Illustrations Learning to Be Literate: More Than a Single Story Deborah MacPhee,Patricia Paugh,2023-04-04 There is not one right way to teach a child to read Recent media stories about education have featured the Science of Reading whose proponents typically present the systematic teaching of phonics as a one size fits all method that guarantees reading success for all students But as literacy scholars Patricia Paugh and Deborah MacPhee demonstrate the decoding of words is only one of many skills that are central to an effective early literacy education In *Learning to Be Literate* they present a four part framework for active literacy learning that eschews oppositional arguments about different approaches and instead situates children as meaning makers the whole point of being literate There is no single or simple solution that will fit every child But by using the ALL framework to inform instruction educators can help young learners think deeply about ideas and language at the same time as they learn to work out the sounds and symbol systems of language Learning to Read and Write Susan B. Neuman,Carol Copple,Sue Bredekamp,2000 Strategies to promote literacy competence Raising Readers Steven Bialostok,1992 This bestselling book helps teachers answer all the questions that parents ask about their children s reading It helps make parents partners not adversaries in the learning process by explaining how current ways to teach reading correspond to the natural ways in which children acquire language Includes sections on how to choose good books for children commonly asked questions and more
