Teaching For Commitment Liberal Education Indoctrination And Christian Nurture:

Teaching for Commitment Elmer John Thiessen, 1993 Elmer Thiessen provides a comprehensive critical survey of the debate concerning indoctrination especially in the context of confessional religious education His central aim is to establish that indoctrination as a result of religious instruction is neither inevitable nor as probable as is often assumed by advocates of liberal education Thiessen recognizes that indoctrination can occur in Christian homes and schools He believes however that before the charge of indoctrination can be correctly evaluated we need to develop a more coherent concept of the term He provides a critical examination of the four criteria traditionally associated with indoctrination content method intention and consequences and of the institutional context of indoctrination

The Outrageous Idea of Christian Teaching Perry Glanzer, Nathan Alleman, 2019-07-29 Hundreds of thousands of professors claim Christian as their primary identity and teaching as their primary vocational responsibility Yet in the contemporary university the intersection of these two identities often is a source of fear misunderstanding and moral confusion How does being a Christian change one's teaching Indeed should it Inspired by George Marsden's 1997 book *The Outrageous Idea of Christian Scholarship* this book draws on a survey of more than 2 300 Christian professors from 48 different institutions in North America to reveal a wide range of thinking about faith informed teaching Placing these empirical findings alongside the wider scholarly conversation about the role of identity informed teaching Perry L Glanzer and Nathan F Alleman argue that their Christian identity can and should inform professors teaching in the contemporary pluralistic university The authors provide a nuanced alternative to those who advocate for restraining the influence of one's extra professional identity and those who in the name of authenticity promote the full integration of one's primary identity into the classroom The book charts new ground regarding how professors think about Christian teaching specifically as well as how they should approach identity informed teaching more generally

Communicating Faith John Sullivan, 2011 This book enriches appreciation of the many ways that Christian faith is communicated It casts light on the sensitivities skills and qualities necessary for the effective communication of faith where justice is done both to the seed to be sown and to the soil being cultivated

Even When No One is Looking Jan Hábl, 2018-09-21 This book is not a list or an overview of various theories of ethics Nor is it a didactic manual for specific teaching units on moral education aimed at some group based on age or a particular theme although some educational frameworks will be proposed As the title suggests the book intends to seek the starting points or foundations without which no moral education would be possible The goal is to formulate and tackle the key questions that precede all moral education What makes good vs evil language possible and meaningful Can virtue be taught and learned What makes our actions good What is the condition of human nature Are we naturally good or evil What constitutes an educator's right to morally influence anyone else not just a child What is the goal of moral education What does a morally educated person look like And how can we ensure the coveted moral result Or in the words of Jan Amos Comenius the teacher of nations how to educate a person to

not only know what is good but also to want what is good and to do what is good even when no one is looking **Mere Education** Mark A Pike,2013-09-26 The word mere is used in the title of this book in its Middle English sense as an adjective nothing less than complete This book is about schooling for a fair and vibrant society it is about an education of hope education that completes a person In *The Magician's Nephew* 1955 the first in C S Lewis Chronicles of Narnia series Digory and Polly are dragged back through time into a world that is *Religion in Education* William K. Andrew B. Morris,2024-01-23 The existence of state supported Catholic and other faith based schools in the UK has become a matter of controversy in recent years as the previously tolerant acceptance of their role in the English educational system has come under attack This book seeks to explain to both proponents and sceptics of religiously based educational provision how the maintained Catholic sector originated what it seeks to do and its contribution to society It describes the Church's understanding of the primacy of parents in the education of their children and the limits of the state's legitimate role The book will be of value to anyone interested in understanding Catholic schools those who send their children to them and those who are working and teaching in them or aspire to do so **Pentecostal and Charismatic Education** William K.

Kay,Ewen H. Butler,2023-08-29 The enormous Pentecostal and charismatic movement often called Renewalist has highlighted the power of the Holy Spirit but has rarely emphasized the movement's educational range and reach Formal and informal teaching in many schools colleges seminaries church campuses homes and parachurches all contribute to a scattered and varied teaching impetus Pentecostal and Charismatic Education Renewalist Education Wherever it is Found looks at education through the eyes of those who see God at work in the world through the church and beyond The book explores questions like What should parents look for in a child's education and what choices do they have What educational

role can churches have This book offers a worldview invested with traditional Christian theology but also enlivened by an understanding of the continuing outpouring of the Holy Spirit **Pedagogy and Education for Life** Trevor H.

Cairney,2018-04-30 There are many books on Christian education but few consider pedagogy with a biblical focus on formation and a grounding in varied related disciplines This book seeks to recapture the term pedagogy and place it at the center of the teacher s role not as a pseudonym for other things but as the critical foundation for the orchestration of classroom life This is a view of pedagogy that accepts that children come to classrooms as inhabitants of multiple and varied communities Some are known and shared with teachers but many are not Children cannot be left to find their way in the world for as they encounter competing and contradictory worlds their hopes dreams and intentions are shaped Teachers play a key role in students formation by shaping classroom life for all of life is used by God to reveal himself The things taught the priorities set and activities planned the experiences structured and books shared indeed everything in and outside school acts upon and shapes our students Pedagogy is the vehicle for shaping the life of the school Learning requires more than subject content and good teaching The central task of teachers is the development of a pedagogy that shapes life This book offers challenge and guidance as teachers engage in this noble task In Defence of Religious Schools and Colleges Elmer John Thiessen,2001 It is often argued that religious schools and colleges promote intolerance divisiveness and fanaticism and that they violate the principle of academic freedom Some writers also suggest that economic support for religious schools by the state violates the principle of the separation of church and state Elmer Thiessen provides a philosophical defence of religious schools and colleges against these and other standard objections He concludes with a radical proposal a pluralistic educational system will better prepare students for citizenship in pluralist liberal democracies than a monopolistic state maintained school system In placing his argument within the context of liberal democratic values Thiessen gives concrete examples of objections to religious schools and offers practical suggestions that follow from the philosophical treatment of the problem In Defence of Religious Schools and Colleges bridges the gap between philosophical argument and educational practice It will be of interest not only to philosophers and educational theorists but also to practitioners in education Academics policy makers political theorists lay people teachers administrators and parents those who object to religious schools and colleges and those who find themselves trying to answer the objections will benefit from reading this book

Children, Religion and the Ethics of Influence John Tillson,2019-06-13 In Children Religion and the Ethics of Influence John Tillson develops a theory concerning which kinds of formative influence are morally permissible impermissible or obligatory Applying this theory to the case of religion he argues that religious initiation in childhood is morally impermissible whether conducted by parents teachers or others Tillson addresses questions such as how we come to have the ethical responsibilities we do how we understand religion how ethical and religious commitments can be justified and what makes children ethically special Encyclopedia of Christian Education George Thomas Kurian,Mark A. A Report from the Front Lines Michael Shahan, 2009 In tribute to the ongoing influence of Robert Benne director of the Center for Religion and Society at Roanoke College fourteen of his friends and colleagues have produced A Report from the Front Lines in which they consider the role of theology in the public arena at this turn of the twenty first century They speak powerfully to the cultural paralysis of the Western world where educated leaders claim that morality must not interfere with science or public policy by showing the

relevance of orthodox Christianity to humanity's most pressing problems. The constant theme weaving through the volume is Benne's own conviction that Christians can and must engage in the public square with positions forged out of their religious commitments using arguments whose presuppositions allow room for special revelation but whose resultant logic is translated into a shared universal rationality.
