Quality of Higher Education Yihuan Zou,2022-09-01 Quality in higher education was not invented in recent decades universities have always possessed mechanisms for assuring the quality of their work The rising concern over quality is closely related to the changes in higher education and its social context Among others the most conspicuous changes are the massive expansion diversification and increased cost in higher education and new mechanisms of accountability initiated by the state With these changes the traditional internally enacted academic quality keeping has been given an important external dimension quality assurance which requires higher education institutions to continuously demonstrate and improve

performance and which also provides new systems of rewards and sanctions However the complex impacts of quality assurance policies have shown a need to further understand the quality issue in higher education This book is about constructing a more inclusive understanding of quality in higher education through combining the macro meso and micro levels i e from the perspectives of national policy higher education institutions as organizations in society individual teaching staff and students It covers both theoretical constructions for understanding quality and empirical investigation in the Chinese context The questions addressed are How is quality of higher education perceived by the institution teaching staff and students respectively What are the main concerns for the institution teaching staff and students in their own pursuit of quality It has been concluded that quality of higher education is not only about educational quality but also about expanding life chances for the students prosperity in the administrative system for the teaching staff and organizational prosperity for the institution With regard to quality assurance and accountability in higher education special attention should be given to the values pursued and be careful to balance between immediate single value efficiency and sustainable development and a wider range of values that higher education serves

Making a Difference in the Classroom Sandra J. Balli, 2009-04-16 This book offers experiences and important lessons about teaching and classroom life at all grade levels illuminating the perspective of both teachers and students Knitting teacher and student voices together this book inspires practicing teachers and those who are learning to teach with universal insights drawn from elementary school middle school high school and college

What Teachers Need to Know Matthew Bruce Etherington, 2017-03-31 Every generation has sought to make teaching and learning more inclusive and equitable but pesky questions always remain such as how can teaching and learning be conducted in ways that satisfies and respects everyone What are the parameters of an inclusive pedagogy Who defines its principles How should these principles be taught and by whom And by what authority shall they be grounded These types of thorny questions occupy the essence of educators and the authors of this book This book is about teachers educators and topics related to inclusion Teachers and educators have a lot to know therefore the topics are broad and relevant to the times What should teachers know about special needs religion and spirituality Aboriginality the environment tolerance and school choice Although teachers have knowledge of their subject matter knowledge alone is not sufficient They must know and understand how people learn A teacher must also care deeply about who they teach And this teacher knowledge grows and changes over time as teachers become more experienced informed skilled and wiser At the same time no teacher preparation will be sufficient because there will always be discussions that were never had and knowledge that was never shared Time has its costs and there is only so much a formal education can prepare someone This book helps to satisfy a cavity in learning for teachers and educators in general

Today Everyone Learns Vivian Arzu, 2022-11-03 How often have you felt like you are not teaching but speaking to yourself and wondering why you always get the student that others have ignored Have you ever taught students who struggle to learn because it seems that everyone's given up on them

How amazing would it be to be the one who can reach these students Help is on the way Today Everyone Learns will help you do the following Prove that every student can learn Stop trying to unlock the minds of children and adults with the wrong key and provide you with the tools you need to develop new keys Empower your students to believe in themselves and in their ability to learn Become a world class teacher

Introduction to the Foundations of American Education James Allen Johnson,1988 **Quarterly Review of the Evangelical Lutheran Church** ,1910 **How to Teach without Instructing**

Rolf Arnold,2015-06-03 Teaching and learning are two interrelated terms used to express our thinking about a major aspect of human development However didactics developed into an art the art of teaching while the processes of learning were neglected and not researched Nowadays many people perceive learning as an undesirable activity The experience of learning is thought of as something expected of them from the outside and it is often remembered as stressful a pressure to perform a fear of failure and alienation But there are also some enriching experiences such as the joy of discovery to ultimately achieve after many attempts something that you could not do previously or to see a situation in a new light How to Teach Without Instructing relinks teaching and learning It examines the teaching practices in institutions of learning and formulates rules that assist teachers in their efforts to focus their teaching on the learner The rules are based on situations that are routinely encountered in the teaching environment

Obaku Zen Helen J. Baroni,2000-01-01 This is the first detailed English language study of the Obaku branch of Japanese Zen Beginning with the founding of the sect in Japan by Chinese monks in the seventeenth century the volume describes the conflicts and maneuverings within the Buddhist and secular communities that led to the emergence of Obaku as a distinctive institution during the early Tokugawa period Throughout the author explores a wide range of texts and includes excerpts from important primary documents such as the Zenrin shuheishu and the Obaku geki translated here for the first time She provides an impressive portrait of the founding Chinese leadership and the first generation of Japanese converts whose work enabled the fledgling sect to grow and take its place beside existing branches of the closely related Rinzaï Zen sect Obaku s distinctive Chinese practices and characteristics set it apart from its Japanese counterparts In an innovative investigation of these differences the author uses techniques derived from the contemporary study of new religious movements in the West to explain both Obaku s successes and failures in its relations with other Japanese Buddhist sects She illuminates the role of government support in the initial establishment of the main monastery Mampuku ji and the ongoing involvement of the bakufu and the imperial family in Obaku s early development Hers is a thorough and well governed analysis that brings to the fore a religious movement that has been much neglected in Japanese and Western scholarship despite its tremendous influence on modern Japanese Buddhism as a whole [AP English Literature and Composition Premium, 2024: 8 Practice Tests + Comprehensive Review + Online Practice](#) George

Liberating The Learner Terry Atkinson, Guy Caxton, Marilyn Osborn, Mike Wallace, 2013-12-16

There is clear evidence that the quality of children's learning in school is very dependant on the style of the teacher's approach and the learning environment he or she creates. This in turn is a reflection of teachers own beliefs, anxieties and enthusiasms about learning often gained through their own educational experiences. This edited volume provides a new framework for exploring teachers views on a whole range of professional issues for instance the nature of teaching and learning, the needs of students and their own abilities as learners. Within this is presented a variety of case studies which illustrate how teachers views impact upon students learning. The book builds on the well established assumption that teachers are themselves also learners and that the learning processes involved in professional development are in many ways the same as those involved in a classroom context. It shows how the conclusions drawn from this study can be used in a practical way to assist teachers professional development throughout their career. All teacher trainers and mentors who take seriously their role of helping children to be resourceful, resilient and reflective learners will find that this book helps them to achieve this aim.

Advances in Medical Education Mr. Rohit Manglik, 2024-03-13
