Teachers Sourcebook for Extensive Reading George Jacobs, Thomas S.C. Farrell, 2012-08-01 The best way for students to learn to read and to come to love reading is surprise surprise by reading in quantity Unfortunately many of today's students read far too little This lack of time spent reading is particularly unfortunate as reading constitutes a bedrock skill essential in all subject areas Thus we teachers need to devote curriculum time to not only teaching students how to read but also to encouraging them to read extensively This is what Extensive Reading is all about Teachers Sourcebook for Extensive Reading provides hundreds of teacher tested ideas on how to do Extensive Reading The book begins with an introduction to the what and the why of Extensive Reading Thereafter the book consists of three parts Part 1 discusses finding materials for Extensive Reading Part 2 offers ideas for motivating students to read and for activities that students might do after they read or while they are reading including cooperative learning activities Part 3 looks at how teachers can serve as advocates for Extensive Reading Among the book's distinctive features are breaks for reflection first person accounts from teachers and ideas for doing Action Research and other forms of teacher investigation and research on Extensive Reading We hope that you will find the Teachers Sourcebook for Extensive Reading to be a practical book but also informed by theory and research We also hope this book will make a difference for your students in their test scores and even more in their attitude toward reading now and in the future

Literacy Across Languages and Cultures Bernardo M. Ferdman, Rose-Marie Weber, Arnulfo G. Ramirez, 1994-01-01 This book examines the linkage between literacy and linguistic diversity embedding them in their social and cultural contexts It illustrates that a more complete understanding of literacy among diverse populations and in multicultural societies requires attention to issues of literacy per se as well as to improving an educational process that has relevance beyond members of majority cultures and linguistic groups The focus of the book is on the social and cultural contexts in which literacy develops and is enacted with an emphasis on the North American situation Educators and researchers are discovering that cognitive approaches while very valuable are insufficient by themselves to answer important questions about literacy in heterogeneous societies By considering the implications of family school culture society and nation for literary processes the book answers the following questions In a multi ethnic context what does it mean to be literate What are the processes involved in becoming and being literate in a second language In what ways is literacy in a

second language similar and in what ways is it different from mother tongue literacy What factors must be understood to better describe and facilitate literacy acquisition among members of ethnic and linguistic minorities What are some current approaches that are being used to accomplish this These are vital questions for researchers and educators in a world that has a large number of immigrants a variety of multi ethnic and multi lingual societies and an increasing degree of multinational activity Beyond addressing applied concerns attending to these questions can provide new insights into basic aspects of literacy

learning theories Part II provides research reviews and information about literacy learning within specific culturally and linguistically diverse communities The chapters in Part III challenge the reader to view the multiple social intellectual cultural and language differences children bring to the classroom as an opportunity for learning and building on the diversity among students Activities and suggested readings at the end of each chapter involve readers in reflection observation meaning making and the construction of application processes for their new understandings New in the Second Edition updated research and theory on multilingual and second language literacy a focus on the interpretation of these research findings to make them useful for teachers and teacher educators in understanding and articulating the research bases for literacy practices attention to current intensely debated issues such as standards the phonics movement and high stakes testing and new activities and suggested readings **Reading in a Second Language** A.H.
