

Autonomy in Language Learning

- Teachers' role

- In order to help learners to develop autonomy in their process of acquiring the language,
- a teacher should consider three domains (for different levels of autonomy)

1. Communication through language
2. Learning process
3. Students' personal life

The Routledge Handbook of Language Learning and Teaching Beyond the Classroom Hayo Reinders, Chun Lai, Pia Sundqvist, 2022-05-30 Informal language learning beyond the classroom plays an important and growing role in language learning and teaching This Handbook brings together the existing body of research and unites the various disciplines that have explored this area in order to present the current state of knowledge in one accessible resource Much of adult learning takes place outside of formal education and for language learning it is likely that out of class experiences play an equally important role It is therefore surprising that the role of informal language learning has received little attention over the years with the vast majority of research instead focusing on the classroom Researchers from a range of backgrounds however have started to realise the important contribution of informal language learning both in its own right and in its relationship with classroom learning Studies in the areas of learner autonomy learning strategies study abroad language support learners voices computer mediated communication mobile assisted language learning digital gaming and many others all add to our understanding of the complex and intersecting ways in which learners construct their own language learning experiences drawing from a wide range of resources including materials teachers self study technology other learners and native speakers This Handbook provides a sound and comprehensive basis for researchers and graduate students to build upon in their own research of language learning and teaching beyond the classroom

Hybrid Learning in English Language Teaching Okon Effiong, Bill Batziakas, Karima Ben Abbes, 2023-12-19 This collection of chapters offers readers diverse perspectives on English Language Teaching along with various closely related theoretical constructs and pedagogical tools such as motivation learner autonomy and technology

Amalgamating these constructs provides a much needed theoretical grounding by using empirical studies. The chapters vary in their focus and reflect on classroom practices and yield findings pertaining to a wide range of topics. As such it will be of interest to a wide range of English Language Teaching professionals from university instructors to schoolteachers. This edited volume broadens the conceptual boundaries of language learning theories, offers insights and directions into the future of hybrid teaching and learning and adds a new line of enquiry emanating from empirical findings. This book will also be useful in professional development seminars and workshops that support multilingual learners, teacher trainers and trainer teachers.

International Handbook of English Language Teaching Jim Cummins, Chris Davison, 2007-12-31. This two volume handbook provides a comprehensive examination of policy, practice, research and theory related to English language teaching (ELT) in international contexts. Nearly 70 chapters highlight the research foundation for the best practices, frameworks for policy decisions and areas of consensus and controversy in the teaching and development of English as a second and/or additional language for kindergarten through to adult speakers of languages other than English. In doing so it problematizes traditional dichotomies and challenges the very terms that provide the traditional foundations of the field. A wide range of terms has been used to refer to the key players involved in the teaching and learning of the English language and to the enterprise of English language teaching as a whole. At various times and in different contexts the following labels have been used in countries where English is the dominant language to describe programs, learners or teachers of English: English as a second language (ESL), English as an additional language (EAL), limited English proficient (LEP) and English language learners (ELL). In contexts where English is not the dominant language the following terms have been used: English as a foreign language (EFL), English as an international language (EIL) and English as a lingua franca (ELF).

Teaching English to Speakers of Other Languages David Nunan, 2015-02-11. David Nunan's dynamic learner centered teaching style has informed and inspired countless TESOL educators around the world. In this fresh, straightforward introduction to teaching English to speakers of other languages, he presents teaching techniques and procedures along with the underlying theory and principles. Complex theories and research studies are explained in a clear and comprehensible yet non-trivial manner without trivializing them. Practical examples of how to develop teaching materials and tasks from sound principles provide rich illustrations of theoretical constructs. The content is presented through a lively variety of different textual genres including classroom vignettes showing language teaching in action, question and answer sessions and opportunities to eavesdrop on small group discussions among teachers and teachers in preparation. Readers get involved through engaging interactive pedagogical features and opportunities for reflection and personal application. Each chapter follows the same format so that readers know what to expect as they work through the text. Key terms are defined in a Glossary at the end of the book. David Nunan's own reflections and commentaries throughout enrich the direct up-close style of the text.

Essential Competencies for English-medium University Teaching Ruth Breeze, Carmen Sancho Guinda, 2016-10-06. As English gains prominence as the

language of higher education across the world many institutions and lecturers are becoming increasingly concerned with the implications of this trend for the quality of university teaching and learning With an innovative approach in both theme and scope this book addresses four major competencies that are essential to ensure the effectiveness of English medium higher education creativity critical thinking autonomy and motivation It offers an integrated perspective both theoretical and practical which defines these competences from different angles within ELT and Applied Linguistics while also exploring their points of contact and applications to classroom routines This approach is intended to provide practical guidance and inspiration in the form of pedagogical proposals examples of teaching practice and cutting edge research by scholars and university teachers from all over the world To that end a leading specialist in the field introduces each of the four competencies explaining concepts accessibly and synthetically exposing false myths presenting an updated state of the art and opening windows for future studies These introductions are followed by practitioner chapters written by teachers and scholars from different cultures and university contexts who reflect on their experience and or research and share effective procedures and suggestions for the university class with English as a vehicle for instruction
