Developing Language Concepts Bridget Burrows, 2017-07-05 This book is a valuable resource for all speech language therapists teachers and support assistants working with children in schools and community clinics It provides practical step by step photocopiable programmes to help with specific language concepts such as amount colour size time and shape The programmes are intended for speech language therapists to copy and send to the school where staff can deliver the programmes although they can be used by the therapist themselves Clearly set out the exercises can be personalised for

each child and are graded so that the therapist can select and copy the sheets relevant to the child's needs. Each programme introduces the concept, teaches it, and then checks to see if the child understands it. There is also practical advice on setting up therapy programmes in schools, such as setting up appointments, working in the school with children, staff, and parents, covering letters to send with the programme, how to write programmes, and many other useful tips.

Language and Linguistics in Context Harriet Luria, Deborah M. Seymour, Trudy Smoke, 2012-12-06

Taking a sociocultural and educational approach, *Language and Linguistics in Context: Readings and Applications for Teachers* introduces basic linguistic concepts and current perspectives on language acquisition, considers the role of linguistic change, especially in English, in the politics of language, acknowledges the role of linguists in current policies involving language, offers insights into the relationship between the structure of language systems and first and second language acquisition, the study of language across culture, class, race, gender, and ethnicity, and between language study and literacy and education, and provides readers with a basis for understanding current educational debates about bilingual education, non-standard dialects, English-only movements, literacy methodologies, and generally the importance to teaching of the study of language. The text is organized into three thematic units: What is Language and How is It Acquired; How Does Language Change; and What is Literacy. To achieve both breadth and depth, that is, to provide a big picture view of basic linguistics and at the same time make it specific enough for the beginner, a selection of readings, including personal language narratives, is provided to both introduce and clarify linguistic concepts. The readings, by well-known theoretical and applied linguists and researchers from various disciplines, are diverse in level and range of topics and vary in level of linguistic formalism.

Pedagogical features: This text is designed for a range of courses in English and language arts, bilingualism, applied linguistics, and ESL courses in teacher education programs. Each unit contains a substantive introduction to the topic, followed by the readings. Each reading concludes with Questions to Think About, including one Extending Your Understanding question, and a short list of Terms to Define. Each unit ends with additional Extending Your Understanding and Making Connections activities that engage readers in applying what they have read to teaching and suggested projects, and a bibliography of Print and Web Resources. The readings and apparatus are arranged so that the material can be modified to fit many course plans and schemes of presentation. To help individual instructors make the most effective use of the text in specific classes, a set of matrixes is provided, suggesting configurations of readings for different types of linguistics and education classes.
