Safe, Supportive, and Inclusive Learning Environments for Young People in Crisis and Trauma Patty Towl, Sheryl A. Hemphill, 2020-06-02 Children and young people from diverse populations are statistically more at risk of exclusion however education providers can make a difference to all children and young persons learning outcomes no matter what their personal circumstances To achieve this not only must educators form closer and more authentic relationships with these children and their communities but the governments that fund learning environments must also be prepared to provide adequate resourcing and training opportunities Safe Supportive and Inclusive Learning Environments for Young People in Crisis and Trauma addresses both the general and specific issues that may prevent children and young people from diverse populations from being safe supported and included in learning environments Some chapters focus on general factors that contribute to both inclusion

and exclusion at early childhood and in formal school environments while others present research based best practice and practical advice to enable good education outcomes for indigenous migrant and LGBTQI children and those who experience mental health problems drug misuse and abuse Lastly the book includes information about how to negotiate and set up programmes that have been shown to be effective with communities that differ from the dominant culture This book provides practitioners in education health and social work with information and practical advice on how to retain all children and young people in early childhood formal school education and tertiary settings *Teachers and Crisis* Dennis

Carlson, 2017-12-12 Advocates of the back to basics movement argue that a basic skills programme ensures that students are educated to a minimum level of literacy required to enter the labour force Critics charge that these efforts only increase school bureaucracy and undermine teachers autonomy in the classroom First published in 1992 this book moves beyond the rhetoric surrounding the basic skills debate by providing a thorough yet critical examination of urban education urban school reform and teachers work culture Beginning with a sparkling theoretical discussion of the problems and pitfalls of back to basics reform efforts author Dennis Carlson argues persuasively that the movement's exclusive emphasis on functional literacy skills rather than higher order thinking assures that students will remain on the lower rungs of the socio economic ladder He then proceeds with an empirical study of two urban high school districts in which he documents the latent effects of back to basics on teachers work lives as well as staff administration clashes over efforts to implement restructuring programmes This book offers a sensible and sophisticated treatment of some of the important issues facing urban education and will be of great interest to anyone working in Education Creating Positive Classroom Climate Maureen

Connolly, Jonathan Ryan Davis, 2022-10-17 *Creating Positive Classroom Climate 30 Practical Teaching Strategies for All School Contexts* is designed for all K 12 educators pre service teachers and teacher preparation faculty We wrote this book to provide readers with accessible tools that can help them create and maintain an optimal classroom climate Reading this book is like being in the room with 30 teacher mentors from different grade levels and school settings who are sharing strategies for building and maintaining a positive classroom climate Discover step by step breakdowns of how to implement each strategy as well as professional reflections from contributors representing two different grade levels and a range of suburban and urban settings from all over the globe Education students and novice teachers will learn from the in depth descriptions of how to implement each strategy Veteran teachers will be inspired by contributing teachers professional reflection regarding why and how they utilize each strategy Readers in ALL school contexts will benefit from narrative descriptions of each strategy in action which bring to life the ways that the strategies have made an impact on student learning and teacher development The adaptations modeled throughout the book based on students and schools assets and needs help readers to think about how to make each strategy a good fit for their unique classroom If you are looking for practical ideas from the field look no further this is a book designed to build your teaching toolbox with classroom climate
