the importance of information and communication technologies grows, teachers and teacher librarians hold the key to creating powerful learning opportunities that help students function more effectively. This comprehensive guide discusses the changing responsibilities of classroom teachers and teacher librarians in helping students become better readers, writers, and researchers. It offers suggestions for re-inventing the school library by offering a better and more current selection of resources, instilling students with the reading habit, and supporting them in these key areas: promoting reading for learning and pleasure, improving critical literacy skills when using information from many sources, encouraging research methods that respect copyright and lead to original work, designing information tasks to help students work effectively with data, developing better informational text structures that increase comprehension, encouraging the integration of emerging technologies and traditional resources. *Literacy, Libraries and Learning* argues that using diverse learning resources can improve literacy achievement. It shows teachers and teacher librarians how to turn their schools into first-rate learning environments and their students into lifelong learners. *American Book Publishing Record*, 1985.
