Commissioned papers and literature review Michael Sturgis Knapp, Patrick M. Shields, 1990 **Invention as a Social Act** Karen Burke LeFevre, 1987 Building on the work of rhetoricians philosophers linguists and theorists in other disciplines Karen Burke LeFevre challenges a widely held view of rhetorical invention as the act of an atomistic individual She proposes that invention be viewed as a social act in which individuals interact dialectically with society and culture in distinctive ways

Speaking About Writing Peter Smagorinsky, 1994-04-29 This is not a how to do book it is a why to do book What is powerful about these chapters is that they are theory driven and they thus allow us as researchers to understand when and why particular methodologies are appropriate for investigating particular problems in particular situations The book is therefore in an important sense a why you shouldn't book because the authors deliberate on how the motivating theory for research is tied to the theoretical grounds for choosing a methodology The authors grasp and reflect on the need for a researcher to fully understand a methodology's power and its limitations They urge researchers to consistently pose the questions Why should I use this method What does it yield What lens does it provide for the problem I am investigating What must I account for in employing it Speaking About Writing provides not only a range of methodologies to consider for the

investigation of writing but situating them in the context of one another enables the reader to consider the relative merits of each Above all the authors stress that research is driven by problems rather than methods and that premise helps researchers consider what is potentially available through the tools provided by different methodologies William Smith University of Pittsburgh Used as a comprehensive text and research tool *Speaking About Writing* focuses on the issues involved in the collection analysis and interpretation of data The approach goes beyond mere quantitative qualitative differences to examine and critique the very underpinnings and assumptions of the distinct methodologies Distinguished scholars discuss different writing methods stimulated recall think aloud analysis retrospective analysis and intervention analysis Contributors in discourse analysis look at the ways in which individuals interact with other members of the writing community during a more extended writing process problem discussion draft feedback and revision and teacher conferences Finally concluding chapters allow for responses from critics to earlier chapters in order to provide clarification and explanation *Speaking About Writing* is the perfect text for scholars and students in written communication composition and english communication research methods and psychology cognition **Toward a Grammar of Passages** Richard M. Coe,Conference on College Composition and Communication (U.S.),1988 Richard M Coe has developed such a grammar one which uses a simple graphic instrument to analyze the meaningful relationships between sentences in a passage and to clarify the function of structure in discourse Working in the tradition of Christensen s generative rhetoric Coe presents a two dimensional graphic matrix that effectively analyzes the logical relations between statements by mapping coordinate subordinate and superordinate relationships Coe demonstrates the power of his discourse matrix by applying it to a variety of significant problems such as how to demonstrate discourse differences between cultures especially between Chinese and English how to explain precisely what is bad about the structure of passages that do not work and how best to teach structure This new view of the structure of passages helps to articulate crucial questions about the relations between form and function language thought and culture cognitive and social processes **Writing and Reading Differently** George Douglas Atkins,Michael L. Johnson,1985 Resounding the Rhetorical Byron Hawk,2018-07-31 *Resounding the Rhetorical* offers an original critical and theoretical examination of composition as a quasi object As composition flourishes in multiple media digital sonic visual etc Byron Hawk seeks to connect new materialism with current composition scholarship and critical theory Using sound and music as his examples he demonstrates how a quasi object can and does materialize for communicative and affective expression and becomes a useful mechanism for the study and execution of composition as a discipline Through careful readings of Serres Latour Deleuze Heidegger and others Hawk reconstructs key concepts in the field including composition process research collaboration publics and rhetoric His work delivers a cutting edge response to the state of the field where it is headed and the possibilities for postprocess and postwriting composition and rhetoric

Contemporary Composition Studies Edith Babin, Kimberly Harrison, 1999-12-30 Composition studies is a rapidly growing and constantly changing field At present however graduate students new to the field and writing teachers who want to make new connections between theory and practice have little choice of current reference works that define key terms in composition studies and provide information about the scholars and researchers who have shaped and are shaping the discipline This book supplies this information in an easily accessible format and places both scholars and terms in the context of the field s development Included are alphabetically arranged entries for 108 individuals who have developed the field and 128 terms central to the discipline The first part of the book provides entries for leaders in composition studies Each entry identifies the areas in which the scholar has contributed most influentially to the field and provides both a chronological overview of the person s contributions and a bibliography of representative works The second part includes entries for terms that are problematic both for newcomers and for those already familiar with the discipline The entries for the terms show how the disciplinary context has shaped the ways in which they have been used The entries also indicate how established thinkers in composition studies and other disciplines have explained or defined the terms provide examples of the terms in context and list scholars often associated with them An appendix includes entries for scholars from other disciplines who have contributed to the field

A Rhetoric of Doing Stephen Paul Witte, Neil Nakadate, Roger Dennis Cherry, 1992 Concerned with both the nature and the practice of discourse the eighteen essays collected here treat rhetoric as a dynamic enterprise of inquiry exploration and application and in doing so reflect James L. Kinneavy s firm belief in the vital relationship between theory and practice his commitment to a spirit of accommodation and assimilation that promotes the development of ever more powerful theories

and ever more useful practices A thorough introduction provides the reader with clear summaries of the essays by leading edge theorists researchers and teachers of writing and rhetoric A field context for the ideas presented in this book is provided through the division of the various chapters into four major sections that focus on classical rhetoric and rhetorical theory in historical contexts on dimensions of discourse theory aspects of discourse communities and the sorts of knowledge people access and use in producing written texts on writing in school related contexts and on several dimensions of nonacademic writing A fifth section contains a bibliographic survey and an appreciation of James Kinneavy s work The exceptional range of these essays makes A Rhetoric of Doing an ecumenical examination of the current state of mind in rhetoric and written communication a survey and description of what discourse and those in the field of discourse are in fact doing
