Sanders, 2000 Contains fifteen exciting easy to read plays designed to aid mathematics instruction **American Education**, 1898 The First 100 Days in the Main Office Alan Jones, 2017-12-01 This book presents a series of cultural situations that could occur within the first one hundred days of a school year responding to entrenched vocabularies and behaviors addressing professional and instructional bad habits enacting alternative teaching scripts leveraging a policy blindside redefining the goals and practices of teams and implementing outside the box programs Each cultural situation offers a new school leader the opportunity to redefine the goals values and practices of an entrenched school culture the Central Highway Administrators reading the title of this book may view one hundred days as an arbitrary number picked out of administrative thin air I argue that disrupting and replacing organizational and instructional routines is a race against time Every school day that goes by without some sign of creative destruction is one more day that comfortable organizational and instructional routines live on in main offices and classrooms The idea for this book originated from a question I asked a former student of mine who had just signed a contract to become the principal of a high school We were discussing the complexities of changing a school culture when I asked the following question What would you do on the first day in your new office to change your school's culture The response to that question described a series managerial routines that all new administrators have learned to perform as they move from the classroom to the main office organize the office meet staff tour the building write a newsletter examine data and visit community venues Nothing in this conversation described strategies for redefining the beliefs and values of an entrenched school culture With this conversation in mind I made it a point in my formal and informal contacts with school administrators to always ask the question What would you do in the first day in your new office to change your school's culture The most common responses involved reviewing district documents touring facilities meeting staff listening to stakeholders and managing systems In each conversation school leaders populated their responses with the current jargon of school reform learning

communities data mining standards based curriculum differentiated learning common core standards formative assessment race to the top continuous improvement etc While these responses encompass reasonable behaviors on the first day in the main office not one of these actions possesses the capacity to connect educational values expressed in school mission statements why are we here to daily organizational and instructional routines Each activity gives the appearance of leading but produces no connections between beliefs values and practices Although none of these responses would make or break a school culture they do represent a pattern of thinking and behaving that holds out little possibility of fundamentally changing a school s culture *Resources in Education* ,1982-04 Visual Impact, Visual Teaching Timothy Gangwer,2009-02-15 Hold on to this author he is magical I learned more from reading Gangwer s book than I have in eight years of professional development workshops Laura S Gulledge Media Literacy Teacher Benjamin Russell High School Alexander City AL Gangwer has effectively organized information from many sources into a form that is readable and practical for a wide variety of education practitioners including classroom teachers and fine arts teachers Ellen Herbert Art Teacher Longview High School TX Spark learners enthusiasm and promote retention of content with visual teaching techniques Each day teachers look for new ways to get students excited about learning and new ways to help them retain the information they learn In this practical guide Timothy Gangwer incorporates the latest research on visual learning and shows how you can stimulate students interest and participation Offering classroom tested techniques to engage learners brains this book includes hundreds of ready to use visual learning activities in language arts math science social studies environmental studies the arts and more This resource covers Differentiating instruction based on how students process visual information Using graphic organizers digital photography the Internet and other visual communication tools Incorporating music art and drama to enhance instruction and learning Teaching visual communication strategies to English language learners Discover how to use visual strategies and activities to help students think critically about the way they understand and perceive the world
