Teaching Functional Language Language Intervention Series:

Teaching Functional Language Steven F. Warren, Ann K. Rogers-Warren, 1985 **Teaching English Learners in Inclusive Classrooms** Elva Duran, 2020-08-11 This newly revised text *Teaching English Learners in Inclusive Classrooms* updates and expands upon issues of great concern to those working with students who are English learners as well as having special learning challenges. Given the unacceptable school drop out rates of these students, this book provides practical tools and strategies for educators to approach the unique learning needs of these students. It draws upon the most current laws and research in the interconnected fields of bilingual and multicultural education, language and literacy, and special needs. Additionally, Dr. Durán draws upon her extensive experiences via classroom teaching, university level instruction, and textbook writing in these fields to present a highly useful compendium of ideas. The range of chapters exemplifies the width and breadth of this material. A sampling of these chapters includes topics such as functional language teaching, students with more extensive needs, working with cross cultural and linguistic diverse students in the U.S. and Central America, helping students with autism, and includes information in the area of transition for mild, moderate, and students with more extensive needs. There is also information as before on literacy and a chapter in the content subjects as it relates to social studies, as well as a chapter on families of cross cultural students. Many of the chapters look to use of direct instruction approaches that have proven to be successful strategies in addressing these educational areas. Teachers and teacher trainers will find this clear, well-written text to be an invaluable resource in addressing the needs of myriad and unique students.

Effective Practices for Children with Autism James K. Luiselli, Dennis C. Russo, Walter P. Christian, Susan M. Wilczynski, 2008-03-13 Children who have autism require comprehensive educational and treatment services. There are a myriad of approaches currently recommended to practitioners and parents, but little is known about their efficacy. Which are the most effective in teaching skills, overcoming behavior challenges, and improving quality of life? Methods must be based in research settings but be easily extended to real world settings where children with autism live, go to school, socialize, and recreate. Identifying and validating effective practices is a complex and multi-faceted process, but an essential one for responsible research and practice. This book brings together multiple and contemporary perspectives on intervention effectiveness for autism education and behavior support. With contributors from a variety of disciplines and orientations, *Effective Practices for Children with Autism* presents a critical appraisal of current practice standards, emphasizing empirically supported procedures and research to practice applications. By bringing together a diverse group of authors, the editors have ensured that the vast field of information on interventions for children with autism is thoroughly examined and that no topic has gone untouched. Written for practitioners, research scientists, and clinicians, the book is an essential framework for evaluating educational and treatment procedures, selecting those that are most effective, and evaluating outcomes.
