Teaching Elementary Science Whos Afraid Of Spiders:

The New Teaching Elementary Science Selma Wassermann, J. W. George Ivany, 1996-01-01 This book is designed for teachers to be and practicing teachers who want to teach science with confidence and for those who are fearful of trying It presents an inquiry oriented method instead of a smorgasbord of approaches that capitalizes on children s natural curiosity by emphasizing scientific exploration The book removes the fear of teaching science by encouraging teachers to be scientific inquirers themselves learning side by side with their students The text features a theoretical model of inquiry based teaching Play Debrief Replay that incorporates elements of investigative play with critical thinking skills In the longest chapter 60 fully developed field tested investigative science activities are included to promote experiential learning and concept development Anxieties about teaching science are addressed head on and dealt with sensitively and thoughtfully

Teaching Science to Children Mary D. Iatridis, Miriam Marecek, 1993 First Published in 1993 Routledge is an imprint of Taylor Francis an informa company

Drawn Toward Transformation Nadine Kalin, 2009-01-01 This book examines the transformative potential of collaborative teacher research Specifically Kalin shares the perspectives of educators as they investigate the teaching and learning of drawing within their own elementary classrooms and within the context of an action research group The innovative a r tographic design of the project provides a rich balance between the arts and educational research as it allows for the complex unfolding of relational transformation alongside the artistic renditions of each person exploring their understandings of drawing The products and processes of this book provide alternative approaches for the design of future pre service and in service programs that aim to serve teachers as learners rather than teachers as teachers In this vein the book offers worthy insights into how the arts and collaborative action research groups assist participants in finding other ways of seeing imaging and knowing the world The book will appeal to practitioners teacher educators educational researchers as well as those interested in professional development complexity thinking curriculum studies collaborative action research and arts based educational research methodologies

Rethinking Teacher Education Selma Wassermann, 2022-02-28 The book offers concrete and specific suggestions for improving teacher education programs including improved strategies for selection into the program key ingredients for pre service course work courses that emphasis skill development in critical areas of teaching practice and more effective evaluation of student teaching that emphasizes professional development

Changing Times In Teacher Education Marvin F. Wideen, Peter P. Grimmett, 2013-05-13 Pressures for reform in teacher education have begun to take on the same sense of urgency as school reform Those faculties of education who have been strong advocates for change in the schools now find themselves the subject of similar pressures from governmental policy makers Attempts at change have taken place in many different countries and jurisdictions around the world This book details through a series of international vignettes how teachers are responding to the changing times and social contexts in which they do their work The authors hold the view that changes are inevitable in teacher education but what is not clear is who will control the changes and whether the end result will actually improve the preparation of teachers The theme of the book is that the reform of teacher education should be informed by intelligent debate and that any attempt to restructure teacher preparation should result from a careful reconceptualisation of its purposes and processes

Evaluation without Tears Selma Wassermann, 2020-01-15 Teachers evaluate students work constantly It is a built in part of the job of teaching Yet what is hardly acknowledged is the subjectivity and unfairness of evaluation Although grades and marks have long been discounted as having any reliability or validity they endure as real and exact measures of ability and performance Not only are they specious they have little or nothing to do with the important goal of evaluation that is to provide feedback to learners that

enables their subsequent growth Evaluation Without Tears provides teachers with specific examples of how they might provide evaluative feedback to students that is enabling and affirming rather than punishing respectful of the learner and protective of the learner's dignity recognizing that one person's judgment is not truth Teaching students to self assess an important dimension of growth and maturity is a significant feature of the book The Early Childhood Curriculum Carol Seefeldt,1999-01-01 This third edition of The Early Childhood Curriculum provides the same coverage as the first edition and brings it up to date Individual chapters present the research and practice of early childhood education by areas of curriculum content play oral language reading mathematics science social studies movement music and art Introductory chapters include an overview of current developments in early education as well as a discussion of teaching strategies It includes two new chapters on inclusion and the multicultural world of the early childhood classroom an overview of current developments in the field **The Parallel Curriculum** Carol Ann Tomlinson,Sandra N. Kaplan,Joseph S. Renzulli,Jeanne H. Purcell,Jann H. Leppien,Deborah E. Burns,Cindy A. Strickland,Marcia B. Imbeau,2008-10-22 Engage students with a rich curriculum that strengthens their capacity as learners and thinkers Every learner is somewhere on a path toward expertise in a content area This resource promotes a model for developing high quality curriculum that moves learners along the continuum toward expertise and provides sample units and rubrics to help implement differentiated curriculum Teachers can use four curriculum parallels that incorporate Ascending Intellectual Demand to Determine current student performance levels Appropriately challenge all students in each subject area Extend the abilities of students who perform at advanced levels Provide learning activities that elevate analytical critical and creative thinking **Teaching for Thinking Today** Selma Wassermann,2015-04-24 This is the inspiring story of a group of teachers that engaged in inquiry about their own practice in order to support inquiry learning in their students The Supporting Knowledge Integration for Inquiry Practice SKIIP is an exciting new professional development program that brings together the strengths and benefits of several existing models participant directed inquiry school university partnerships and the shared pedagogical improvement model of Japanese lesson study Based on the work of urban public school teachers over the course of three years the SKIIP approach was developed to assist teachers in the daunting task of integrating new pedagogies curricula and technologies into their practice Inspiring Active Learning Merrill Harmin,Melanie Toth,2006 How can we structure class time efficiently How can we explain and lecture effectively How can we help students master content How can we make learning more real and lasting In this revised and greatly expanded 2nd edition of Inspiring Active Learning educators Merrill Harmin and Melanie Toth provide answers to our fundamental teaching questions and show us how to transform our classrooms into communities of active responsible learners The authors present an array of research based teacher tested strategies for managing our everyday responsibilities from beginning a class to grading homework from instructing large groups to promoting diligent seatwork from motivating slackers to handling disrupters These strategies focus on mutual respect not bossiness

collaboration not isolation commitment to learning not fear of failure and the dignity of all not praise or rewards for a few Regardless of our level of experience or the grade or subject we teach the active learning approach helps us Perform routine teaching tasks more easily Discover a higher level of teaching success and personal satisfaction Establish a class climate of full participation and cooperation Prepare engaging lessons that keep students productively involved Encourage students to work energetically willingly and intelligently each day Inspire all students even the most challenging to strive for excellence With its detailed classroom examples and more than 250 practical strategies Inspiring Active Learning is a comprehensive reference for solving almost any teaching problem *Seeing Young Children with New Eyes* Sydney Gurewitz

Clemens, Leslie Gleim, 2014-09-15 This book gives adults who work with young children a substantial look at some thoughtful creative reflective modes of thinking about their work It has rich resources for the teacher who wants to grow in respect for children s capabilities and lessons for growing one s ability to listen to the intentions of children It is rich in examples of real teaching in real American classrooms influenced by work in Reggio Emilia Italy For teachers and also for parents of children from 2-6 Written by and for teachers of young children this exhaustive examination of early education is rigorous and thorough **Mastering the Art of Teaching** Selma Wassermann, 2021-01-15 The complexity of what teachers do is

incomprehensible to anyone who has not lived the experience If one examines in detail the multi dimensional multi layered multi faceted acts that a teacher performs each teaching day it almost defies belief for it is beyond heroic Done well the impact is to influence students for all the days of their lives Done well it leaves students altered for the better It takes a trained observer to perceive and comprehend the various acts both overt and subtle that a teacher carries out during the course of a school day This is the onus of this book to make explicit the professional tasks of a teacher in today s fast changing world where technology is rapidly replacing human interactions where disinformation is daily fed to a gullible public where funding and professional resources for schools are never enough where students come to school carrying physical and emotional burdens that would daunt most adults where the tasks of teachers are more demanding and more heartbreaking than ever before How a teacher gives his or her all and yet manages to keep at the job without burning out is a significant feature of this book Not only are these professional tasks identified and explained but suggestions are offered for how new and practicing teachers may further hone those skills that each task demands Knowing the tasks is not enough learning to apply them successfully is the key to becoming that master teacher *Schooling for Life* Jacqueline Grennon

Brooks, 2002-08-15 Brooks goes inside the classroom to present contrasting examples of schooling that honors the complexity of learning and life and schooling that ignores it **Serious Players in the Primary Classroom** Selma

Wassermann, 2000-07 After 10 years of accolades for *Serious Players in the Primary Classroom* Empowering Children Through Active Learning Experiences Selma Wassermann provides readers with a second edition to her classic Building on the original work this new edition offers further insight into Wassermann s notion of organizing for instruction known as Play

Debrief Replay a way of structuring curriculum experiences to promote children's active learning in cooperative groups and to foster independent thinking The book also provides a theoretical framework for implementing teaching for thinking in primary classrooms By updating references and adding a new chapter on moral dilemmas including information that is consonant with constructivist ideologies Wassermann continues to promote ways of teaching that stimulate children's appreciation for social and ethical issues Her approach is holistic it not only honors the play of children but also the work of teachers Accessible and enlightening this new edition is a must read for all early childhood professionals Parents too will find this volume useful

What's the Right Thing to Do? Selma Wassermann, 2019-05-24 Making choices is one of the more pervasive acts of life Almost every action we take demands that choices be made Knowing how to choose wisely to choose after reflection to be aware of what motivates that choice to see the consequences of that choice on others enables us to live healthier more productive and more responsible lives We now live in a world in which our traditional moral exemplars have been less than honorable in their public behavior With fewer heroes and flawed role models how are children to come to an understanding of what's right what's good decent and socially responsible Do as I say not as I do is hardly a viable tenet to guide children's choices This book offers important tools for carrying out effective strategies that build caring environments in the classroom and home for teaching children to weigh decisions in the face of potential consequences examine rationales for their choices and study the effects of their choices on others i e to think more carefully about ethical problems in the presence of the moral freedom to determine for themselves what it means to lead a good and virtuous life

Early Childhood Curriculum Nancy Amanda Branscombe, Jan Gunnels Burcham, Kathryn Castle, Elaine Surbeck, 2013-07-24 Through its unique integration of curriculum and learning principles *Early Childhood Curriculum A Constructivist Perspective* 2nd Edition fosters authentic developmentally appropriate practice for both preschool and early elementary classrooms The constructivist format of this book encourages active involvement on the part of readers by asking them to observe question reflect research and analyze thus allowing readers to create their own knowledge through their responses and actions *Early Childhood Curriculum* examines curricular goals such as autonomy development and problem solving and links those goals with constructivist principles of learning It explores ways teachers can create meaningful learning environments and choose curriculum tasks appropriately in all content areas that are linked to the learning and development needs of young children The text provides a wealth of practical detail about implementing constructivist curriculum as the authors discuss classroom climate and management room design play and cooperative learning among other topics The book also includes information about how teachers can meet required mandates and national and state standards in appropriate ways as they plan their curriculum and examines the early childhood educator's role with community agencies reform and legal mandates and public relations Special Features Curriculum Strategies highlight models for developing curriculum including projects curricular alignment integration of various subject matter areas and types of knowledge Constructions promote problem solving by

allowing students to explore revisit examine and learn from first hand experience Multiple Perspectives from the Field provide interviews with teachers and other early childhood professionals offering students a realistic look at the profession from a diverse group of educators Teacher Dialogues explore a wide range of student concerns including curriculum learning environments assessment and documentation representing a collaborative support group for pre service teachers and readers
