Teaching Written Expression:

Every Child Can Write! R. D. Walshe, 1981 Noting the improvement that has occurred in the teaching of writing since the introduction of the process approach to instruction this book offers suggestions for still more improvement and for solving the problems that arise in the teaching of writing The first section of the book stresses the importance of letting children write and of building a curriculum on writing while the second section discusses the various stages of the writing process and how they can be incorporated into a balanced writing program The third section reviews writing topics detailing the problems of imposed topics and the secrets of successful ones In addition this section offers suggestions for assisting children in developing their topics in a number of subject areas The fourth section discusses the conference approach to writing stressing both its difficulties and its strengths The fifth section poses 10 questions teachers should ask about writing including 1 What is the importance of writing 2 What differences are there between speech and writing 3 What are the stages in writing development and 4 How can poetry writing be taught The sixth section contains six special studies dealing with children's writing and the last section offers tips for writing teachers in the areas of language usage grammar and style

Method Mania Lynne Ecenbarger, 2007-10 Success in school in work and in life can be greatly enhanced by the ability to write effectively And due to the writing process revolution we are gradually improving the quality of writing The writing process focuses on exploring metacognitively what writers actually do throughout a writing task how real writers go about constructing texts Teachers work closely with students helping them to understand writing as a communication and learning process The importance of the creation expression and comprehension of meaning is emphasized throughout the process Because writing is a complex process students need to progress through a number of levels not necessarily in a linear fashion to experience the process Too often students approach writing with a one and done mentality failing to recognize that complex writing cannot be accomplished in a single sitting in a single draft We need to help them realize that successful writers are reflective about their writing processes and habits learning what procedures work best and adapting them to suit particular situations The best forum for implementing the writing process into the classroom is through a writer's workshop A typical writer's workshop is a block of time scheduled each day for students to work through the steps in the process It is important to remember that writing should extend across the curriculum If a block of writing time can't be scheduled for one day it should be integrated into another subject Writing should be viewed as a means of communicating and emerge naturally out of other activities Teachers should make writing so integral to each lesson that the flow of the class is smooth from mental to verbal to written communication Teachers using the workshop approach do not ignore the product and parts of language Instead the product is considered within the process Grammar and mechanics are taught in the context of use In the past the teaching of formal grammar usually displaced some instruction and practice in actual composition Unfortunately with our overcrowded curriculum teachers can't afford to spend excessive class time on decontextualized grammar exercises

that involve little or no actual composition Students should be given daily opportunities to explore writing and create written text for various purposes We know that writing is a powerful tool that can influence others and clarify one's own thoughts Teaching the writing process through the workshop approach can give students the key to unlocking this powerful tool And the activities in this book are designed to help make the process easier for teachers to pick up and implement today You will find over 200 mini lessons designed to stimulate critical and creative thinking that can be applied to written composition in all phases of the writing process Students will continue to recognize that adults who use these activities in the context of authentic literacy lessons are those who are committed to facilitating and promoting only the very best of writers

Written Expression Disorders N. Gregg, 2012-12-06 A critical review of the literature on written expression disorders of individuals with learning disabilities The purpose of the book is to shed light on issues concerning definition assessment and interaction for individuals with writing disorders The integrated model of written expression offered draws on the work of cognitive psychology neurolinguistics and sociolinguistics The model illustrates the interrelationship between cognitive and affective processing networks that influence the selection and use of linguistics and information structures in producing a written text Particularly noteworthy aspects of this book are the emphasis on the role

of writing in developing higher mental functions other texts on writing disorders have placed greater emphasis on lower order aspects not only the addition and integration of the sociolinguistic dimension into the model of writing but also the inclusion of guidelines for assessing this dimension specification of needed research in which both populations and tasks have been carefully defined and finally notice of the importance of a continuum for defining assessing and treating each component of written expression This state of the art work on disorders of writing is of interest to both researchers and clinicians concerned with written expression disorders in children and or adults
