Understanding and Teaching Reading Emerald Dechant, 2013-09-13 In the words of Aldous Huxley Every man who knows how to read has it in his power to magnify himself to multiply the ways in which he exists to make his life full significant and interesting Few people question the value of reading in fact most extol its virtues As our culture becomes more complex reading plays an increasingly greater role in satisfying personal needs and in promoting social awareness and growth In the last 20 years the teaching of this invaluable skill has focused so intensely on comprehension and prediction from context that it has lost sight of the significance of automaticity and fluency in the word identification process Reading is a synthesis of word recognition and comprehension thus this text is about these basic processes and their integration A common plea from teachers today is that research and psychology be translated into teaching behavior Therefore the aim of this book is twofold one to identify report organize and discuss those bits of data research and theory that are most relevant to the teacher s understanding of the reading process and two to help educators to interpret and apply theory and research data to everyday classroom teaching as well as to the problems encountered frequently in developmental and remedial teaching *Teaching Children to Read* Great Britain. Good, 1987 Language and Language-in-Education Planning in the Pacific Basin R.B. Kaplan, Richard B. Baldauf Jr., 2013-03-14 *Language and Language in Education Planning in the Pacific Basin* examines and reviews the ecological context including e g the historical political and educational issues of language planning in 14 countries in the Pacific basin Japan the two Koreas Taiwan the Philippines Indonesia Malaysia Brunei Darussalam Singapore Australia New Zealand Papua New Guinea the Solomon Islands and Vanuatu The planning goals pursued in these states are then examined in terms of an overarching view of language planning The book provides the only up to date overview and review of language policy in the region and challenges those interested in language policy and planning to think about how such goals might be achieved in the context of language ecology In a

world where languages and their uses and users are changing rapidly and where governments and other political bodies are driving planned language change there is a need to understand and consider how and why language planning is done The book will be of interest to specialists interested in language and education and to more general readers wishing to understand the dynamics of history and politics and its impact on language and language in education policy decisions
